Proposed Changes to ISA 200, “Objective and General Principles Governing an Audit of Financial Statements” (MARK-UP)

**Note:** Shaded text reflects text moved from elsewhere. New text or proposed amendments to existing text are shown in mark-up.

**Introduction**

1. The purpose of this International Standard on Auditing (ISA) is to establish standards and provide guidance on the objective and general principles governing an audit of financial statements. It also describes management’s responsibility for the preparation and presentation of preparing and presenting the financial statements and for identifying the financial reporting framework to be used in preparing and presenting the financial statements, referred to in the ISAs as the “applicable financial reporting framework.”

1a. The term “financial statements” refers to a structured representation of the financial information, which ordinarily includes accompanying notes, derived from accounting records and intended to communicate an entity’s economic resources or obligations at a point in time or the changes therein for a period of time in accordance with a financial reporting framework. For purposes of the ISAs, the term “financial statements” can refer to a complete set of financial statements, but it can also refer to a single financial statement, for example, a balance sheet, or a statement of revenues and expenses, and related explanatory notes. Examples of a single financial statement are listed in Appendix 1 to this ISA. [From extant ISA 200.34]

1b. The requirements of the applicable financial reporting framework determine the form and content of the financial statements and what constitutes a complete set of financial statements. For certain financial reporting frameworks, a single financial statement such as a cash flow statement and the related explanatory notes constitutes a complete set of financial statements. For example, the International Public Sector Accounting Standard (IPSAS), “Financial Reporting Under the Cash Basis of Accounting” states that the primary financial statement is a statement of cash receipts and payments when a public sector entity prepares and presents its financial statements in accordance with that IPSAS. Financial statements prepared by reference to International Financial Reporting Standards (IFRSs), on the other hand, are intended to provide information about the financial position, financial performance and cash flows of an entity. A complete set of financial statements under IFRSs includes a balance sheet; an income statement; a statement of changes in equity; a cash flow statement; and notes, comprising a summary of significant accounting policies and other explanatory notes. [From extant ISA 200.35]

1c. An audit of other historical financial information is an assurance engagement, as defined in the International Framework for Assurance Engagements (the Framework). The ISAs apply the Framework are written in the context of an audit of financial statements. The ISAs apply to audits of both general purpose and special purpose financial statements. Pursuant to ISA 200, paragraph 34, the term “financial statements” refers to a complete set of financial statements or a single financial statement. ISA 701, An auditor may, however,
also establishes standards and provides guidance for auditors’ reports on be engaged to audit one or more specific elements, accounts or items of a financial statement. See paragraphs 51i-51l.) [From extant ED-ISA 701.6]

Objective of an Audit of Financial Statements

2. The objective of an audit of financial statements is to enable the auditor to express an opinion whether the financial statements are prepared, in all material respects, in accordance with an applicable financial reporting framework. The wording the auditor uses to express the opinion (i.e., the form of opinion) depends on the applicable financial reporting framework and, when applicable, legislative and regulatory requirements governing the auditor’s report (see paragraphs 51a-51c).

3. An audit of financial statements is an assurance engagement, as defined in the International Framework for Assurance Engagements. The Framework defines and describes the elements and objectives of an assurance engagement. The ISAs apply the Framework in the context of an audit of financial statements and contain the basic principles and essential procedures, together with related guidance, to be applied in such an audit. Paragraphs 3433-3536 in this ISA discuss the meaning of the term “financial statements” and management’s responsibility for such statements. [Part of text of this paragraph moved to 36a]

Ethical Requirements Relating to an Audit of Financial Statements

[No changes are proposed to paragraphs 4-5. As a result, they have not been reproduced here.]

Conduct of an Audit of Financial Statements

[No changes are proposed to paragraphs 6-9. As a result, they have not been reproduced here.]

Scope of an Audit of Financial Statements

[No changes are proposed to paragraphs 10-14. As a result, they have not been reproduced here.]

Professional Skepticism

[No changes are proposed to paragraphs 15-16. As a result, they have not been reproduced here.]

Reasonable Assurance

[No changes are proposed to paragraphs 17-21. As a result, they have not been reproduced here.]

Audit Risk and Materiality

[No changes are proposed to paragraphs 22-32. As a result, they have not been reproduced here.]

Responsibility for the Financial Statements

33. While the auditor is responsible for forming and expressing an opinion on the financial statements, the responsibility for the preparation and presentation of preparing and...
presenting the financial statements in accordance with the applicable financial reporting framework is that of the management\(^1\) of the entity, with oversight from those charged with governance.\(^2\) The audit of the financial statements does not relieve management or those charged with governance of their responsibilities.

34. [Moved to ISA 200.1a]

35. [Moved to ISA 200.1b]

36. Management is responsible for identifying the financial reporting framework to be used in the preparation and presentation of preparing and presenting the financial statements. Management is also responsible for preparing and presenting the financial statements in accordance with that applicable financial reporting framework. This responsibility includes:

- Designing, implementing and maintaining internal control relevant to the preparation and presentation of preparing and presenting financial statements that are free from material misstatement, whether due to fraud or error;
- Selecting and applying appropriate accounting policies; and
- Making accounting estimates that are reasonable in the circumstances.

Determining the Acceptability of the Applicable Financial Reporting Framework\(^3\)

36a. As discussed in the Framework, a condition for acceptance of an assurance engagement is that the criteria referred to in the definition of an assurance engagement are “suitable criteria” and available to intended users (see paragraph 48i). Criteria are the benchmarks used to evaluate or measure the subject matter including, where relevant, benchmarks for presentation and disclosure. Suitable criteria are required for reasonably consistent evaluation or measurement of a subject matter within the context of professional judgment. Paragraphs 37-48 in this ISA discuss suitable criteria and their availability to intended users for an audit of financial statements through the auditor’s consideration of the acceptability of the financial reporting framework.\(^4\) [From extant ISA 200.3]

36b. For purposes of these ISAs, the applicable financial reporting framework provides the criteria the auditor uses to evaluate or measure the preparation and presentation of the financial statements. The applicable financial reporting framework may also encompass financial reporting standards established by an authorized or recognized standards setting organization, legislative and regulatory requirements or, in the case of special purpose financial statements, financial reporting provisions established by a regulator or by a

---

\(^1\) The term “management” has been used in this ISA to describe those responsible for the preparation and presentation of preparing and presenting the financial statements. Other terms may be appropriate depending on the legal framework in the particular jurisdiction.

\(^2\) The structures of governance vary from country to country, reflecting cultural and legal backgrounds. Therefore, the respective responsibilities of management and those charged with governance vary depending on the legal responsibilities in the particular jurisdiction.

\(^3\) Implementation of paragraphs 37-48 has been deferred until such time as proposed ISA 701, “The Independent Auditor’s Report on Other Historical Financial Information” becomes effective (a date yet to be determined).

\(^4\) Implementation of the final sentence of paragraph 3 has been deferred until such time as proposed ISA 701, “The Independent Auditor’s Report on Other Historical Financial Information” becomes effective (a date yet to be determined).
contract, including significant interpretations made by the responsible party in preparing and presenting the financial information. (An interpretation is significant if another reasonable interpretation would have produced a material difference in the other historical financial information.) [From ED-ISA 701.10]

36c. The applicable financial reporting framework may also encompass other sources, which provide direction on the application of the sources described in paragraph 36b, such as the following:

- The effect of the legal and ethical environment, including statutes, regulations, court decisions, and professional ethical obligations in relation to accounting matters;
- Published accounting interpretations of varying authority issued by standards setting, professional or regulatory organizations;
- Published views of varying authority on emerging accounting issues and accounting interpretations issued by standards setting, professional or regulatory organizations;
- General and industry practices widely recognized and prevalent; and
- Accounting literature; and [From ED-ISA 701.10]

36d. The auditor identifies the different sources encompassed in the applicable financial reporting framework, and considers their relative authority. Where conflicts exist, the source with the highest authority prevails.

37. The auditor should determine whether the applicable financial reporting framework adopted by management in preparing the financial statements is acceptable. The auditor ordinarily makes this determination when considering whether to accept the audit engagement, as discussed in ISA 210, “Terms of Audit Engagements.” An acceptable financial reporting framework is referred to in the ISAs as the “applicable financial reporting framework.”

38. Factors that may affect the auditor’s determination whether of the acceptability of the applicable financial reporting framework adopted by management is acceptable in view of include:

- The nature of the entity (for example, whether it is a business enterprise, a public sector entity or a not for profit organization); and
- The objective of the financial statements (for example, whether they are prepared and presented in accordance with a financial reporting framework designed to meet the financial information needs of specific users or a financial reporting framework designed to meet the common financial information needs of a wide range of users);
- The nature of the financial statements (for example, whether the financial statements are a complete set of financial statements or a single financial statement); and
- Whether applicable legislative and regulatory requirements prescribe the applicable financial reporting framework.

38a. When the auditor concludes that the applicable financial reporting framework adopted by management is not acceptable, the auditor considers the implications in relation to
Financial Statements Designed to Meet the Financial Information Needs of Specific Users

39. [Moved to ISA 200.48a-b]

Financial Statements Reporting Frameworks Designed to Meet the Common Financial Information Needs of a Wide Range of Users

40. Many users of financial statements are not in a position to demand financial statements tailored to meet their specific information needs. While all the information needs of specific users cannot be met, there are financial information needs that are common to a wide range of users. Financial statements prepared and presented in accordance with a financial reporting framework—both that is designed to meet the common financial information needs of a wide range of users are referred to as “general purpose financial statements.” unless they have been prepared to meet the financial information needs of specific users. For purposes of the ISAs, financial statements prepared to meet the financial information needs of specific users are considered to be special purpose financial statements, even though they may have been prepared and presented in accordance with a financial reporting framework designed to meet the common financial information needs of a wide range of users (see paragraph 48c).

Financial Reporting Frameworks Standards Established by Authorized or Recognized Standards Setting Organizations

41. At present, there is no objective and authoritative basis that has been generally recognized globally for judging the acceptability of financial reporting frameworks that have been designed for general purpose financial statements to meet the common financial information needs of a wide range of users. Until such a basis exists, financial reporting frameworks standards established by organizations that are authorized or recognized to promulgate standards to be used by certain types of entities are presumed to be acceptable for general purpose financial statements prepared and presented by such entities provided the organizations follow an established and transparent process involving deliberation and consideration of the views of a wide range of stakeholders. Examples of such financial reporting frameworks standards include:

- IFRSs promulgated by the International Accounting Standards Board;
- IPSASs promulgated by the International Federation of Accountants – International Public Sector Accounting Standards Board; and
- Generally accepted accounting principles promulgated by an authorized or recognized standards setter setting organization in a particular jurisdiction.

These financial reporting frameworks standards are often identified as the applicable financial reporting framework in legislative and regulatory requirements governing the preparation and presentation of general purpose financial statements. Refer to ISA 800 for financial reporting frameworks designed to meet the particular needs of a government regulatory agency.
Financial Reporting Frameworks Supplemented with Legislative and Regulatory Requirements

41a. In some jurisdictions, the financial reporting framework comprises primarily legislative and regulatory requirements for preparing and presenting general purpose financial statements. ISA 210 recognizes that deficiencies may exist in such frameworks and explains the effect that these may have on the auditor’s decision to accept the engagement and on the auditor’s report.

42. In some jurisdictions, legislative and regulatory requirements may supplement a financial reporting framework adopted by management with financial reporting standards established by an authorized or recognized standards setting organization with additional requirements relating to the preparation and presentation of preparing and presenting financial statements. In these jurisdictions, the applicable financial reporting framework, for the purposes of applying the ISAs, encompasses both the identified financial reporting framework and such additional requirements, provided they do not conflict with the applicable financial reporting framework. This may, for example, be the case when additional legislative and regulatory requirements prescribe disclosures in addition to those required by the identified financial reporting framework standards or when they narrow the range of acceptable choices that can be made within the identified financial reporting framework standards. If the additional requirements conflict with the applicable financial reporting framework standards, the auditor discusses the nature of the requirements with management and whether (a) the additional requirements can be met through additional disclosures, or (b) the description of the applicable financial reporting framework in the financial statements can be amended accordingly (see paragraph 48i). If this is not possible, the auditor considers whether it is necessary to modify the auditor’s report, see [proposed] ISA 701, “Modifications to the Opinion in the Independent Auditor’s Report,” and ISA 706, “Emphasis of Matter Paragraphs and Other Matters Paragraphs in the Independent Auditor’s Report.”

Jurisdictions that Do Not have an Authorized or Recognized Standards Setting Organization

43. When an entity is registered or operating in a jurisdiction that does not have an authorized or recognized standards setting organization or a financial reporting framework established by law or regulation, the entity management identifies an applicable financial reporting framework. Practice in such jurisdictions is often to use the financial reporting framework standards established by one of the organizations described in paragraph 41. Alternatively, there may be established accounting conventions in a particular jurisdiction that are generally recognized as the applicable financial reporting framework for the general purpose financial statements prepared by certain specified entities operating in that jurisdiction. When such a financial reporting framework is adopted by the entity management, the auditor determines whether the accounting conventions collectively can be considered to constitute an acceptable financial reporting framework for general purpose financial statements. When the accounting conventions are widely used in a particular jurisdiction, the accounting profession in that jurisdiction may have considered the acceptability of the financial reporting framework on behalf of the auditors. Alternatively, the auditor makes this determination by considering whether the accounting conventions exhibit attributes normally exhibited by acceptable financial
reporting frameworks (see paragraph 44), or by comparing the accounting conventions to the requirements of an existing financial reporting framework considered to be acceptable (see paragraph 44a).

44. Acceptable financial reporting frameworks—

for general purpose financial statements—

normally exhibit the following attributes that result in information provided in financial statements that is useful to the intended users:

(a) Relevance, in that the information provided in the financial statements is relevant to the nature of the entity and the objective of the financial statements. (For example, in the case of a business enterprise that prepares general purpose financial statements, relevance is assessed in terms of the information necessary to meet the common financial information needs of a wide range of users in making economic decisions. These needs are ordinarily met by presenting fairly the financial position, financial performance and cash flows of the business enterprise.)

(b) Completeness, in that transactions and events, account balances and disclosures that could affect the fair presentation of conclusions based on the financial statements are not omitted.

(c) Reliability, in that the information provided in the financial statements:

   • Where applicable, reflects the economic substance of events and transactions and not merely their legal form; and
   • Results in reasonably consistent evaluation, measurement, presentation and disclosure, when used in similar circumstances.

(d) Neutrality, in that it contributes to information in the financial statements that is free from bias; and

(e) Understandability, in that the information in the financial statements is clear and comprehensive and not subject to significantly different interpretation.

44a. The auditor may decide to compare the accounting conventions to the requirements of an existing financial reporting framework considered to be acceptable, such as, for example, the auditor may compare the accounting conventions to IFRS promulgated by the International Accounting Standards Board. For an audit of a small entity, the auditor may decide to compare such the accounting conventions to a financial reporting framework specifically developed for such entities by an authorized or recognized standards setting organization. When the auditor makes such a comparison and differences are identified, the decision as to whether the accounting conventions adopted by management in preparing and presenting the financial statements constitute an acceptable financial reporting framework includes consideration of the reasons for the differences and whether application of the accounting conventions, or the description of the financial reporting framework in the financial statements (see paragraph 48i), could result in financial statements that are misleading. [From extant ISA 200.47]
45. A conglomeration of accounting conventions devised to suit individual preferences is not an acceptable financial reporting framework for general purpose financial statements intended to address the common information needs of a wide range of users.

46. [Moved to ISA 200.48i]

47. [Moved to ISA 200.44a]

48. [Moved to ISA 200.38a]

### Financial Statements Reporting Frameworks Designed to Meet the Financial Information Needs of Specific Users

48a. In some cases, the objective of the financial statements will be prepared and presented in accordance with a financial reporting framework designed to meet the financial information needs of specific users. Such financial statements are referred to as “special purpose financial statements.” The financial information needs of such the intended users will determine the applicable financial reporting framework in these circumstances. Examples of financial reporting frameworks that address designed to meet the financial information needs of specific users are:

- A tax basis of accounting for a set of financial statements that accompany an entity’s tax return;
- The cash receipts and disbursements basis of accounting for cash flow information that an entity may be requested to prepare for creditors;
- The financial reporting provisions of a government regulatory agency for a set of financial statements established by a regulator to meet the information needs requirements of that agency regulator; or
- The financial reporting framework established by the provisions of an agreement a contract specifying the financial statements to be prepared, such as a bond indenture or a loan agreement. [Moved from extant ISA 200.39]

48b. Financial statements prepared and presented in accordance with such a financial reporting frameworks designed to meet the financial information needs of specific users may be the only financial statements prepared by an entity and, in such circumstances, are often used by users in addition to those for whom the financial reporting framework is designed. Despite the broad distribution of the financial statements in those circumstances, the financial statements are still considered to be designed to meet the financial information needs of specific users special purpose financial statements for purposes of the ISAs. ISA 800, “The Independent Auditor’s Report on Special Purpose Audit Engagements” establishes standards and provides guidance on financial statements whose objective is to meet the financial information needs of specific users. Although specific users may not be identified, financial statements that are prepared in accordance with a framework that is not designed to achieve fair presentation are also addressed in ISA 800. [Moved from extant ISA 200.39]

48c. In some circumstances a financial reporting framework designed to meet the common financial information needs of a wide range of users may be adopted by management to
prepare and present special purpose financial statements. For example, the financial reporting provisions of a contract may require an entity to prepare and present financial statements, which are not otherwise subject to audit, in accordance with IFRSs. Since such financial statements have been prepared to meet the financial information needs of specific users they are considered to be special purpose financial statements for purposes of the ISAs.

48d. Where the applicable financial reporting framework encompasses the financial reporting standards established by an organization that is authorized or recognized to promulgate standards for special purpose financial statements, those standards will be presumed to be acceptable for that purpose, provided the organization follows an established and transparent process involving deliberation and consideration of the views of relevant stakeholders. The financial reporting provisions established by a regulator to meet the requirements of that regulator are also presumed to be acceptable for special purpose financial statements.

48e. Where the applicable financial reporting framework comprises primarily legislative and regulatory requirements, reference is made to ISA 210. ISA 210 recognizes that deficiencies may exist in such frameworks and explains the effect that these may have on the auditor’s decision to accept the engagement and on the auditor’s report.

48f. Where the financial reporting standards referred to in paragraph 48d are supplemented by legislative and regulatory requirements, the auditor determines whether any conflicts between the financial reporting standards and the additional requirements exist. If such conflicts exist, the auditor follows the procedures in paragraph 42.

48g. Where the applicable financial reporting framework encompasses the financial reporting provisions of a contract; or sources other than, or in addition to, the financial reporting standards referred to in paragraph 48d and legislative and regulatory requirements referred to in paragraphs 48e and 48f, the auditor determines whether the financial reporting framework is acceptable in the circumstances by considering whether it exhibits attributes normally exhibited by acceptable financial reporting frameworks (see paragraph 44). In the case of a financial reporting framework designed to meet the financial information needs of specific users, the relative importance of each of these characteristics to a particular engagement is a matter of professional judgment, and depends on the nature of the entity and its environment, the nature and objective of the other historical financial information, the information needs of the intended users, and other matters, for example, events, transactions, conditions and practices that may have a significant effect on the engagement. For example, for the purposes of a balance sheet prepared to establish the value of net assets of an entity at the date of its sale, the vendor and the purchaser may have agreed that very prudent estimates of allowances for uncollectible accounts receivable are to be made. This may result in preparing financial information that is not neutral (see paragraph 36(d) of the Framework), but it may nevertheless be acceptable in the circumstances. [From ED-ISA 701.11]

48h. There is a presumption that partial compliance with the requirements of an established financial reporting framework does not constitute an acceptable financial reporting
framework. However, there may be circumstances where the nature of the entity and its environment, the nature and objective of the other historical financial information, or the information needs of the intended users may justify partial compliance with the requirements of an established financial reporting framework. A financial reporting framework designed to meet the financial information needs of specific users is based on, but does not comply with all the requirements of an established financial reporting framework. For example, a contract that requires financial statements to be prepared in accordance with most, but not all, of the Financial Reporting Standards of Country X. When this is the case, the auditor determines whether the applicable financial reporting framework is acceptable in the circumstances of the engagement by considering whether it exhibits attributes normally exhibited by acceptable financial reporting frameworks (see paragraph 44). When this is the case, the other historical financial information for preparation of the financial statements (see paragraph 48i) does not imply full compliance with the requirements of the established financial reporting framework. For example, in the case of a contract, the description of the applicable financial reporting framework may refer to the financial reporting provisions of the contract. [From ED-ISA 701.12]

**Description of the Financial Reporting Framework in the Financial Statements**

48i. Criteria need to be available to the intended users to allow them to understand how the subject matter has been evaluated and measured. To enable readers, the intended users, to understand the applicable financial reporting framework adopted by the responsible party for preparing and presenting the other historical financial information, it is necessary to refer to or describe the applicable financial reporting framework adequately in the other historical financial information financial statements. The description of the financial reporting framework in the financial statements includes information about the basis of preparation of the financial statements and the accounting policies selected and applied for significant transactions and other significant events. If management the financial statements does not adequately refer to, or describe, the applicable financial reporting framework, the auditor should consider the effect on the auditor’s report whether to modify the audit opinion in the auditor’s report in accordance with ISA 705. [From extant ISA 200.46 and ED-ISA 701.13]

**Expressing an Opinion on the Financial Statements**

49. When the auditor is expressing an opinion on a complete set of general purpose financial statements prepared in accordance with a financial reporting framework that is designed to achieve fair presentation, the auditor refers to ISA 700 (Revised), “The Independent Auditor’s Report on a Complete Set of General Purpose Financial Statements,” for standards and guidance on the matters the auditor considers in forming an opinion on such financial statements and on the form and content of the auditor’s report. The auditor also refers to ISA 701 when expressing a modified audit opinion, including an emphasis of matter, a qualified opinion, a disclaimer of opinion or an adverse opinion.

50. The auditor refers to ISA 800 when expressing an opinion on:
(a) A complete set of financial statements prepared in accordance with an other 
comprehensive basis of accounting;

(b) A component of a complete set of general-purpose or special-purpose financial 
statements, such as a single financial statement, specified accounts, elements of 
accounts, or items in a financial statement;

(c) Compliance with contractual agreements; and

(d) Summarized financial statements.

51. In addition to addressing reporting considerations, ISA 800 also addresses other matters 
the auditor considers in such engagements related to, for example, engagement acceptance 
and the conduct of the audit.

Form of Opinion

51a. The form of opinion depends on whether the applicable financial reporting framework is a 
fair presentation framework. A fair presentation financial reporting framework is a 
framework that:

(a) Provides a context for the evaluation of the fair presentation of the financial 
statements;5 and

(b) Acknowledges explicitly or implicitly that, to achieve fair presentation of the 
financial statements, it may be necessary for management to provide disclosures 
beyond the specific requirements of the framework; or

(c) Acknowledges explicitly that, in extremely rare circumstances, it may be necessary 
for management to depart from the specific requirements of the framework to achieve 
fair presentation of the financial statements.

51b. Unless required by law or regulation to use different wording, the auditor’s opinion on a 
complete set of general purpose financial statements prepared and presented in 
accordance with a fair presentation financial reporting framework that is designed to 
achieve fair presentation (for purposes of this ISA referred to as “financial statements”) 
states whether the financial statements:

• “give a true and fair view of” or “are presented fairly, in all material respects,” the 
information conveyed in the financial statements in accordance with the applicable 
financial reporting framework, or

• “are presented fairly, in all material respects,” in accordance with the applicable 
financial reporting framework.

These above phrases “give a true and fair view of” and “are presented fairly, in all material 
respects,” are equivalent for purposes of the ISAs. Which of these phrases is used in any

---

5 Although the framework may not specify how to account for or disclose all transactions or events, it ordinarily embodies sufficient broad principles that can serve as a basis for developing and applying accounting policies that are consistent with the concepts underlying the requirements of the framework. Thus, the framework provides a context for the auditor’s evaluation of the fair presentation of the financial statements, including whether the financial statements have been prepared and presented in accordance with the specific requirements of the framework for particular classes of transactions, account balances and disclosures.

7 For example, in the case of financial statements prepared and presented in accordance with IFRSs, the entity’s financial position, financial performance and cash flows.
particular jurisdiction is determined by the law or regulations governing the audit of financial statements in that jurisdiction, or by established practice in that jurisdiction. Where law or regulation requires the use of different wording, the auditor’s responsibility to evaluate the fair presentation of financial statements prepared and presented in accordance with a fair presentation framework is the same (see paragraph 51g). [From ISA 700R.6 and ED-ISA 701.14-15]

51c. In all other cases, the auditor’s opinion states whether the financial statements “have been prepared, in all material respects,” in accordance with the applicable financial reporting framework.

Forming an Opinion on the Financial Statements

51d. The auditor should evaluate the conclusions drawn from the audit evidence obtained as the basis for forming an opinion on the financial statements. [From ISA 700R.11 and ED-ISA 701.20]

51e. When forming an opinion on the financial statements, the auditor evaluates whether, based on the audit evidence obtained, there is reasonable assurance about whether the financial statements taken as a whole are free from material misstatement. This involves concluding whether sufficient appropriate audit evidence has been obtained to reduce to an acceptably low level the risks of material misstatement of the financial statements and evaluating the effects of uncorrected misstatements identified. [From ISA 700R.12 and ED-ISA 701.21]

51f. Forming an opinion as to whether the financial statements give a true and fair view or are presented fairly, in all material respects, in accordance with the applicable financial reporting framework involves evaluating—The auditor evaluates whether the financial statements have been prepared and presented in accordance with the specific requirements of the applicable financial reporting framework for particular classes of transactions, account balances and disclosures. This evaluation includes considering whether, in the context view of the specific requirements of the applicable financial reporting framework:

(a1) The terminology used in the other historical financial information financial statements, including its titles, is appropriate; [From ED-ISA 701.22(a)]

(a) The accounting policies selected and applied are consistent with the financial reporting framework and are appropriate in the circumstances; [From ISA 700R.13(a)]

(b) The accounting estimates, if any, made by management are reasonable in the circumstances; [From ISA 700R.13(b)]

(c) The information presented in the financial statements, including accounting policies, is relevant, reliable, comparable and understandable; and [From ISA 700R.13(c)]

(c1) The other historical financial information financial statements adequately refers to or describes the applicable financial reporting framework; [From ED-ISA 701.22(f)]

---

8 See ISA 330, “The Auditor’s Procedures in Response to Assessed Risks.”
9 See ISA 320, “Audit Materiality.”
(c2) The other historical financial information financial statements adequately discloses the significant accounting policies selected and applied, and significant interpretations by the responsible party management of regulatory, legal, or contractual requirements. In jurisdictions where the applicable financial reporting framework is so codified as to preclude a choice of accounting policies or significant interpretations by the responsible party management, a reference to the applicable financial reporting framework may suffice; and [From ED-ISA 701.22(g)]

(d) The financial statements provide sufficient adequate disclosures to enable the intended users to understand the effect of material transactions and events on the information conveyed in the financial statements, for example, in the case of financial statements prepared and presented in accordance with International Financial Reporting Standards (IFRSs), the entity’s financial position, financial performance and cash flows. [From ISA 700R.13(d)]

51g. Forming an opinion as to whether the financial statements give a true and fair view or are presented fairly, in all material respects, in accordance with the applicable financial reporting framework (as described in paragraph 51b) also involves evaluating the fair presentation of the financial statements in the context provided by the applicable financial reporting framework. The auditor considers whether the financial statements, after any adjustments made by management as a result of the audit process, are consistent with the auditor’s understanding of the entity and its environment. The auditor considers the overall presentation, structure, and content of the financial statements. The auditor also considers whether the financial statements, including the note disclosures, faithfully represent the underlying transactions and events in a manner that gives a true and fair view of or presents fairly, in all material respects, the information conveyed in the financial statements in the context of the financial reporting framework. Analytical and other procedures performed at or near the end of the audit help to corroborate conclusions formed during the audit and assist in arriving at the overall conclusion as to the fair presentation of the financial statements. [From ISA 700R.14 and ED-ISA 701.23]

Extremely Rare Circumstances when Applying the Financial Reporting Framework Results in Misleading Financial Statements

51h. As discussed in ISA 210, the auditor considers the acceptability of the applicable financial reporting framework when considering accepting whether to accept the engagement. Application of a financial reporting framework determined to be acceptable for general purpose financial statements will ordinarily result in financial statements that achieve fair presentation. In extremely rare circumstances, however, application of a specific requirement in a framework that has been determined to be acceptable for general purpose financial statements may result in financial statements that are misleading in the particular circumstances of the entity. As explained in paragraph 51a, some financial reporting frameworks implicitly or explicitly acknowledge, implicitly or explicitly, that it may be necessary for

---

10 See footnote 4.
management to provide disclosures beyond the specific requirements of the framework, or there are explicitly acknowledge that in extremely rare circumstances it is may be necessary for the financial statements management to depart from a specific requirement in the framework, in order to achieve the objective of fair presentation of the financial statements and provide guidance on the disclosures required. Other financial reporting frameworks may not provide any guidance on these circumstances even though they are acceptable frameworks for general purpose financial statements. If the auditor encounters circumstances that lead the auditor to conclude that compliance with a specific requirement results in the financial statements that are misleading, the auditor considers the need to modify the auditor’s report. The modifications, if any, that are appropriate to the auditor’s report will depend on how management addresses the matter in the financial statements and how the financial reporting framework deals with these rare circumstances (see [proposed] ISA 701]. [From ISA 700R.14 and ED-ISA 701.23]

Audits of Specific Elements, Accounts or Items of a Financial Statement

51i. As noted in paragraph 1c, an auditor may be engaged to audit one or more specific elements, accounts or items of a financial statement. Examples of a specific element, account or item of a financial statement are listed in Appendix 1 to this ISA.

51j. ISA 200, paragraph 4, requires the auditor to comply with relevant ethical requirements relating to an audit engagement. ISA 200, paragraph 11, requires the auditor, in determining the audit procedures to be performed in conducting an audit in accordance with ISAs, to comply with each of the ISAs relevant to that audit. These requirements apply to an audit of a specific element, account or item of a financial statement. [From ED-ISA 701.7]

51k. If an audit of a specific element, account or item of a financial statement is conducted in conjunction with the audit of the financial statements of which it forms a part, this is unlikely to cause difficulty the auditor may be able to use audit evidence obtained as part of the audit of the financial statements in the audit of the specific element, account or item. It is important, however, that the auditor plans and performs the audit of the specific element, account or item to obtain sufficient appropriate audit evidence to reduce audit risk for that specific element, account or item to an acceptably low level. For example, the materiality level determined for the specific element, account or item may be lower than the materiality level or levels determined for the financial statements; this will affect the nature, timing and extent of the audit procedures. [From ED-ISA 701.7]

51l. If such an audit of a specific element, account or item of a financial statement, however, is carried out separately from the audit of the financial statements of which it forms a part, compliance with each of the ISAs relevant to the audit requires careful consideration and may not be practicable. The auditor ordinarily does not have the same understanding of the entity and its environment, including its internal control, as an auditor who also audits the financial statements of which the specific element, account or item forms a part. In this case, the auditor considers whether the auditor has sufficient understanding of the entity and its environment, including its internal control, to perform
an audit of the specific element, account or item of a financial statement. In addition, many financial statement items are interrelated. Accordingly, when auditing a specific element, account or item of a financial statement, the auditor may not be able to consider the specific element, account or item in isolation. Consequently, the auditor may need to perform additional procedures to meet the objective of an audit. Where an audit in accordance with ISAs is not practicable, the auditor discusses with the responsible party, management, before accepting the engagement, whether another type of engagement may be more practicable. [From ED-ISA 701.7]

Effective Date
52. This ISA is effective for audits of financial statements for periods beginning on or after [date].

Public Sector Perspective
[No changes are proposed to the PSP. The PSP is also not necessary to provide context to the proposed changes. As a result, it has not been reproduced here.]
Examples of a Single Financial Statement and Examples of a Specific Element, Account or Item of a Financial Statement

Examples of a single financial statement include the following:

- Balance sheet and related explanatory notes.
- Statement of income or statement of operations and related explanatory notes.
- Statement of retained earnings and related explanatory notes.
- Statement of cash flows and related explanatory notes.
- Statement of changes in owners’ equity and related explanatory notes.
- Statement of assets and liabilities that does not include owners’ equity and related explanatory notes.
- Statement of revenue and expenses and related explanatory notes.
- Statement of operations by product lines and related explanatory notes.
- Statement of cash receipts and disbursements and related explanatory notes.

Examples of specific elements, accounts or items of a financial statement include the following:

- Accounts receivable, allowance for doubtful accounts receivable, inventory, the liability for accrued benefits of a private pension plan, the recorded value of identified intangible assets, or the liability for “incurred but not reported” claims in an insurance portfolio.
- A schedule of externally managed assets and income of a private pension plan.
- A schedule of net tangible assets.
- A schedule of disbursements in relation to a lease property.
- A schedule of profit participation or employee bonuses.
- A schedule of share price movements and of average share price.
