About ISCA and Singapore Accountancy Landscape

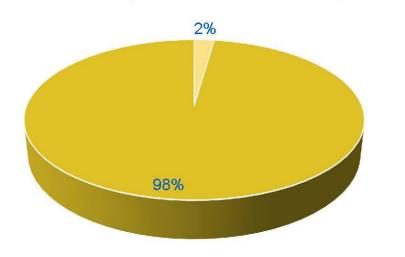

- Established in 1963
- 59 years of history
- National accountancy body of Singapore
- Full member of the globally recognized Chartered Accountants Worldwide
- Oversees professional and ethical standards for CA (Singapore) holders

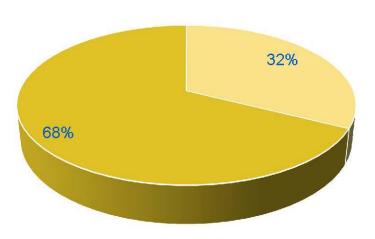

Public Accounting Firms

Audit listed companies • Audit non-listed companies

Public Accountants

Audit listed companies - Audit non-listed companies

ISCA's Role in SSQM (ISQM equivalent)

- Develop/ adopt high quality auditing and assurance standards which serve the public interest
- Educate and create awareness on new/revised standards and requirements
- Monitor implementation challenges
- Provide guidance to support implementation

Issue Standards	Create Awareness
 Singapore Standards on Quality Management (ISQMs equivalent) issued in Oct 2021 Same effective date of 15 December 2022 	 Focus group Outreach through ISCA flagship Conference for audit practitioners Articles in ISCA monthly Journal
Provide Guidance	Support Implementation
 ISCA Quality Management Toolkit Quality Management workshops Webinars Publications and Resources 	 ISCA Quality Assurance Review Programme

Create Awareness

Focus Group

- Held as part of our outreach activities during public consultation of new standards
- To understand readiness of firms, especially SMPs and possible implementation challenges

Outreach

Presentation/panel discussion on quality management at ISCA Practitioners Conference 2020 – Strategising for A Resilient Tomorrow and ISCA Practitioners Conference 2021 – At the Lead of Change

Articles

- New and Revised Standards for the Audit Profession – Enhancing Quality, Upholding Professionalism (May 2021)
- A Paradigm Shift To Quality Management (Aug 2021)

Provide Guidance

ISCA Quality Management Toolkit	Quality Management Workshops	Webinars	Publications and Resources
 Development of ISCA Quality Management Toolkit to support firms in the design of its system of quality management Toolkit comprises possible risks, suggested policies and procedures, implementation help tips, practical examples and forms 	 Discussion-based workshops rolled out to guide firms in the development of a customised quality management manual with the use of the toolkit 4 runs since Dec 2021 	 Upcoming webinars focusing on insights on implementation, help tips to overcome challenges, and sharing of experience from fellow practitioners 	 Feedback is being sought from practitioners, with the plan to publish an audit bulletin to address common FAQs on implementation challenges IFAC resources are also shared with practitioners and firms

Support Implementation

ISCA Quality Assurance Review Programme

This is a voluntary programme that aims to help participating firms raise the quality of their audit practices and audit engagements.

The programme provides recommendations on improvement areas and shares good practices.

Tailored firm trainings on the key findings from the reviews are also covered under the programme.

The Programme includes:

review of the firm's system of quality management for compliance with SSQMs

	_		
	_	-	
11			1
	n		
13	-	-	

review of firm's internal anti-money laundering and countering the financing of terrorism (AML/CFT) policies, procedures and controls for compliance with ISCA Ethics Pronouncement 200

review of signed-off engagement files for compliance with SSAs

All reviews are performed by ISCA QA Reviewers

Conclusion

Tips to Successful Implementation of SSQM/ISQM:

- Start early
- Read widely to understand the requirements of SSQM/ISQM
- Find out more about the support from your local professional body, as well as IFAC
- Form a taskforce to decide on a best tailored approach for your firm
- There is no BEST policy, it takes an ongoing process to enhance it along the way

THANK YOU!

ISQM adoption and implementation in Belgium

Adoption process of the draft national standard implementing ISQM 1, 2 & ISA 220 (Revised) in Belgium:

- Translation of the standards in Dutch and French : March 2022
- Public consultation until 30 June 2022
- Final approval by the High Council for the Economic Professions and the Minister: expected by the end of 2022

Scope of the standards :

Assurance engagements as defined by Belgian Law of 7 December 2016 on the organization of the profession and public supervision of registered auditors (audit, limited reviews + works council)

ISQM adoption and implementation in Belgium

Effective date in Belgium:

- Design of a quality management system in compliance with ISQM 1: by 15 December 2022
- Implementation and monitoring compliance with ISQM 1: by 15 December 2023
- Application of ISQM 2 and ISA 220 (Revised) standards: to all assurance engagements as defined by Belgian Law for periods beginning on or after 15 December 2023

Support activities for members

Communication

Development of a new tool : the ISQM Manager software

Specific training and workshops

Communication: dedicated page on ISQM (<u>www.ibr-ire.be</u>)

Publication of all the **relevant information** on the IBR-IRE website:

- 8 videos covering the main aspects of the new ISQM standards
- Opinions
- Articles

Op deze pagina bundelen we voor u onze meest recente informatie over ISQM, de internationale standaard voor kwaliteitsmanagement in de kantoren.

Video-opnames

De Werkgroep ISQM heeft video's voorbereid om een overzicht te geven van de belangrijkste onderdelen van ISQM1 en van ISQM2, om bedrijfsrevisoren te helpen bij de toepassing van deze normen. Voor ISA 220 wordt verwezen naar de gebruikelijke ISA-opleidingen van het ICCI. De video's behandelen volgende onderwerpen:

- ISQM1 Enkele inleidende begrippen
- ISQM 1 De 8 componenten (per component een video)

ISQM 2

Bij de toepassing van een op risico gebaseerde aanpak dient de bedrijfsrevisorenkantoor rekening te houden met de vereisten van de norm door deze af te stemmen op i) de organisatie van het *kantoor* en ii) de aard en omstandigheden van de door het kantoor *uitgevoerde opdrachten*.

Overeenkomstig het ontwerp van norm inzake de toepassing van de internationale standaarden voor kwaliteitsmanagement 1 en 2 (ISQM 1 en 2) en van ISA 220 (Herzien), moet het kwaliteitsmanagementsysteem tegen uiterlijk 15 december 2022 opgezet zijn; 2023 wordt dan het jaar van implementatie en monitoring.

New tool: the ISQM Manager Software

- Available in Dutch and French
- Enables firms to build their very own quality management system based on their own specificities, engagements and quality risks;
- Although it has primarily been designed to help smaller firms, it is based on templates and is highly adaptable to any type of firm (from a sole practitioner to a network);
- Provides firms with responses and clear actions to address quality risks and a monitoring system to ensure the quality of the system;
- Provides each user with a customized dashboard based on their responsibilities to make sure everyone knows exactly what to do;
- The first version of the software will be available and ready for use in autumn, and it will be optimized and updated based on users' feedback at a later stage.

Please note that the ISQM Manager software is **not meant to replace other auditing tools** but solely focused on quality management.

•BR RE

The ISQM Manager Software : Workflow

- 8 components
 - 40 quality objectives
 - 158 quality risks (probability & impact)
 - 382 responses (Policies, procedures, checklists, forms)
 - 375 actions (Reading a document, validating a document, signing and training ...) % of risk reduction
 - Deficiency
 - Actions based on the type of deficiency
 - Monitoring dashboard featuring the deficiencies and the remedial actions to respond to the identified deficiencies

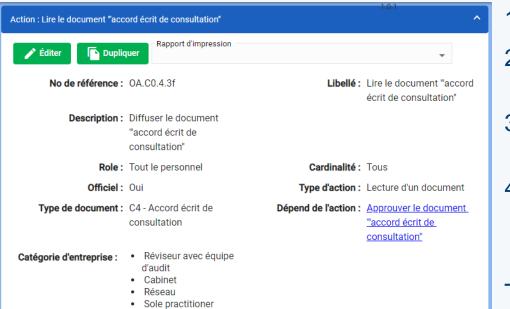

The ISQM Manager Software : Where should firms start ?

- Determine their own risk appetite;
- Customize the objectives, the quality risks and the responses based on the firm's own characteristics and the engagements;
- Customize the settings and the documentation of the quality management system (policies and procedures, templates, checklists ...);
- Set up the system based on the firm's internal organization and decisions;
- Update the objectives, quality risks, responses and actions based on the evolution of the system of quality management;

The very first step a firm must take is identifying the quality risks

The ISQM Manager Software : Structure of an action

The following elements have been defined for every action :

- 1. The reference/name of the action;
- 2. The type of action that is required (reading a document, filling out a form, signing a document ...);
- 3. The type of document that is needed if the action is linked to a specific document;
- 4. The person responsible to complete the action (the partner, the manager, everyone ...)

The actions will only be displayed in the dashboards when they need to be taken (at a specific date for example). If an action depends on another action, it will only be shown once the previous action has been closed.

The ISQM Manager Software : The dashboards

The ISQM Manager software provides 4 different dashboards:

- One for the management of the firm : presents an overview of the whole system
- One for the person in charge of ISQM : shows what actions need to be taken, when and by whom. It allows to have an overview of the actions to be taken in the following 48h.
- One for the engagement teams : shows what actions the members of the team need to take for each engagement (internal and external).
- One for the person in charge of the monitoring of the system : shows what actions should have been taken but have not yet been taken,

uivi des actions par com	posante

C3 - Acceptation et maintien de la mission	5	0	0	0	0	0	5	0	0	0	0	0	0

Training and workshops

- June 2022: Introduction seminar of the new ISQM Manager software presentation of the software to the profession and stakeholders
- September 2022: Workshops (in French and Dutch) to teach auditors and firms how to use the ISQM Manager software
 - Overview of the use of "ISQM Manager" software
 - Daily use of ISQM manager (implementation of the system)
 - Programming of risks, objectives and responses to risks for ISQM managers/leaders within the firm

•BR RE

Challenges encountered

- Change of mindset risk-based approach for each audit firm which requires :
 - introducing a more proactive and tailored approach to quality management
 - Increasing responsibility of the firm's management and optimizing the firm's governance
 - more rigorous monitoring of quality control systems and more effective approach to weaknesses
- Development of the ISQM Manager (and translation)
- Timing of the adoption of the standard in Belgium (short timing) >< effective date

ISQM – The implementation in Brazil

Instituto de Auditoria Independente do Brasil

Awareness and knowledge share

Disseminate to the audit firms the knowledge necessary to meet the new requirements related to Quality Management, as provided for by ISQM, and all its requirements

Mindset and integrated view

Collaborate with the transition of firms towards integrated and proactive quality management based on a risk approach; continuous monitoring of processes; and timely remedy of deficiency.

How we did it...

Offer a Program with practical and behavior methodology (Soft Skills) to assist audit firms in the implementation of the Quality Management pillars, necessary and required by ISQM.

Launch hotsite (Awareness and Communication)

Gestão da Qualidade na Auditoria

Programa de Implementação da ISQM 1 -Gestão da Qualidade na Auditoria

Módulo 1 - Introdução da Qualidade - ISQM 1: Realizado em 2021 Módulo 2 - Oficinas - Implementação ISQM 1 (32h): Início - 12/05/2022 (formato online/ao vivo)

Por que participar do Programa de Implementação ISQM 1?

Porque as firmas de auditoria, de todos os portes, precisarão cumprir os requisitos previstos pela nova norma internacional de Gestão da Qualidade que será obrigatória a partir de **15/12/2022**.

Programa de Educação Profissional Continuada

A reconhecida excelência do Ibracon, agora nesse Programa inovador, de longa duração, que integra aspectos técnicos e de soft skills para apoiar as firmas de auditoria na implantação dos pilares da nova Norma. **Em processo de credenciamento para o PEPC do CFC.**

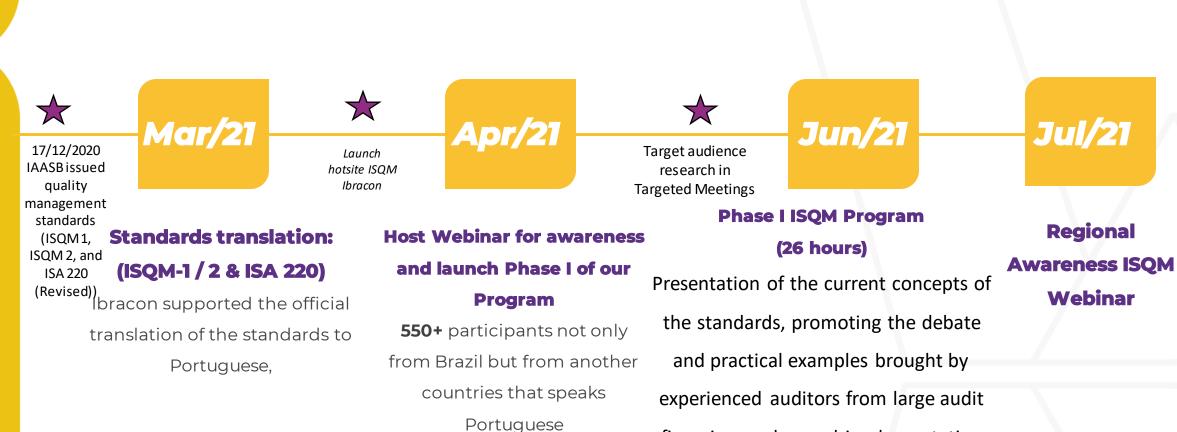

Demanda internacional

O Programa atende a uma demanda internacional que requer uma mobilização imediata das firmas de auditoria para entender as mudanças e, acima de tudo, planejar e implementá-las em tempo hábil.

Awareness Webinar I

Jan/22

Objective: Importance and changes introduced by the new standards considering the view of the stackaholders and a Q&A section Rogério Rokembach – CRE, Idésio Coelho - IFAC Board Member, Ana Tercia (CRC-RS), Shirley Silva (Ibracon), Adriano Thomé (Director FAPMP Ibracon)

176+ participants

Awareness Webinar II

Feb/22

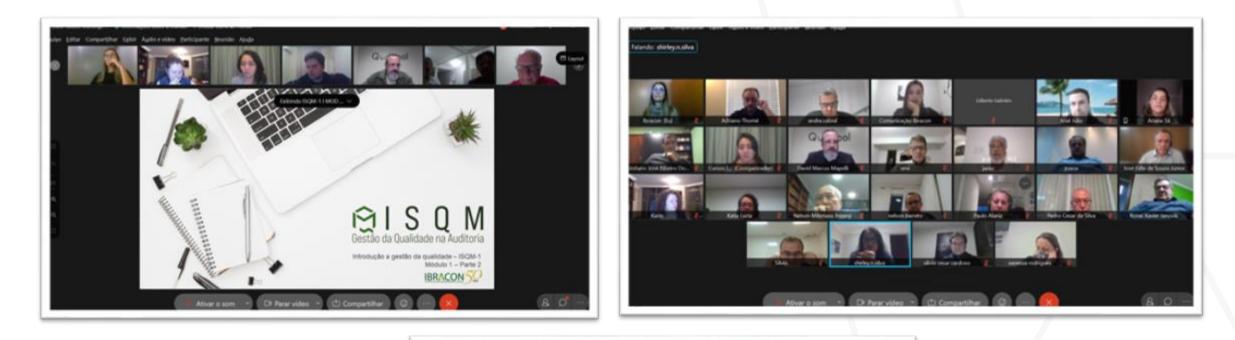

Objective: Present the major changes introduced by the new standards on the quality management system of the audit firms. 193+ participants Phase II ISQM Program (Practical workshop – 30 hours) Present current concepts of the standards, promote the debate and practical examples brought by experienced auditors from large audit firms in the process of implementation.

May -July

59 participants from 42 firms affecting approximately 1000 professionals

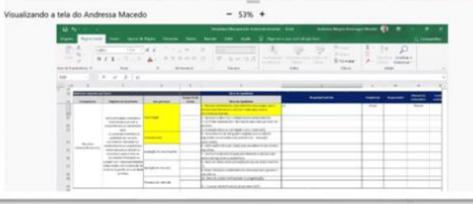

Programa ISQM Ibracon

More than 1000 professionals impacted by Ibracon actions

Gestão da Qualidade na Auditoria

Layou

Main challenges

- Eliminate the believe that "one size fits all"
- Present to our associates a range of available and affordable tools and IT solutions
- Build the culture of quality management as a process
- Engage the small and some medium size audit firms
- Create and foster an environment of collaboration among the associates
- Create a repository tool for best practices
- Working with the associates with the post-implementation issues (mitigating factors, root cause analysis, remediation plan, etc.)

- Hold a Webcast with regulators (CRE, CVM)
- On demand training (Webcast) Aug of 2022
- OCAM (Ordem dos Contadores e Auditores de Moçambique) on line training – Sep of 2022
- Create a repository tool for best practices available for the audit firms
- Work with the regulators and other stakeholders on the reviewing process
- Continuously sharing the knowledge and lessons learned after first-year implementation

Thank you!

Quality Management Guidance Resources for Auditors

PAO Sharing Session – June 30, 2022

Guidance Resources Overview

(Available in English and French)

- Awareness Building Resources
 - Alerts
 - Blog Articles
- Webinars
- First-time Implementation Tool

Access our free guidance resources : <u>Quality management guidance resources</u> (cpacanada.ca)

Quality management guidance resources

New quality management standards, both at the firm and engagement levels, could impact all practitioners. Our free guidance materials will help you implement these changes and advise your teams on the desired outcomes.

Awareness Building Resources

(Available in English and French)

- Available now
 - <u>Audit and Assurance Alert : New quality</u> management suite of standards
 - For firms who have previously implemented CSQC 1
 - <u>Practitioner Alert : New quality management</u>
 <u>suite of standards</u>
 - For first-time adopters
 - Practitioner Alert: Quality management conforming amendments

Access our Audit quality blog (cpacanada.ca)

Canadian Standard on Quality Control (CSQC) I applied to audits and reviews of financial statements, as well as other assurance engagements, but did not extend to related services standards in the Handbook. Therefore, for many small and medium-sized practitioners (SMPs), including sole practitioners, who only perform compilation engagements, CSQC I did not apply. Under CSQM I, these firms may be designing, implementing, and operating a system of quality management (SQQM), for the first time.

If you are adopting the new suite of quality management standards for the first time, please refer to our more detailed Practitioner Alert.

Webinars

(Available in English and French)

- Practitioner's Pulse series
 - For all firms
 - <u>June 2021</u> an overview of the quality management standards
 - <u>June 2022</u> practical application panel discussion & conforming amendments

Practitioner's Pulse webinar (June 2022): Quality Management, Practical Application Considerations

Join us for this live discussion with practitioners who will share their experiences to-date in developing a system of quality management and applying the requirements of the new quality management standards.

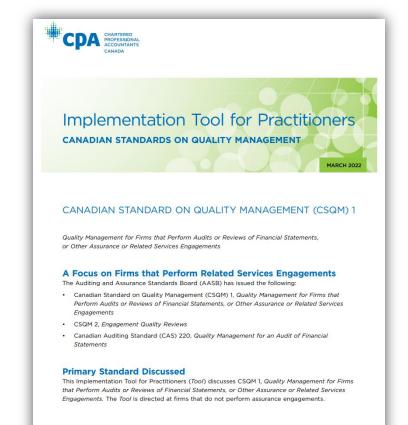

First-time Implementation Tool

(Available in English and French)

<u>CSQM 1 Implementation Tool</u>

- Directed to firms implementing for the first time and incorporates content from the IAASB's ISQM 1 First-Time Implementation Guide
- Guide includes a core document and 9 appendices which provide detailed guidance for each objective
- Uses 35 question and answer scenarios throughout the publication for scalable understanding and application

PAO Knowledge & Experience Exchange:

South African Institute of Chartered Accountants (SAICA)

IFAC

Thandokuhle Myoli Project Director: Assurance, SAICA

SAICA - Quality Management Implementation Initiative

By: Thandokuhle Myoli – Executive: Audit and Assurance

SAICA – who are we?

"Promoting the common interest of members" is SAICA's principal object and is achieved through a process of advocacy i.e., seeking support and adoption of a particular cause or policy from stakeholders such as legislators, standard setters and regulators. These causes and policies that SAICA seeks to promote are usually set out in technical standards or legislation or in administrative procedures and policies

"Standards and Legislation" sets out a common understanding (i.e. consensus) of how things should be done which enhances effectiveness and drives public cohesion. It also provides a shared expectation that gives confidence to stakeholders and hold those subject to a standard, accountable. "Standard setting" occurs either through public law process (i.e. legislative consensus) or a private law process (i.e. contractual consensus) implemented by the relevant standard setter in seeking a consensus position that is in the public interest.

The SAICA Standards Business Unit is primarily tasked with developing new standards, influencing changes to standards, leading through new opinion/views on standards required or quality checking proposed or current standards. This is achieved by first formulating an **internal consensus or** "SAICA View" through a member proxy (i.e. member structures) and member engagement process.

The SAICA Standards Business Unit leverages the "SAICA View" to participate in the standard setting process which seeks to reach both local and/or international consensus by firstly advocating the "SAICA View" to Standard setters, stakeholders and the public and thereafter contribute in formulating a consensus view that is in the public interest. This is done either in relation to independent external stakeholders where we have no direct or indirect decision-making powers in relation to the adoption of a standard (e.g. merely influence like advocating to Parliament as legislator) or external dependent stakeholders where we do have direct (e.g. SAICA direct representative on decision making body) or indirect representation (SAICA nominee/observer/advisor on decision making body) on decision as relates to the adoption of a standard.

Standard and Legislation setting is not a perfect science as it mostly requires merely majority consensus, mainly of principle. It therefore may require further refinement through **interpretation or inference (i.e. guidance)** based on either the principles, context or wording of a particular standard for its real-world application in different or changing environments.

Unpacking ISQM

Profession-wide collaborative effort

- SAICA has established a working group through its Audit and Assurance prescribed committee, the Assurance Guidance Committee to focus on the implementation of QM standards.
- Representation of the task group large firms, SMPs, assurance consultants and training providers, software providers, the Office of the Auditor General of South Africa, PAFA and IRBA.
- The Task Group decided on hosting a series of monthly workshops (free of charge). The workshops are hosted virtually by SAICA, in partnership with PAFA and the IRBA. The recordings are available on the SAICA website.
- Three chargeable events (4 hours each) will also be hosted by SAICA with the aim of unpacking some of the complex areas in greater detail.
- We are currently working on a mentoring process for small firms. SAICA's role is to facilitate the engagement between the mentor and mentee.
 - Tovisit the SAICA ISQM Resources Page click here.

Implementation challenges identified

SAICA THE SOUTH AFRICAN INSTITUTE OF CHARTERED ACCOUNTANTS develop.influence.lead.

SMP Perspective:

- Time and resources
- Changing the mindset from that of a compliance exercise to seeing the benefits for the business of a firm. This applies, in those firms that may not get inspected by the regulator due to size and the nature of engagements conducted.
- Cost implications in terms of setting up technology to automate processes and documents as well as employing th consultants.
- In this regard, SAICA will be hosting a chargeable event focusing on implementation for SMPs.

Large firms:

 Concerns that regulators may be unrealistic in their expectations when conducting first-time inspections. In this regard, som are in support of some pilot assessments by the regulator prior to 15 December 2022. Firms may not get implementation rig first year and getting implementation right may be a process of continuous improvement.

Theoretical aspects of the standard:

-Certain components do not have pre-defined quality objectives in ISQM1 (e.g. risk assessment process, monitoring and reme process) but pose certain risks if they are not well planned, executed and controlled. Is it necessary to formulate quality objectives for these components?

PAO Knowledge & Experience Exchange:

STRATEGIC OBJECTIVES

Strategic Objectives	Strategic Actions	Mechanisms
Enhancing the quality of professional accountancy services in Africa	 Facilitate the adoption and implementation of the new International Standards on Quality Management (QM): Create awareness. Support PAOs to help their members and firms to implement the standards, Facilitate access to practical and fit-for purpose implementation resources / support. Strengthen PAO compliance with IFAC Statement of Membership Obligations 1 and 6: Enhance PAOs' understanding of the SMOs. Assist PAOs to comply with the SMOs. Explore the feasibility of providing a quality review outsourcing service. 	 (Multi-stakeholder) Forum to Advance Accountancy Quality in Africa (new) Accountancy Quality Advisory Group (new) Liaison relations with staff of the IAASB and IFAC

PLANNED ACTIONS FOR 2022 AND BEYOND

Engage stakeholders to promote activity and seek buy-in and commitment

- Development partners and donor agencies
- Firms
- Regulators
- Educators
- Regional economic and other groupings
- Software and other service providers

Equip PAOs to assist members and firms to implement the ISQM

- Raise awareness
- Facilitate access to already-existing activities / tools
- For selected PAOs, obtain understanding of how they are assisting members and firms to transition to the ISQM and advise on / support actions to close gaps

Assist PAOs to improve their IFAC SMO 1 & 6 compliance

- Raise awareness of IFAC SMOs 1 & 6
- Facilitate access to already-existing activities / tools
- For selected PAOs, conduct IFAC SMO 1 & 6 compliance gap analysis and advise on / support actions to close gaps

Explore establishment of Quality Center for PAOs in Africa (longerterm action)

 Conceptualise a center – people, process, systems – in consultation with the Forum to Advance Accountancy Quality in Africa

DETAIL PROJECTS

VIRTUAL QM WORKSHOP SERIES

Creating awareness and supporting implementation of ISQM through harnessing alreadyexisting opportunities

Facilitating access to alreadyexisting activities / tools in an easy to access / navigate way

PAO QUALITY STATUS REVIEW

Understanding specific challenges / needs of selected PAO / country

Identifying gaps in services to assist members and firms to transition to the ISQM and advising on actions to close gaps

Identifying gaps in IFAC SMO 1 & 6 compliance and advising on actions to close gaps

TOOLSAND TRAINING

Drawing on the deliverables of the PAO quality status review, delving deeper into – and to the extent possible - resolving practical implementation challenges

Identifying and – to the extent possible – closing gaps in existing tools and training

PARTICIPATING PAOs

CaseWare recognised the value of technology as an essential element of the proactive quality management approach envisaged by the new suite of Quality standards in making quality management easier, clearer and more intuitive for all

levels in professional accounting practices.

The traditional "manual" documentation facilitated the documentation of policies and procedures, but **lacked an integrated workflow** with staff and engagement workflows.

CaseWare's reimagined SQM Quality product combines functionalities from our existing suite of applications with new capabilities to provide firms with a cloud-based **quality management application** that is accessible from anywhere, **scalable** to any firm and **makes compliance easy**.

Introduction

Our Vision

Our aim is to provide not only compliance, but an experience that delights users in their quality workflow.

By assisting with facets in managing accounting practices, SQM Quality will embed itself for all staff as a proactive management tool that facilitates an iterative system of quality management.

> Incorporating the CaseWare eco-system in SQM Quality we aim to provide firms with a solution that is integrated in their daily tasks and collate relevant information in the SoQM making monitoring and evaluation of the SoQM effortless and user friendly.

> >

· Our Content · · · · ·

By brining together compliant content with uniquely designed features we created a system that fits the modern world.

Our content is designed and approved by a group of experts in the field of quality

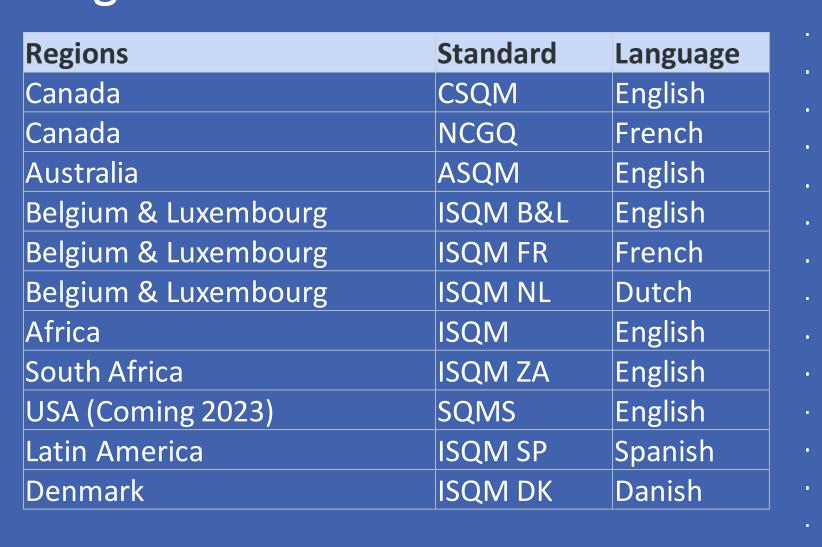

management and assurance engagements.

With the built in risk assessment process by assessing probability of occurring and the effect of the risk on the business should it occur.

Our libraries of content for objectives, risks and responses provides ' firms with premium content curated by experts that allows firms to . design a comprehensive system of quality management.

Supported Supported Regions

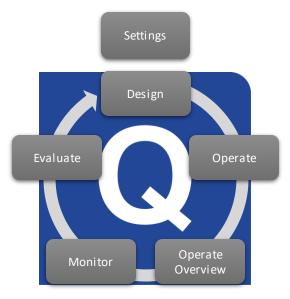

Our Vision

SQM Quality is designed with a dynamic workflow incorporating 5 Modules:
