Appendix 6: Additional Matters to be Included in the Group Auditor’s Letter of Instruction (Paragraph A30)

International Standard on Auditing (ISA) 600 (Revised and Redrafted), “The Audit of Group Financial Statements” should be read in the context of the “Preface to the International Standards on Quality Control, Auditing, Assurance and Related Services,” which sets out the application and authority of ISAs.
Introduction

Scope of this ISA

1. This International Standard on Auditing (ISA) deals with special considerations in the audit of group financial statements ("group audits") and, in particular, the involvement of other auditors, as defined in paragraph 7(h), in group audits. This ISA also applies where other auditors are involved in the audit of the financial statements of a single entity.

The Effect on Audit Risk of Using the Work of Other Auditors

2. ISA 200, “Objective and General Principles Governing an Audit of Financial Statements” explains that audit risk is a function of the risk of material misstatement of the financial statements and the risk that the auditor will not detect such misstatements. In a group audit, this includes the risk that the other auditors may not detect a misstatement in the financial information of the component that could cause a material misstatement of the group financial statements, and the risk that this misstatement is not detected by the group auditor. To obtain sufficient appropriate audit evidence to reduce audit risk for the group financial statements to an acceptably low level, the group auditor may need to be involved in the work performed by the other auditors. Involvement in the work performed by the other auditors may include the group auditor undertaking, for example, some or all of the following actions:

- Meeting with component management or the other auditors to obtain an understanding of the component and its environment.
- Reviewing the other auditors’ overall audit strategy and audit plan.
- Performing risk assessment procedures and participating in the assessment of risks of material misstatement at the component level. These may be performed with the other auditors, or by the group auditor.
- Determining and performing further audit procedures. These may be determined and performed with the other auditors, or by the group auditor.
- Participating in the closing and other key meetings between the other auditors and component management.
- Reviewing relevant parts of the other auditors’ audit documentation.

3. The nature, timing and extent of involvement in the work performed by the other auditors necessary to obtain sufficient appropriate audit evidence to reduce audit risk for the group financial statements to an acceptably low level are affected by factors such as the significance of the components, identified risks of material misstatement of the group financial statements, and the group auditor’s understanding of the other auditors.

4. Although other auditors may perform work on the financial information of components for the group audit and as such are responsible for their overall findings, conclusions or opinions in their memoranda or reports of work performed, the group auditor alone is responsible for the audit opinion on the group financial statements ("group audit opinion").
Effective Date
5. This ISA is effective for audits of group financial statements for periods beginning on or after [date].

Objective to be Achieved
6. In relation to this ISA, the objective of the auditor is to determine whether the auditor is able to act as the group auditor and, if so, to:

(a) determine the audit procedures to be performed on the consolidation process and the work to be performed by the group auditor or the other auditors on the financial information of the components;

(b) determine the group auditor’s involvement in the work performed by the other auditors;

(c) establish appropriate communication with the other auditors; and

(d) evaluate the audit evidence obtained in relation to the consolidation process and the financial information of the components in order to obtain sufficient appropriate audit evidence to reduce audit risk for the group financial statements to an acceptably low level.

Definitions
7. The following terms are introduced in this ISA:

(a) Component - A head office, parent, division, branch, subsidiary, joint venture, associated company, or other entity whose financial information is or should be included in the group financial statements.

(b) Component management - Management responsible for preparing the financial information of a component.

(c) Group auditor\(^1\) - The engagement partner who is responsible for the performance of the group audit and for the auditor’s report on the group financial statements issued on behalf of the firm. The obligations or responsibilities of the group auditor may be fulfilled by either the group engagement partner or another member of the engagement team under the direct supervision of the group engagement partner. Where it is expressly intended that the obligation or responsibility be fulfilled by the group engagement partner, the term “group engagement partner” rather than “group auditor” is used.

(d) Group financial statements - Financial statements that include or should include financial information of more than one component. The term “group financial

\(^1\) Where the group audit is conducted by joint auditors, the joint auditors collectively constitute the group auditor. This ISA, however, does not deal with the relationship between joint auditors and the work that one joint auditor performs in relation to the work performed by the other joint auditor.
“statements” also refers to combined financial information aggregating the financial information of components in circumstances where there is no parent.

(e) Group management - Management responsible for preparing and presenting the group financial statements.

(f) Group-wide controls - Internal controls established by group management over group financial reporting.

(g) Member of the engagement team under the direct supervision of the group engagement partner – Personnel of the group engagement partner’s firm, including any experts contracted by the group engagement partner’s firm in connection with the group audit engagement, who is directed and supervised by the group engagement partner to the same extent that a member of an engagement team responsible for the audit of the financial statements of a single entity is directed and supervised by the engagement partner in accordance with ISA 220, “Quality Control for Audits of Historical Financial Information.”

(h) Other auditor or another auditor - An auditor, other than the group engagement partner or a member of the engagement team under the direct supervision of the group engagement partner, who performs work on the financial information of one or more components for the group audit.

(i) Significant component - A component that has been identified at the group level as likely to include significant risks of material misstatement of the group financial statements (i.e., significant risks that require special audit consideration – see ISA 315, “Understanding the Entity and Its Environment and Assessing the Risks of Material Misstatement”). This could be due to the nature of and circumstances specific to the component, or the individual financial significance of the component to the group.

8. Reference to “the applicable financial reporting framework” means the financial reporting framework applicable to the group financial statements. Reference to “the consolidation process” includes the recognition and measurement of components in accordance with the equity method of accounting, and the aggregation of the financial information of components in circumstances where there is no parent.

Requirements

Acceptance and Continuance as Group Auditor

9. The firm of the group engagement partner shall accept or continue an engagement to audit group financial statements only if the group engagement partner has reasonable expectation of obtaining sufficient appropriate audit evidence in relation to the consolidation process and the financial information of the components to reduce audit risk for the group financial statements to an acceptably low level. This is achieved by the group auditor performing the work on the consolidation process; and either performing the work on the financial information of significant components, or being involved in the work that the other auditors perform on the financial information of significant components to the extent necessary to obtain sufficient appropriate audit evidence. (Ref: Para A4-A6)
10. To determine whether the group engagement partner can reasonably expect to obtain sufficient appropriate audit evidence, the group auditor shall obtain an understanding of the group, its components, and their environments, sufficient to determine which of the components are likely to be significant and, where other auditors will perform the work on the financial information of components that are likely to be significant, whether the group auditor will be able to be involved in the work of those other auditors to the extent necessary to obtain sufficient appropriate audit evidence. (Ref: Para. A1-A5)

11. The group auditor may not be able to be involved in the work that another auditor will perform on the financial information of a component that is likely to be significant. This may be because the group auditor’s access to component information, those charged with governance of components, component management, or the other auditors (including relevant audit documentation sought by the group auditor) is restricted, and such restriction cannot be overcome by group management; or it is impractical for the group auditor to be involved in the work of that other auditor. Where this is the case, it is unlikely that the group auditor will be able to obtain sufficient appropriate audit evidence. (Ref: Para. A7-A9)

12. If the group engagement partner concludes that it will not be possible to obtain sufficient appropriate audit evidence and the possible effect of this inability will result in a disclaimer of opinion on the group financial statements (see [proposed] ISA 705, “Modifications to the Opinion in the Independent Auditor’s Report”), the group engagement partner shall inform group management, or those charged with governance of the group, that it is not possible to accept the engagement. In the case of a continuing engagement, the group engagement partner shall consider resigning from the engagement.

13. Where law or regulation does not permit an auditor not to accept or resign from an engagement, the group engagement partner shall express a disclaimer of opinion on the group financial statements. (Ref: Para. A10)

**Obtaining an Understanding of the Other Auditors**

14. To determine the group auditor’s involvement in the work performed by the other auditors, the group auditor shall obtain an understanding of the following:

   (a) The professional qualifications of the other auditors;
   (b) The other auditors’ compliance with relevant ethical requirements and, in particular, their independence and professional competence;
   (c) The quality control systems of the other auditors’ firms (see paragraph 15);
   (d) If not prohibited by law or regulation, whether the other auditor will provide the group auditor with the necessary access to relevant audit documentation; and
   (e) Other factors that may affect the ability of the group auditor to be involved in the work performed by the other auditors. (Ref: Para. A12-A15)

This requirement does not apply to members of the engagement team under direct supervision of the group engagement partner. Such individuals are subject to the requirements of ISA 220, “Quality Control for Audits of Historical Financial Information.”
15. Where another auditor does not operate under and comply with monitoring policies and procedures common to those of the group auditor as provided for in International Standard on Quality Control (ISQC) 1, “Quality Control for Firms that Perform Audits and Reviews of Historical Financial Information, and Other Assurance and Related Services Engagements,” the group auditor shall obtain a confirmation from that other auditor whether that other auditor’s firm’s quality control systems comply with ISQC 1.

16. When another auditor is not independent of the client, or the group auditor has serious concerns about any of the other matters listed in paragraph 14, the group auditor shall obtain audit evidence relating to the financial information of the component without using the work of that other auditor.

**Obtaining an Understanding of the Group, Its Components, and Their Environments, and Assessing the Risks of Material Misstatement of the Group Financial Statements**

17. The group auditor shall enhance the understanding of the group, its components, and their environments obtained during the acceptance or continuance stage, and obtain an understanding of the consolidation process, including the group financial reporting procedures manual, proposed reporting package, and related instructions issued by group management to components. (Ref: Para. A16-A23)

18. The group auditor’s understanding shall be sufficient to identify, at group level, risks of material misstatement of the group financial statements, confirm the group auditor’s initial identification of significant components, and assess at the group level the risks of material misstatement of the group financial statements. As part of the risk assessment, the group auditor shall determine which of the risks identified are significant risks. (Ref: Para. A24-A25)

**Materiality**

19. In addition to materiality determined for the group financial statements as a whole when establishing the overall audit strategy for the group audit (see [proposed] ISA 320, “Materiality in Planning and Performing an Audit”) (“group materiality”), the group auditor shall determine the materiality to be used in planning and performing the work on the financial information of the components for the group audit (“component materiality”).

---

2 Paragraph 87 of ISQC 1 reads as follows: Some firms operate as part of a network and, for consistency, may implement some or all of their monitoring procedures on a network basis. Where firms within a network operate under common monitoring policies and procedures designed to comply with this ISQC, and these firms place reliance on such a monitoring system:

(a) At least annually, the network communicates the overall scope, extent and results of the monitoring process to appropriate individuals within the network firms;

(b) The network communicates promptly any identified deficiencies in the quality control system to appropriate individuals within the relevant network firm or firms so that the necessary action can be taken; and

(c) Engagement partners in the network firms are entitled to rely on the results of the monitoring process implemented within the network, unless the firms or the network advises otherwise.
To allow for aggregation of uncorrected misstatements and possible undetected misstatements, component materiality is lower than group materiality.

20. [Proposed] ISA 320 (Revised) requires the auditor to determine an amount lower than the materiality level for the financial statements as a whole for purposes of assessing the risks of material misstatement and designing further audit procedures to respond to assessed risks. Accordingly, based on component materiality, the group auditor shall also determine such lower amount for purposes of assessing the risks of material misstatement and designing further audit procedures to respond to assessed risks at the component level.

Responding to Assessed Risks

Determining the Work to be Performed on the Financial Information of Components

21. The group auditor shall determine the work to be performed by the group auditor or the other auditors on the financial information of the components to obtain sufficient appropriate audit evidence to reduce audit risk for the group financial statements to an acceptably low level. This determination is based on the significance of the component, the identified significant risks, and the group auditor’s evaluation of the design of group-wide controls and determination whether they have been implemented. (Ref: Para. A26)

22. If the nature, timing and extent of the work to be performed on the financial information of the components are based on an expectation that group-wide controls are operating effectively, the group auditor shall test the operating effectiveness of those controls.

Significant Components

23. For a component that is significant due to its nature and circumstances, the group auditor, or another auditor at the request of the group auditor, shall perform one of the following:

   (a) An audit performed using either a materiality level determined by the group auditor; or a lower materiality level determined by the other auditor where the circumstances in paragraph 30 apply.

   (b) An audit of specified account balances relating to the identified significant risks.

   (c) Specified audit procedures relating to the identified significant risks.

24. For a component that is significant due to its individual financial significance to the group, the group auditor, or another auditor at the request of the group auditor, shall perform an audit using either a materiality level determined by the group auditor; or a lower materiality level determined by the other auditor where the circumstances in paragraph 30 apply.

Components that are Not Individually Significant

25. If the work performed on the financial information of significant components will not result in the group auditor obtaining sufficient appropriate audit evidence to reduce audit risk for the group financial statements to an acceptably low level, the group auditor shall select components that are not individually significant for which the group auditor, or another auditor at the request of the group auditor, shall perform one of the following on the financial information of the individual components selected:
(a) An audit performed using either a materiality level determined by the group auditor; or a lower materiality level determined by the other auditor where the circumstances in paragraph 30 apply.

(b) An audit of specified account balances.

(c) Specified audit procedures.

(d) A review of the financial information of the component performed in accordance with standards determined by the group auditor. (Ref: Para. A27-A28)

26. For components not selected for the period under audit, the group auditor shall perform analytical procedures at the group level.

**Involvement in the Work Performed by the Other Auditors**

27. The group auditor shall determine the group auditor’s involvement in the work performed by the other auditors (see paragraph 2). This determination is based on the significance of the component, the identified significant risks, and the group auditor’s understanding of the other auditors.

**Significant Components—Risk Assessment**

28. When another auditor performs the work on the financial information of a significant component, the group auditor shall be involved in the other auditor’s risk assessment to identify significant risks of material misstatement of the group financial statements. The nature, timing and extent of the group auditor’s involvement are affected by the group auditor’s understanding of the other auditor. At a minimum, the group auditor shall:

(a) Discuss with the other auditor or component management the component’s business activities that are significant to the group, including the regulatory, economic and political environments in which those activities take place;

(b) Discuss with the other auditor the susceptibility of the component to material misstatement of the financial information due to fraud or error; and

(c) Review the other auditor’s documentation of the identified and assessed risks of material misstatement. Such documentation may be in the form of a memorandum, reflecting the other auditor’s conclusion with regard to the identified and assessed risks of material misstatement.

**Identified Significant Risks of Material Misstatement—Further Audit Procedures**

29. When significant risks of material misstatement of the group financial statements have been identified in a component on which another auditor performs the work, the group auditor together with the other auditor shall determine the further audit procedures to be performed to respond to the identified significant risks. The group auditor shall determine whether, based on the group auditor’s understanding of the other auditor, it is necessary to be involved in performing further audit procedures.
Components Subject to Audit by Statute, Regulation or Other Reason

30. The other auditor may be required by statute, regulation or for another reason to express an audit opinion on the financial statements of a component. The group auditor may decide to use this audit to provide audit evidence for the group audit, provided the requirements of this ISA are met.

31. If the group auditor decides to use the audit required by statute, regulation or for another reason to provide audit evidence for the group audit, the group auditor shall:

(a) Evaluate the effect of the financial reporting framework applied in preparing the financial statements of the component and the auditing standards applied by the other auditor where they are different from those applied in preparing the group financial statements and in the audit thereof, and determine whether additional audit procedures are necessary; and

(b) Consider whether the audit of the financial statements of the component will be completed in time to meet the group reporting timetable.

Consolidation Process

32. The group auditor shall determine the work to be performed on the consolidation process to respond to the assessed risks of material misstatement of the group financial statements arising from the consolidation process.

33. The consolidation process may require adjustments to amounts reported in the group financial statements that do not pass through the usual transaction processing systems, and that may not be subject to the same internal controls to which other financial information is subject. These adjustments typically consist of consolidation adjustments and reclassifications. The group auditor shall evaluate the appropriateness, completeness and accuracy of the adjustments, and consider whether indicators of possible management bias exist. (Ref: Para. A29)

34. If a component’s financial information has not been prepared in accordance with the accounting policies applied to the group financial statements, the group auditor shall evaluate whether the component’s financial information has been appropriately adjusted for purposes of preparing and presenting the group financial statements.

35. The group auditor shall determine whether the financial information identified in the other auditor’s memorandum or report of work performed is the financial information that is incorporated in the group financial statements.

36. If the group financial statements include the financial statements of any components with financial reporting period-ends that differ from that of the group, and consolidation adjustments have not been made in this respect, the group auditor shall determine whether this is acceptable under the applicable financial reporting framework. Where it is not acceptable, and the effect on the group financial statements may be material, the group auditor shall identify any significant transactions, including intra-group transactions and unrealized profits, or other events and disclosures that need to be reflected in or eliminated from the group financial statements.
Subsequent Events

37. For significant components, the group auditor shall perform, or request the other auditors to perform, procedures designed to identify events at those components between the dates of the financial information of the components and the date of the auditor’s report on the group financial statements.

38. For components that are not individually significant, the group auditor shall require the other auditors to communicate to the group auditor whether they are aware of subsequent events that may require an adjustment to or a disclosure in the group financial statements.

Communication with the Other Auditors

39. The group auditor shall communicate, as early as possible, the group auditor’s requirements to the other auditor. This communication, ordinarily in the form of a letter of instruction, sets out the work to be performed and the form and content of the other auditor’s memorandum or report of work performed.

40. The group auditor’s communication about the work to be performed shall include the following:

   (a) Component materiality, the lower amount for purposes of assessing the risks of material misstatement and designing further audit procedures to respond to assessed risks at the component level, and the threshold above which misstatements cannot be regarded as clearly trivial to the group financial statements.

   (b) Identified significant risks, including fraud risks, that are relevant to the work of the other auditor. This communication occurs when the group auditor is not involved in the other auditor’s risk assessment procedures. The group auditor shall request the other auditor to inform the group auditor of any other identified significant risks that may affect the group financial statements.

   (c) Laws and regulations applicable to the parent that are relevant to the other auditor’s work. The group auditor shall request the other auditor to communicate any non-compliance with laws and regulations applicable to the component that could materially affect the group financial statements.

   (d) A list of related parties prepared by group management, and any other related parties the group auditor is aware of. The group auditor shall request the other auditor to communicate the names of any additional related parties, and the types of transactions with such related parties. The group auditor shall communicate such additional related parties to the other auditors. (Ref: Para. A30)

41. The other auditor’s memorandum or report of work performed shall contain matters relevant to the group auditor’s conclusion with regard the group audit. In particular, it shall:

   (a) State whether the other auditor has complied with the quality control policies and procedures of that auditor’s firm;

   (b) State whether the other auditor has complied with the relevant ethical requirements, including independence and professional competence;
c) State whether the other auditor has complied with the group auditor’s other instructions;

(d) Identify the financial information of the component on which the other auditor is reporting;

(e) Describe the work performed by the other auditor, including, where applicable, materiality used to plan and perform the work, a list of significant risks identified at the component level that may result in a misstatement in excess of component materiality, the other auditor’s response to such risks, and the results of further audit procedures;

(f) List corrected and uncorrected misstatements of the financial information of the component (the list does not include misstatements that were below the threshold communicated by the group auditor for clearly trivial misstatements), and note identified indicators of possible management bias;

(g) Describe any identified material weaknesses in internal control over financial reporting at the component level;

(h) Set out other significant matters that the other auditor communicated or expects to communicate to those charged with governance of the component;

(i) Set out any other matters that the other auditor wishes to draw to the attention of the group auditor; and

(j) Set out the other auditor’s overall findings, conclusions or opinion.

Evaluating the Sufficiency and Appropriateness of Audit Evidence Obtained

Evaluating the Other Auditors’ Memoranda or Reports of Work Performed

42. Based on the group auditor’s evaluation of the other auditors’ memoranda or reports of work performed, the group auditor shall determine whether it is necessary to discuss significant matters arising from another auditor’s memorandum or report of work performed with the other auditor, component management or group management; and whether it is necessary to review other relevant parts of another auditor’s audit documentation. (Ref: Para. A31)

43. If the group auditor concludes that the work of another auditor is inadequate for the group auditor’s purposes, the group auditor shall determine additional procedures to be performed, and whether such additional procedures are to be performed by the other auditor or by the group auditor.

Sufficiency and Appropriateness of Audit Evidence

44. The group auditor shall evaluate whether sufficient appropriate audit evidence has been obtained from the audit procedures performed on the consolidation process and the work performed by the group auditor and the other auditors on the financial information of the components, on which to base the group audit opinion.
Considering the Effect of the Other Auditors’ Memoranda or Reports of Work Performed on the Auditor’s Report on the Group Financial Statements

45. The group auditor shall consider the effect of any disagreement with component management or inability to obtain sufficient appropriate audit evidence on the group audit opinion.

46. The group auditor shall consider the aggregate effect of the uncorrected immaterial misstatements of the financial information of the components on the group audit opinion.

47. Unless relevant to the modification of the group audit opinion, the group auditor shall not refer to the involvement of the other auditors in the auditor’s report on the group financial statements.

Communication with Group Management and Those Charged with Governance of the Group

Communication with Group Management

48. The group auditor shall make group management aware, on a timely basis and at an appropriate level of responsibility, of:

   (a) Material weaknesses in the design or operation of group-wide controls, including controls over the preparation and presentation of the group financial statements;

   (b) Material weaknesses in internal controls at components that have been identified by the group auditor, or that have been brought to the attention of the group auditor by the other auditors, that the group auditor judges are of significance to the group.

49. If fraud has been identified in components, or information indicates that a fraud may exist, the group auditor shall communicate this as soon as practicable to group management. If the group auditor believes or suspects that group or component management may be involved in the fraud, the group auditor shall communicate this to those charged with governance of the group.

50. Where another auditor is required by statute, regulation or for another reason to express an audit opinion on the financial statements of a component, and the group auditor becomes aware of matters that may be significant to the financial statements of the component of which component management may be unaware, the group auditor shall request group management to inform component management of such matters for the purpose of the component audit. When group management refuses to communicate the matter to component management, the group auditor shall discuss the matter with those charged with governance of the group. (Ref: Para. A33)

Communication with Those Charged with Governance of the Group

51. In a group audit, the group auditor shall communicate with those charged with governance of the group the following matters in addition to those required by [proposed] ISA 260, “Communications with Those Charged with Governance:”

   (a) The planned work to be performed on the financial information of the components.
(b) The group auditor’s planned involvement in the work to be performed by the other auditors on the financial information of significant components.

(c) Instances where the group auditor’s evaluation of the work of another auditor gave rise to a concern about the quality of the work performed by that other auditor.

(d) Any limitations on the group audit. For example, the group auditor’s access to component information, those charged with governance of components, component management, or the other auditors (including relevant audit documentation sought by the group auditor) may have been restricted. (Ref: Para. A34)

**Documentation**

52. In a group audit, the group auditor shall document the following matters in addition to those required by ISA 230 (Revised), “Audit Documentation” and the other ISAs:

   (a) The group auditor’s understanding of the other auditors, and the nature, timing and extent of the group auditor’s involvement in the work performed by the other auditors.

   (b) The group auditor’s communications with the other auditors about the group auditor’s requirements.

***

**Application Material**

**Acceptance and Continuance as Group Auditor**

*Obtaining an Understanding at the Acceptance or Continuance Stage* (Ref: Para. 10)

A1. In the case of a new engagement, the group auditor’s understanding of the group, its components, and their environments may be obtained from:

   • Information provided by group management;

   • Discussions with group management; and

   • Where applicable, discussions with the previous group auditor, component management and other auditors.

A2. The group auditor’s understanding may include matters such as the following:

   • The group structure.

   • Components’ business activities that are significant to the group, including the regulatory, economic and political environments in which those activities take place.

   • The use of service organizations, including shared service centers.

   • A description of group-wide controls.

   • The complexity of the group financial statements.
• Whether other auditors will perform work on the financial information of any of the components and group management’s rationale for appointing more than one auditor.

• Whether the group auditor:
  
  o Will have unrestricted access to those charged with governance of the group, group management, those charged with governance of the component, component management, component information, and the other auditors (including relevant audit documentation sought by the group auditor); and

  o Will be able to perform necessary work on the financial information of the components.

A3. In the case of a continuing engagement, the group auditor’s ability to obtain sufficient appropriate audit evidence to reduce audit risk for the group financial statements to an acceptably low level may be affected by significant changes, for example:

• Changes in the group structure (e.g., acquisitions, disposals, or reorganizations).

• Changes in components’ business activities that are significant to the group.

• Changes in the composition of those charged with governance of the group, group management, or key management of significant components.

• Difficulties experienced by the group auditor with regard to the integrity and competence of group or component management.

• Changes in group-wide controls.

Identifying Significant Components (Ref: Para. 9-10)

A4. The group auditor may identify a component as likely to include one or more significant risks of material misstatement of the group financial statements due to the nature of and circumstances specific to that component. For example, a component could be responsible for foreign exchange trading and thus expose the group to a significant risk of material misstatement even though the component is not otherwise of individual financial significance to the group.

A5. A component may also be likely to include significant risks of material misstatement of the group financial statements due to its individual financial significance to the group. As the individual financial significance of a component increases, the risks of material misstatement of the group financial statements ordinarily increase. Generally, a relatively small number of components will constitute a large portion of the group’s operations and financial position, making them financially significant. The group auditor may apply a percentage to a chosen benchmark as an aid to identify components that are of individual financial significance. The group auditor exercises professional judgment in identifying a benchmark and determining a percentage to be applied to such benchmark. Depending on the nature and circumstances of the group, appropriate benchmarks might include group assets, liabilities, cash flows, profit or turnover. For example, after identifying components that are likely to include significant risks of material misstatement of the group financial statements, the group auditor may consider that other components, which exceed 15% of
the chosen benchmark, are also significant. A higher or lower percentage, however, may be deemed appropriate in the circumstances.

**Expectation to Obtain Sufficient Appropriate Audit Evidence** (Ref: Para. 9)

A6. A group may consist only of components that are not likely to be significant. In these circumstances, the engagement partner can reasonably expect to obtain sufficient appropriate audit evidence to reduce audit risk for the group financial statements to an acceptably low level if the group auditor will be able to:

(a) Perform the work on the financial information of some of these components; and

(b) Be involved in the work performed by the other auditors on the financial information of other components to the extent necessary to obtain sufficient appropriate audit evidence.

**Access to Information** (Ref: Para. 11-13)

A7. The group auditor may not have access to component information, those charged with governance of components, component management, or the other auditors (including relevant audit documentation sought by the group auditor). The group auditor’s access may be restricted by circumstances or group management.

A8. Where access is restricted by circumstances, the group auditor nevertheless may be able to obtain sufficient appropriate audit evidence. For example, the group auditor may not have access to those charged with governance, the management, or auditor (including relevant audit documentation sought by the group auditor) of a component that is accounted for by the equity method. The group auditor, however, may have a complete set of financial statements of the component, including the auditor’s report thereon, and information retained by group management in relation to that component. The group auditor may conclude that, based on the relative insignificance of the component, this information constitutes sufficient appropriate audit evidence. As the significance of the component increases, however, this is less likely to constitute sufficient appropriate audit evidence.

A9. Where access is restricted by group management, it is unlikely that the group auditor will be able to obtain sufficient appropriate audit evidence. Where this is the case, the requirements in paragraphs 12-13 apply.

A10. There may be circumstances where law or regulation does not permit an auditor not to accept or resign from an engagement. For example, in the public sector the option of not accepting or resigning from an engagement may not be available to the auditor due to the nature of the mandate or public interest considerations. In these circumstances, this ISA is applied to the public sector group audit, and the effect of the group auditor’s inability to obtain sufficient appropriate audit evidence on which to base the group audit opinion is considered in terms of [proposed] ISA 705. Appendix 1 contains an example of an auditor’s report containing a qualified opinion based on the group auditor’s inability to obtain sufficient appropriate audit evidence in relation to a component accounted for by the equity method where, in the group auditor’s judgment, the effect is material but not pervasive.
Terms of Engagement

A11. In a group audit, matters such as the following may be included in the terms of engagement in addition to those required by ISA 210, “Terms of Audit Engagements:”

- The applicable financial reporting framework.
- The fact that the communication between the group auditor and the other auditors should be unrestricted.
- The fact that important communications between the other auditors, those charged with governance of the component, and component management, including communications on material weaknesses in internal control, should be made available to the group auditor.
- The fact that important communications between regulatory authorities and components related to financial reporting matters should be made available to the group auditor.
- The fact that, to the extent the group auditor considers necessary, the group auditor should be permitted:
  - Access to component information, those charged with governance of components, component management, and the other auditors (including relevant audit documentation sought by the group auditor); and
  - To perform work on the financial information of the components.
- The fact that restrictions on:
  - the group auditor’s access to component information, those charged with governance of components, component management, or the other auditors (including relevant audit documentation sought by the group auditor); or
  - the work to be performed on the financial information of the components, imposed after the group auditor’s acceptance of the engagement, constitute a scope limitation that may affect the group audit opinion. In exceptional circumstances, it may even give rise to resignation from the engagement, i.e., where permitted by law or regulation.

Obtaining an Understanding of the Other Auditors (Ref: Para. 14)

A12. The group auditor’s understanding of the other auditors’ compliance with relevant ethical requirements and, in particular, their independence and professional competence may include, for example, whether they:

- Possess an understanding of the relevant ethical requirements, including independence, sufficient to fulfill their responsibilities in the group audit;
- Possess an understanding of the applicable financial reporting framework sufficient to fulfill their responsibilities in the group audit (the group financial reporting procedures manual often describes the characteristics of the applicable financial reporting framework);
• Possess an understanding of auditing and other standards applicable to the group audit, sufficient to fulfill their responsibilities in the audit of the group financial statements; and

• Possess the special skills necessary to perform the work on the financial information of the particular components.

The group auditor may consider it appropriate to request the other auditor to confirm in writing these and other relevant matters early in the audit process to enable the group auditor to consider their possible effect on the group audit. Appendix 5 contains an example of written confirmations by another auditor.

A13. The group auditor’s understanding may include whether the other auditors operate in a regulatory environment that actively oversees and enforces the professional qualifications, independence, and professional competence of auditors, and the quality control systems of their firms.

A14. The nature, timing and extent of the group auditor’s understanding of and involvement in the work performed by the other auditors may also be affected by factors such as the following:

• Previous experience with or knowledge of the other auditors.

• The degree to which the group auditor and the other auditors perform, or are subject to, common policies and procedures. For example, whether the group auditor and another auditor share:
  o Common policies and procedures for performing the work (e.g., audit methodologies);
  o Common quality control policies and procedures; or
  o Common monitoring policies.

• The consistency or similarity of:
  o Laws and regulations or legal system;
  o Professional oversight and discipline;
  o Education and training;
  o Professional organizations and standards;
  o Language and culture.

These factors interact and are not mutually exclusive.

A15. A number of sources may provide information about the other auditors. For example, the group auditor may:

• Visit the other auditors;

• Request the other auditors to complete questionnaires or written representations;
• Discuss the other auditors with colleagues in the group auditor’s firm, or with a network firm who has dealt with them;
• Obtain confirmations from the professional bodies to which the other auditors belong, the authorities by which they are licensed, or other third parties; or
• Consider the results of previous contacts with the other auditors.

Obtaining an Understanding of the Group, Its Components, and Their Environments, and Assessing the Risks of Material Misstatement of the Group Financial Statements

Matters About Which the Group Auditor Obtains an Understanding (Ref: Para. 17)

A16. ISA 315 contains guidance on matters the auditor may consider when obtaining an understanding of the industry, regulatory, and other external factors that affect the entity, including the applicable financial reporting framework; the nature of the entity; objectives and strategies and related business risks; and measurement and review of the entity’s financial performance. Appendix 2 contains guidance on matters specific to a group, including the consolidation process.

Financial Reporting Procedures Manual (Ref: Para. 17)

A17. To achieve uniformity and comparability of financial information, group management ordinarily issues financial reporting procedures manuals, a reporting package, and related instructions to components, specifying the requirements for financial information of the components to be included in the group financial statements.

A18. The reporting package ordinarily consists of standard formats for providing financial information for incorporation in the group financial statements. Reporting packages generally do not take the form of complete financial statements prepared and presented in accordance with the applicable financial reporting framework.

A19. The instructions ordinarily cover:
• The accounting policies to be applied;
• Statutory and other disclosure requirements applicable to the group financial statements, including:
  o The identification and reporting of segments;
  o Related party relationships and transactions;
  o Intra-group transactions and unrealized profits; and
  o Intra-group account balances; and
• A reporting timetable.

A20. The group auditor’s evaluation of the financial reporting procedures manual, reporting package, and related instructions may include the following:
• The clarity and practicality of the instructions for completing the reporting package.
• Whether the reporting package:
ISA 600 (Revised and Redrafted), The Audit of Group Financial Statements (Clean)

IAASB Main Agenda (March 2006) Page 2006·574

- Adequately describes the characteristics of the applicable financial reporting framework;
- Provides for disclosures sufficient to comply with the requirements of the applicable financial reporting framework, for example disclosure of related party relationships and transactions, and segment information;
- Provides for the identification of consolidation adjustments, for example intra-group transactions and unrealized profits, and intra-group account balances; and
- Provides for the approval of the completed package by component management.

Fraud (Ref: Para. 18)

A21. Information used to identify the risks of material misstatement due to fraud may include the following:

- Group management’s assessment of the risks that the group financial statements may be materially misstated as a result of fraud.
- Group management’s process for identifying and responding to the risks of fraud in the group, including any specific fraud risks identified by group management, or account balances, classes of transactions, or disclosures for which a risk of fraud is likely.
- Whether there are particular components for which a risk of fraud is likely.
- How those charged with governance of the group monitor group management’s processes for identifying and responding to the risks of fraud in the group, and the controls that group management has established to mitigate these risks.
- Responses of those charged with governance of the group, group management, internal audit (and if considered appropriate, component management, the other auditors, and others) to the group auditor’s inquiry whether they have knowledge of any actual, suspected, or alleged fraud affecting a component or the group.

Discussion Among Engagement Team Members Regarding the Risks of Material Misstatement of the Group Financial Statements, Including Risks of Fraud (Ref: Para. 18)

A22. ISA 315 and ISA 240, “The Auditor’s Responsibility to Consider Fraud in the Audit of Financial Statements” require the key members of the engagement team to discuss the susceptibility of an entity to material misstatement of the financial statements due to fraud or error, with a specific emphasis on the risks due to fraud. In a group audit, these discussions may also include the other auditors. The group engagement partner’s determination of who to include in the discussions, how and when they occur, and their extent is affected by factors such as prior experience with the group and knowledge of current developments. The discussions, however, ordinarily include the other auditors who perform work on the financial information of significant components.
A23. The discussions provide an opportunity to:

- Share knowledge of the components and their environments, including group-wide controls.
- Exchange information about the business risks of the components or the group.
- Exchange ideas about how and where the group financial statements may be susceptible to material misstatement due to fraud or error, how group management and component management could perpetrate and conceal fraudulent financial reporting, and how assets of the components could be misappropriated.
- Identify practices followed by group or component management that may be biased or designed to manage earnings that could lead to fraudulent financial reporting, for example revenue recognition practices that do not comply with the applicable financial reporting framework.
- Consider known external and internal factors affecting the group that may create an incentive or pressure for group management, component management, or others to commit fraud, provide the opportunity for fraud to be perpetrated, and indicate a culture or environment that enables group management, component management, or others to rationalize committing fraud.
- Consider the risk that group or component management may override controls.
- Consider whether uniform accounting policies are used to prepare the financial information of the components for the group financial statements, and whether differences in accounting policies are identified, and adjusted (where required by the applicable financial reporting framework).
- Discuss fraud that has been identified in components, or information that indicates existence of a fraud in a component.
- Share information that may indicate non-compliance with national laws or regulations, for example payments of bribes and improper transfer pricing practices.

Risk Factors (Ref: Para. 18)
A24. Examples of conditions or events that may indicate risks of material misstatement of the group financial statements, including risks due to fraud, are set out in Appendix 3.

Risk Assessment (Ref: Para. 18)
A25. The group auditor’s assessment at the group level of the risks of material misstatement of the group financial statements is based on information such as the following:

- Information obtained from the understanding of the group, its components, and their environments, and of the consolidation process, including audit evidence obtained in evaluating the design and implementation of group-wide controls and controls relevant to the consolidation.
- Information obtained through discussions with the other auditors.
Responding to Assessed Risks

Determining the Work to be Performed on the Financial Information of Components
(Ref: Para. 21-26)

A26. Appendix 4 illustrates how the group auditor may decide on the work to be performed on the financial information of the components.

Components that are Not Individually Significant (Ref: Para. 25)

A27. The group auditor’s selection of components that are not individually significant and work to be performed on the financial information of the individual components selected may be affected by factors such as the following:

- The extent of audit evidence expected to be obtained on the financial information of the significant components.
- Whether the component has been newly formed or acquired.
- Whether significant changes have taken place in the component.
- Whether internal audit has performed work at the component and the effect, if any, it has on the group audit.
- The commonality of systems and processes applied by the components.
- The operating effectiveness of group-wide controls.
- Abnormal fluctuations identified by analytical procedures performed at the group level.
- The risks posed by, or the individual financial significance of, the component in comparison with other components within this category.
- Whether the component is subject to audit required by statute, regulation or for another reason.

The group auditor may vary the selection of components and work to be performed on their financial information over a period of time.

A28. For example, analytical procedures performed at the group level might have indicated a significant increase in revenue and accounts receivable. Discussions with group management may have revealed that the increase is due to the establishment of a new market for one of the group’s products. The new market may have been established in a country with severe economic problems, which might affect the collection of the accounts receivable. In this example, the group auditor determined that the product is manufactured and sold by three subsidiaries in the group. Although these subsidiaries are not individually significant, they might be significant in the aggregate. Based on the risk assessment performed at the group level, the group auditor may decide to include the subsidiaries in the selection of components on which to perform, or require the other auditors to perform, work and the group auditor may decide that an audit of the accounts receivable at these three components may be the appropriate work.
Consolidation Process

Consolidation Adjustments and Reclassifications (Ref: Para. 33)

A29. The group auditor’s evaluation of the appropriateness, completeness and accuracy of the adjustments may include:

- Evaluating whether significant adjustments appropriately reflect the events and transactions underlying them;
- Determining whether significant adjustments have been correctly calculated, processed and authorized by group management and, where applicable, by component management;
- Determining whether significant adjustments are properly supported and sufficiently documented; and
- Checking the reconciliation and elimination of intra-group transactions and unrealized profits, and intra-group account balances.

Communication with the Other Auditors

Letter of Instruction (Ref: Para. 40)

A30. Appendix 6 contains guidance on matters, in addition to those listed in paragraph 40, that the group auditor’s letter of instruction may include.

Evaluating the Sufficiency and Appropriateness of Audit Evidence Obtained

Reviewing Another Auditor’s Audit Documentation (Ref: Para. 42)

A31. The parts of another auditor’s audit documentation that will be relevant to the group audit may vary depending on the circumstances. Ordinarily the focus is on audit documentation that is relevant to the significant risks of material misstatement of the group financial statements. The extent of the review ordinarily is affected by the fact that the other auditor’s documentation has been subjected to the other auditor’s firm’s review procedures.

Performing Analytical Procedures in the Overall Review at the End of the Group Audit

A32. In accordance with ISA 520, “Analytical Procedures,” analytical procedures are performed at group level at or near the end of the group audit when forming an overall conclusion as to whether the group financial statements as a whole are consistent with the group auditor’s understanding of the entity. The conclusions drawn from the results of such audit procedures are intended to corroborate conclusions formed during the work performed on the financial information of the components or elements of the group financial statements. For example, the group auditor may consider whether information obtained from the components about complex transactions between them, reflect the group auditor’s understanding of such transactions when consolidated.
Communication with Group Management and Those Charged with Governance of the Group

Communication with Group Management (Ref: Para. 50)

A33. Group management may need to keep certain material sensitive information confidential. Examples of matters that may be significant to the financial statements of the component of which component management may be unaware include the following:

- Potential litigation.
- Plans for abandonment of material operating assets.
- Subsequent events.
- Significant legal agreements.

Communication with Those Charged with Governance of the Group (Ref: Para. 51)

A34. The matters that the group auditor communicates to those charged with governance of the group may include those matters brought to the attention of the group auditor by other auditors that the group auditor judges to be significant to the responsibilities of those charged with governance of the group. Communication with those charged with governance of the group takes place at various times during the group audit. For example, the matters referred to in paragraph 51(a)-(b) may be communicated after the group auditor has determined the work to be performed on the financial information of the components. On the other hand, the matter referred to in paragraph 51(c) may be communicated at the end of the audit, and the matter referred to in paragraph 51(d) may be communicated when it occurs.
Example of a Qualified Opinion where the Group Auditor is Not Able to Obtain Sufficient Appropriate Audit Evidence on which to Base the Group Audit Opinion (Paragraph A10)

In this example, the group auditor is unable to obtain sufficient appropriate audit evidence in relation to a significant component accounted for by the equity method because the group auditor did not have access to the accounting records, management, or auditor of the component.

The group auditor has read the audited financial statements of the component as of June 30, 20X5, including the auditor’s report thereon, and considered related financial information retained by group management in relation to the component. The group auditor, however, was not able to obtain more recent audited financial statements of that component. The consolidated financial statements are for the year ended December 31, 20X5.

In the auditor’s judgment, the effect on the group financial statements of this inability to obtain sufficient appropriate audit evidence is material but not pervasive.

INDEPENDENT AUDITOR’S REPORT

[Appropriate Addressee]

Report on the Consolidated Financial Statements

We have audited the accompanying consolidated financial statements of ABC Company and its subsidiaries, which comprise the consolidated balance sheet as at December 31, 20X5, and the consolidated income statement, statement of changes in equity and cash flow statement for the year then ended, and a summary of significant accounting policies and other explanatory notes.

Management’s Responsibility for the Consolidated Financial Statements

Management is responsible for the preparation and the fair presentation of these consolidated financial statements in accordance with International Financial Reporting Standards. This responsibility includes: designing, implementing and maintaining internal control relevant to the preparation and fair presentation of consolidated financial statements that are free from material misstatement, whether due to fraud or error; selecting and applying appropriate accounting policies; and making accounting estimates that are reasonable in the circumstances.

Auditor’s Responsibility

Our responsibility is to express an opinion on these consolidated financial statements based on our audit. Except for the matter described in the Basis for Qualified Opinion paragraph, we conducted our audit in accordance with International Standards on Auditing. Those standards require that we comply with
ethical requirements and plan and perform the audit to obtain reasonable assurance whether the consolidated financial statements are free from material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the consolidated financial statements. The procedures selected depend on the auditor’s judgment, including the assessment of the risks of material misstatement of the consolidated financial statements, whether due to fraud or error. In making those risk assessments, the auditor considers internal control relevant to the entity’s preparation and fair presentation of the consolidated financial statements in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the entity’s internal control. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of accounting estimates made by management, as well as evaluating the overall presentation of the consolidated financial statements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

Basis for Qualified Opinion

ABC Company’s investment in XYZ Company, a foreign associate accounted for by the equity method, is recognized at $15 million in the balance sheet as at December 31, 20X1, and ABC Company’s share of profit of XYZ Company is recognized at $1 million in the income statement for the year ended December 31, 20X5. Although ABC Company provided us with XYZ Company’s audited financial statements for the year ended December 31, 20X5, we were unable to obtain the access to the accounting records, management, or auditor of XYZ Company necessary for us to obtain sufficient appropriate audit evidence in relation to the financial information of XYZ Company.

---

In circumstances where the auditor also has responsibility to express an opinion on the effectiveness of internal control in conjunction with the audit of the consolidated financial statements, this sentence would be worded as follows: “In making those risk assessments, the auditor considers internal control relevant to the entity’s preparation and fair presentation of the consolidated financial statements in order to design audit procedures that are appropriate in the circumstances.”
Qualified Opinion

In our opinion, except for the possible effect of the matter described in the Basis for Qualified Opinion paragraph, the consolidated financial statements give a true and fair view of (or “present fairly, in all material respects”) the financial position of ABC Company and its subsidiaries as of December 31, 20X5, and of their financial performance and cash flows for the year then ended in accordance with International Financial Reporting Standards.

Report on Other Legal and Regulatory Requirements

[Form and content of this section of the auditor’s report will vary depending on the nature of the auditor’s other reporting responsibilities.]

[Auditor’s signature]

[Date of the auditor’s report]

[Auditor’s address]
Appendix 2

Matters About Which the Group Auditor Obtains an Understanding
(Paragraph A16)

Group-wide Controls
1. Group-wide controls may include a combination of the following:
   - Regular meetings between group and component management to discuss business developments and to review performance.
   - Monitoring of components’ operations and their results, including regular reporting routines, which enables group management to monitor components’ performance against budgets, and to take appropriate action.
   - Group management’s risk assessment process, i.e., the process for identifying, analyzing and managing business risks, including the risk of fraud, that may result in material misstatement of the group financial statements.
   - Monitoring, controlling, reconciling, and eliminating intra-group transactions and unrealized profits, and intra-group account balances at the group level.
   - A process for monitoring the timeliness and assessing the accuracy and completeness of financial information received from components.
   - A central IT system controlled by the same general IT controls for all or part of the group.
   - Control activities within an IT system that is common for all or some components.
   - Monitoring of controls, including activities of internal audit and self-assessment programs.
   - Consistent policies and procedures, including a group financial reporting procedures manual.
   - Group-wide programs, such as codes of conduct and fraud prevention programs.
   - Arrangements for assigning authority and responsibility to component management.
2. Internal audit may be regarded as part of group-wide controls, for example, when the internal audit function is centralized. ISA 620, “Using the Work of Internal Audit” deals with the group auditor’s evaluation of the competence and objectivity of the internal auditors where the group auditor plans to use their work.

Consolidation Process
3. The group auditor’s understanding of the consolidation process may include matters such as the following:

   Matters relating to the applicable financial reporting framework:
• The extent to which component management has an understanding of the applicable financial reporting framework.

• The process for identifying and accounting for components in accordance with the applicable financial reporting framework.

• The process for identifying reportable segments for segment reporting in accordance with the applicable financial reporting framework.

• The process for identifying related party relationships and related party transactions for reporting in accordance with the applicable financial reporting framework.

• The accounting policies applied to the group financial statements, changes from those of the previous financial year, and changes resulting from new or revised standards under the applicable financial reporting framework.

• The procedures for dealing with components with financial year-ends different from the group’s.

Matters relating to the consolidation process:

• Group management’s process for obtaining an understanding of the accounting policies used by components, and, where applicable, ensuring that uniform accounting policies are used to prepare the financial information of the components for the group financial statements, and that differences in accounting policies are identified, and adjusted (where required in terms of the applicable financial reporting framework). Uniform accounting policies are the specific principles, bases, conventions, rules, and practices adopted by the group, based on the applicable financial reporting framework, that the components use to report similar transactions consistently. These policies are ordinarily described in the financial reporting procedures manual and reporting package issued by group management.

• Group management’s process for ensuring complete, accurate and timely financial reporting by the components for the consolidation.

• The process for translating the financial information of foreign components into the currency of the group financial statements.

• How IT is organized for the consolidation, including the manual and automated stages of the process, and the manual and programmed controls in place at the various stages of the consolidation process.

• Group management’s process for obtaining information on subsequent events.

Matters relating to consolidation adjustments:

• The process for recording consolidation adjustments, including the preparation, authorization and processing of related journal entries, and the experience of personnel responsible for the consolidation.

• The consolidation adjustments required by the applicable financial reporting framework.
• Business rationale for the events and transactions that gave rise to the consolidation adjustments.
• Frequency, nature and size of transactions between components.
• Procedures for monitoring, controlling, reconciling, and eliminating intra-group transactions and unrealized profits, and intra-group account balances.
• Steps taken to arrive at the fair value of acquired assets and liabilities, procedures for amortizing goodwill (where applicable), and impairment testing of goodwill, in accordance with the applicable financial reporting framework.
• Arrangements with a majority owner or minority interests regarding losses incurred by a component (for example, an obligation of the minority interest to make good such losses).
Appendix 3

Examples of Conditions or Events that may Indicate Risks of Material Misstatement of the Group Financial Statements (Paragraph A24)

- A complex group structure, especially where there are frequent acquisitions, disposals, or reorganizations.
- Poor corporate governance structures, including decision-making processes, that are not transparent.
- Non-existent or ineffective group-wide controls, including inadequate group management information on monitoring of components’ operations and their results.
- Components operating in foreign jurisdictions that may be exposed to factors such as unusual government intervention in areas such as trade and fiscal policy, and restrictions on currency and dividend movements; and fluctuations in exchange rates.
- Business activities of components that involve high risk, such as long-term contracts or trading in innovative or complex financial instruments.
- Uncertainties regarding which components require incorporation in the group financial statements in accordance with the applicable financial reporting framework, for example whether any special purpose entities or non-trading entities exist and require incorporation.
- Related party relationships and transactions.
- Prior occurrences of intra-group account balances that did not balance or reconcile on consolidation.
- The existence of complex transactions that are accounted for in more than one component.
- Components’ application of accounting policies that differ from those applied in the group financial statements.
- Components with different financial year-ends, which may be utilized to manipulate the timing of transactions.
- Prior occurrences of unauthorized or incomplete consolidation adjustments.
- Aggressive tax planning within the group or large cash transactions with entities in tax havens.
- Frequent changes of auditors engaged to audit the financial statements of components.
Determining the Work to be Performed on the Financial Information of Components (Paragraph A26)

**Significance of Component**
- Has the component been identified at the group level as likely to include significant risks of material misstatement of the group financial statements?
  - Yes
  - No

  **Type of Work Ordinarily Performed**
  - Audit of the component’s financial information;* or
  - Audit of specified account balances relating to the identified significant risks; or
  - Specified audit procedures relating to the identified significant risks

- Is the component significant due to its individual financial significance to the group?
  - Yes
  - No

  **Type of Work Ordinarily Performed**
  - Audit of the component’s financial information*

- Is the component selected by the group auditor from the remaining components (i.e., from components that are not individually significant)?
  - Yes
  - No

  **Type of Work Ordinarily Performed**
  - Audit of the component’s financial information;* or
  - Audit of specified account balances; or
  - Specified audit procedures; or
  - Review of the component’s financial information

- Component not selected
  - Yes
  - No

  **Type of Work Ordinarily Performed**
  - Analytical procedures performed at the group level

*Performed using either a materiality level determined by the group auditor or a lower materiality level determined by the other auditor.
Example of Another Auditor’s Confirmations (Paragraphs A12)

The following letter is not intended to be a standard letter. Confirmations may vary from one auditor to another and from one period to the next.

Confirmations are ordinarily obtained before the work on the financial information of the component is commenced.

[Other Auditor Letterhead]

[To Group Auditor] [Date]

This letter is provided in connection with your audit of the group financial statements of [name of parent] for the year ended [date] for the purpose of expressing an opinion on whether the group financial statements give a true and fair view of (present fairly, in all material respects) the financial position of the group as of [date] and of its financial performance and cash flows for the year then ended in accordance with [indicate applicable financial reporting framework].

We acknowledge receipt of your instructions dated [date], requesting us to perform the specified work on the financial information of [name of component] for the year ended [date].

We confirm that:

1. We will be able to comply with the instructions. / We advise you that we will not be able to comply with the following instructions [specify instructions] for the following reasons [specify reasons].

2. The instructions are clear and that we understand them. / We would appreciate it if you could clarify the following instructions [specify instructions].

3. We will provide you with the necessary access to relevant audit documentation.

We acknowledge that:

1. The financial information of [name of component] will be included in the group financial statements of [name of parent].

2. You may consider it necessary to be involved in the work you have requested us to perform on the financial information of [name of component] for the year ended [date].

3. You intend to evaluate and, if considered appropriate, use our work for the audit of the group financial statements of [name of parent].

In connection with the work that we will perform on the financial information of [name of component], a [describe component, e.g. wholly-owned subsidiary, subsidiary, joint venture, associate company] of [name of parent], we confirm the following:

1. Our firm’s quality control system complies with ISQC 1, remedial action is taken promptly in relation to issues identified from the firm’s monitoring process, and there are no outstanding issues noted resulting from the firm’s monitoring process that are likely to affect significantly the work that we will perform in connection with this engagement.
2. We have an understanding of and will comply with [indicate relevant ethical requirements], sufficient to fulfill our responsibilities in the audit of the group financial statements. In particular, and with respect to [name of parent] and the other components in the group, we are independent within the meaning of [indicate relevant ethical requirements] and are in compliance with the applicable requirements of [refer to rules] promulgated by [name of regulatory agency].

3. We have an understanding of International Standards on Auditing and [indicate other national standards applicable to the audit of the group financial statements], sufficient to fulfill our responsibilities in the audit of the group financial statements and will conduct our work on the financial information of [name of component] for the year ended [date] in accordance therewith.

4. We have an understanding of [indicate applicable financial reporting framework or group financial reporting procedures manual], sufficient to fulfill our responsibilities in the audit of the group financial statements.

We will inform you of any changes in the above representations during the course of our work on the financial information of [name of component].

[Auditor’s signature]

[Date]

[Auditor’s address]
Additional Matters to be Included in the Group Auditor’s Letter of Instruction (Paragraph A30)

Matters relevant to the planning of the other auditor’s work

- The timetable for completing the audit.
- Dates of planned visits by group management and the group auditor, and dates of planned meetings with component management and the other auditor.
- A list of key contacts.
- The use to be made of the other auditor’s work, the work to be performed, and arrangements for the coordination of efforts at the initial stage of and during the audit, including the group auditor’s planned involvement in the work of the other auditor.
- Work to be performed on intra-group transactions and unrealized profits and intra-group account balances.
- Guidance on other statutory reporting responsibilities, for example reporting on group management’s assertion on the effectiveness of internal control.
- Where there is likely to be a time lag between completion of the work on the financial information of the components and the group auditor’s conclusion on the group financial statements, specific instructions for a subsequent events review.

Matters relevant to the conduct of the other auditor’s work

- The findings of the group auditor’s tests of control activities of a processing system that is common for all or some components, and tests of controls to be performed by the other auditor.
- The findings of internal audit, based on work performed on controls at or relevant to components.
- A request for timely communication of audit evidence obtained from performing work on the financial information of the components that contradicts the audit evidence on which the group auditor originally based the risk assessment performed at the group level.
- A request for written representation on component management’s compliance with the applicable financial reporting framework, or a statement that differences between the accounting policies applied to the financial information of the component and those applied to the group financial statements have been disclosed.
- Matters to be documented by the other auditor.

Other information

- A request for a list of corrected and uncorrected misstatements of the financial information of the component, and identified indicators of possible management bias. The list does not
include uncorrected misstatements that are below the threshold set by the group auditor for clearly trivial misstatements.

- A request that the following are reported to the group auditor in a timely basis:
  - Significant accounting, financial reporting and auditing matters, including accounting estimates and related judgments.
  - Matters relating to the going concern status of the component.
  - Matters relating to litigation and claims.
  - Material weaknesses in controls that have come to the attention of the other auditor during the performance of the work on the financial information of the component, and information that indicates that a fraud may exist.

- A request that the group auditor be notified of any significant or unusual events as early as possible.
