¹ The term ‘alignment’ refers to the formal processes the IPSASB follows to assess the applicability of IFRS and/or ISS requirements when developing pronouncements which faithfully represent the economic substance of transactions in the public sector. Through these processes the IPSASB aims to reduce unnecessary differences with these sources of guidance when they can also be applied in the public sector context.

² For the purpose of this dashboard, it is used several International Statistical Standards (ISS), as follows: the Government Finance Statistics Manual 2014 (GFSM 2014) issued by the International Monetary Fund. When an issue is not covered in GFSM 2014, it is used the System of National Accounts 2008, European of System of Accounts 2010, and Manual on Government Deficit and Debt (MGDD) – Implementation of ESA 2010, in this order.

³ The legend is only related to recognition and measurement requirements. In IPSAS related only to presentation and disclosures the legend is related to possible future alignment between IPSAS and ISS.

⁴ Staff assessment

IPSAS	ISS	Status	Main Differences		Alignment Opportunities
			Recognition / Measurement	Presentation / Disclosures	
<u>Presentation of Financial Statements</u>					
IPSAS 1 (Revised December 2006)	4.16-4.50			<ul style="list-style-type: none"> • IPSAS 1 and GFS have different names for the financial statements. • The GFS Statement of Other Economic Flows is partly captured in the IPSAS Statement of Financial Position, Statement of Changes in Net Assets/Equity and Statement of Financial Performance. • IPSAS 1 requires that assets and liabilities be presented as current and noncurrent, except when a presentation based on liquidity provides information that is faithfully representative and is more relevant. GFS does not make this distinction in its financial statements, but allows a supplementary table on the maturity structure of government’s financial assets and liabilities to be compiled. • IPSAS 1 does not require assets to be presented as financial and nonfinancial, while GFS requires. • IPSAS 1 does not require the presentation of financial assets and liabilities as domestic and foreign/external, while GFS requires. • IPSAS 1 does not require or permit liabilities to be presented in the Statement of Financial Position classified by sector of the counterparty and maturity, while GFS permits. • The minimum items to be presented in the financial statements are different. • IPSAS 1 requires only as minimum comparative information for the preceding period, while GFS information is usually presented in a time series of data. • The Classification of Functions of Government (COFOG) is only used in GFS. • IPSAS 1 uses different terminology. 	<p>IPSASB</p> <ul style="list-style-type: none"> • B. IPSASB project on Presentation of Financial Statements in the Public Sector. • B. IPSASB project on Presentation of Financial Statements in the Public Sector for enhanced alignment with Classification of Functions of Government (COFOG) categories. <p>ISS</p> <ul style="list-style-type: none"> • C. Opportunity to align presentation of financial of financial statements.

Table 3 – IPSAS/RPG and ISS—Detail

IPSAS	ISS	Status	Main Differences		Alignment Opportunities
			Recognition / Measurement	Presentation / Disclosures	
<u>Cash Flow Statements</u>					
IPSAS 2 (May 2000)	4.32-4.35	A		<ul style="list-style-type: none"> IPSAS 2 and GFS have different names for the financial statement. IPSAS 2 does not require the presentation of cash flows from financing activities as domestic and external, while GFS requires. IPSAS 2 uses different terminology. IPSAS 2 encourages disclosure of a reconciliation of surplus or deficit to operating cash flows in the notes to the financial statements. 	<ul style="list-style-type: none"> No alignment opportunities identified.
<u>Accounting Policies, Changes in Accounting Estimates and Errors</u>					
IPSAS 3 (Revised December 2006)	A6.46	B	<ul style="list-style-type: none"> In IPSAS 3, a change in accounting estimates are recognized prospectively by including it in surplus or deficit in the period of the change, if the change affects the period only, or the period of the change and future periods, if the change affects both. In GFS, revisions arising from changes in estimates (as more information becomes available) must be recorded in the period in which the economic event occurred. In practice, it is possible that what GFSM 2014 treats as a correction of an error (and therefore back casts) is treated as a change of estimate under IPSASB Standards (and therefore not back cast). 		<p>IPSASB</p> <ul style="list-style-type: none"> B. Alignment opportunity to provide disclosures to support ISS for data series.

Table 3 – IPSAS/RPG and ISS—Detail

IPSAS	ISS	Status	Main Differences		Alignment Opportunities
			Recognition / Measurement	Presentation / Disclosures	
<u>The Effects of Changes in Foreign Exchange Rates</u>					
IPSAS 4 (Revised April 2008)	3.31; 10.44	<div style="background-color: #92d050; width: 20px; height: 20px; display: inline-block; border: 1px solid black; border-radius: 50%; text-align: center; line-height: 20px;">A</div>	<ul style="list-style-type: none"> In IPSAS 4, exchange rates differences arising on the settlement of monetary items, or on translating monetary items at rates different from those at which they were translated on initial recognition during the period or in previous financial statements are presented in surplus or deficit in the period in which they arise. In IPSAS 4, exchange differences arising on a monetary item that forms part of a reporting entity’s net investment in a foreign operation shall be presented in surplus or deficit in the separate financial statements of the reporting entity or the individual financial statements of the foreign operation, as appropriate. In IPSAS 4, in the financial statements that include the foreign operation and the reporting entity (e.g., consolidated financial statements when the foreign operation is a controlled entity), such exchange differences are recognized initially in a separate component of net assets/equity, and presented in surplus or deficit on disposal of the net investment. In GFS, foreign exchange gains or losses are presented as other economic flows. IPSAS 4 uses different terminology. 	<ul style="list-style-type: none"> No alignment opportunities identified. 	
<u>Borrowing Costs</u>					
IPSAS 5 (May 2000)	6.62-6.83	<div style="background-color: #92d050; width: 20px; height: 20px; display: inline-block; border: 1px solid black; border-radius: 50%; text-align: center; line-height: 20px;">A</div>	<ul style="list-style-type: none"> IPSAS 5 permits borrowing costs that are directly attributable to the acquisition, construction, or production of a qualifying asset to be capitalized as part of the cost of that asset. GFS does not have this permission—all borrowing costs as expensed. 	<ul style="list-style-type: none"> IPSAS 5 uses different terminology. 	<ul style="list-style-type: none"> No alignment opportunities identified.

Revenue from Exchange Transactions

<p>IPSAS 9 (July 2001)</p>	<p>5.1-5.22; 5.136-5.137</p>	<p>B C</p>	<ul style="list-style-type: none"> In IPSAS 9, dividends are recognized when the shareholder’s or the entity’s right to receive payment is established provided that it is probable that the economics benefits or service potential associated with the transaction will flow to the entity and the amount of the revenue can be measured reliably. In GFS, the time of recording depends on the unit’s decision regarding when to distribute income: <ul style="list-style-type: none"> (a) For public corporations where government or another public corporation is the only shareholder and the shares are not public traded, the dividends are recorded at the time they are payable; and (b) For quoted shares, dividends are recorded at the point at which the share price starts to be quoted on an ‘ex-dividend’ basis. In IPSAS 9, all types of dividends are recognized as revenue. In GFS: <ul style="list-style-type: none"> (a) “Super-dividends” (any dividends declared greatly in excess of the recent level of dividends and earnings) should be recorded as a transaction in financial assets, specifically the withdrawal of owners’ equity from the corporation; and <p>“Interim dividends” (dividend payments during a reporting period, before the final operating result of a corporation is known) should be recorded as a financial advance to the shareholder in transactions in financial assets and liabilities.</p>	<ul style="list-style-type: none"> IPSAS 9 does not distinguish “normal dividends”, “super-dividends”, and “interim dividends”. GFS makes this distinction. IPSAS 9 uses different terminology. IPSAS 9 provides a list of disclosures. GFS does not provide a list of disclosures. 	<p>IPSASB</p> <ul style="list-style-type: none"> B. IPSASB Revenue project introduces the control/performance obligation approach. <p>ISS</p> <ul style="list-style-type: none"> C. Alignment opportunity to introduce more detailed guidance and to align this with a control/performance obligation approach to revenue recognition. <p>ISS Guidance Notes Relevant for IPSASB</p> <ul style="list-style-type: none"> C.8 Recording of Fines and Penalties (Draft Guidance Note C.8)
---------------------------------------	----------------------------------	-------------------	--	--	--

Financial Reporting in Hyperinflationary Economies

<p>IPSAS 10 (July 2001)</p>	<p>–</p>	<p>C</p>			<p>ISS</p> <ul style="list-style-type: none"> C. No specific detailed guidance in GFS. Alignment opportunity to include more guidance aligned with IPSAS 10.
--	----------	-----------------	--	--	---

Table 3 – IPSAS/RPG and ISS—Detail

IPSAS	ISS	Status	Main Differences		Alignment Opportunities
			Recognition / Measurement	Presentation / Disclosures	
<u>Construction Contracts</u>					
IPSAS 11 (July 2001)	7.37; 7.80	B C	<ul style="list-style-type: none"> IPSAS 9 provides guidance on: <ol style="list-style-type: none"> Recognition of construction contracts with expected deficits; Combining and segmenting construction contracts; Changes in Estimates; and A list of disclosures. GFS does not provide such guidance. 	<ul style="list-style-type: none"> IPSAS 9 uses different terminology. IPSAS 11 identifies cost plus or cost-based contract. GFS does not make this identification. 	<p>IPSASB</p> <ul style="list-style-type: none"> B. IPSASB Revenue project introduces the control/performance obligation approach <p>GFS</p> <ul style="list-style-type: none"> C. Alignment opportunity to introduce more detailed guidance and to align this with a control/performance obligation approach to revenue recognition.
<u>Inventories</u>					
IPSAS 12 (Revised December 2006)	7.20-7.33; 7.75-7.86; 10.16- 10.17	C	<ul style="list-style-type: none"> IPSAS 12 requires any write-down of inventories and all losses of inventories to be recognized as an expense. The amount of any reversal of any write-down of inventories is to be recognized as a reduction in the amount of inventories recognized as an expense in the period in which the reversal occurs. In GFS, any change in the value of inventories between the time of acquisition and withdrawal are recorded as holding gains or losses. IPSAS 12 requires inventories to be measured at the lower of cost and net realizable value for inventories held for sale, and at the lower of cost and current replacement cost for inventories held for distribution or consumption in a nonexchange transaction. GFS requires inventories to be valued at current market prices on the balance sheet date. 	<ul style="list-style-type: none"> IPSAS 12 provides a list of disclosures. GFS does not provide a list of disclosures. IPSAS 12 uses different terminology. IPSAS 12 classifies as inventory ('animal produce') animals and plants for one-time use after they harvested/slaughtered, which until then are classified as fixed assets under IPSAS 27. GFS classifies animals and plants for one-time use always as inventories. 	<p>ISS</p> <ul style="list-style-type: none"> C. Alignment on measurement.

Table 3 – IPSAS and ISS—Detail

IPSAS	ISS	Status	Main Differences		Alignment Opportunities
			Recognition / Measurement	Presentation / Disclosures	
<u>Events After the Reporting Date</u>					
IPSAS 14 (Revised December 2006)	ESA 20.189 MGDD II.7		<ul style="list-style-type: none"> IPSAS 14 requires an entity to adjust the amounts recognized in its financial statements, or to recognize items that were not previously recognized related to a settlement after the reporting date of a court case that confirms that the entity had a present obligation at the reporting date. In GFS only a when a court of justice rules that compensation must be paid, or a transaction reversed, resulting from or related to past events, the time of recording of the expenditure or revenue is when the claimants have an automatic and incontrovertible right for a given amount that can be individually determined, and when it is unlikely that claimants will fail requesting their due. When a court of justice merely sets a principle of compensation, or when the claims must be reviewed for eligibility and in relation to determination of the amount by administrative services, expenditure or revenue is recorded as soon as the value of the obligation is reliably determined. Amounts should not be distributed over the past periods when they accrued, except for that part of the claims that were not the subject of controversy. 	<ul style="list-style-type: none"> IPSAS 14 provides a list of disclosures. GFS does not provide a list of disclosures. IPSAS 14 provides guidance on going concern. GFS does not provide guidance on going concern. 	ISS <ul style="list-style-type: none"> E. Alignment not achieved related to court rules.

IPSAS	ISS	Status	Main Differences		Alignment Opportunities
			Recognition / Measurement	Presentation / Disclosures	
<u>Investment Property</u>					
IPSAS 16 (Revised December 2006)	7.4-7.12; 7.20-7.33;	B	<ul style="list-style-type: none"> In IPSAS 16 fair value model, changes in the fair value after recognition are recognized in surplus or deficit. In GFS, changes in market value are recognized as other economic flows. In IPSAS 16, investment is recognized as an asset when, and only when it is probable that the future economic benefits or service potential that are associated with investment property will flow to the entity and the cost or fair value of the investment property can be measured reliably. In GFS, an asset is a store of value representing a benefit or series of benefits accruing to the economic owner by holding or using the resource over a period of time. Only economic assets are recorded in GFS, which are resources over which economic ownership rights are enforced by institutional units, individually or collectively, and from which economic benefits may be derived by their owners by holding them or using them over a period of time. IPSAS 16 allows measurement at historical cost and fair value at initial and after recognition. In GFS, assets should be measured at market value. GFS also uses alternative valuation methods, such as: fair value and written-down replacement cost. In IPSAS 16, transaction costs are included in the measurement of investment property at initial recognition. In GFS, ownership transfer costs are expensed. 	<ul style="list-style-type: none"> IPSAS 16 provides a list of disclosures. GFS does not provide a list of disclosures. IPSAS 16 classifies property as investment property and owner-occupied property. GFS distinguishes property according to whether it is a produced/nonproduced asset and whether it is a dwelling, other building, other structure, or land improvement. IPSAS 16 uses different terminology. 	IPSASB <ul style="list-style-type: none"> B. IPSASB Measurement project reviewing / introducing current value measurement guidance. B. Project also considering treatment of transaction costs.

<u>Revenue from Non-Exchange Transactions (Taxes and Transfers)</u>					
IPSAS 23 (December 2006)	5.1-5.151; A3.1- A3.36		<ul style="list-style-type: none"> IPSAS 23 recognizes non-exchange revenue from the subsidy component in a concessionary loan received. GFS does not recognize the subsidy component in a concessionary loan received. IPSAS 23 allows, but it does not require to, recognize services in-kind as revenue and as an asset. GFS requires the recognition of imputed sales of goods and services. The criteria to recognize an asset in respect of transfers in IPSAS 23 is different from GFS. IPSAS 23 recognizes revenue by the debtor irrespective of whether the debt forgiveness is mutually agreed or unilateral by the creditor. GFS recognizes revenue by the debtor in the case of debt forgiveness (mutually agreed) and recognizes as other economic flow by the debtor in case of unilateral default by the debtor and unilateral write-off or write-down by the creditor. The GFS treatment of debt assumption depends on (i) whether the new debtor acquires an effective financial claim on the original debtor, and (ii) if there is no effective financial claim, the relationship between the new debtor and the original debtor and whether the original debtor is bankrupt or no longer a going concern. IPSAS 23 does not make such distinction. IPSAS 23 recognizes revenue from a non-exchange transactions to the extent that present obligations have been satisfied. GFS recognizes revenue irrespective of existence of present obligations. 	<ul style="list-style-type: none"> IPSAS 23 provides a list of disclosures. GFS does not provide a list of disclosures. The classification of transfers in IPSAS 23 and GFS is different. GFS distinguishes debt reorganization (mutually agreed) from unilateral default by the debtor and unilateral write-off by the creditor. IPSAS 23 does not make such distinction. IPSAS 23 uses different terminology. 	IPSASB <ul style="list-style-type: none"> B. IPSASB Revenue project ISS <ul style="list-style-type: none"> C. <u>Consolidated Financial Statements</u>					
IPSAS 35 (January 2015)	3.152- 3.166	A	<ul style="list-style-type: none"> GFS requires consolidation for the sub-sectors of the public. IPSAS 35 does not require such consolidation. IPSAS 35 requires that the controlling entity consolidates all controlled entities irrespective of being resident or nonresident or whether they are general government units or public corporations. GFS requires the consolidation of only resident units and distinguishes between government units and public corporations. [Note: These differences can be managed through limited adjustments at data source level without impact on alignment at Standards level] 	<ul style="list-style-type: none"> IPSAS 35 uses different terminology. See IPSAS 22, <i>Disclosure of Financial Information about the General Government Sector</i> to bridge to the ISS reporting on the Government Sector. 	<ul style="list-style-type: none"> No alignment opportunities identified.
<u>Investments in Associates and Joint Ventures</u>					
IPSAS 36 (January 2015)	2.140- 2.143; A4.40	E	<ul style="list-style-type: none"> IPSAS 36 requires the application of the equity method to recognize and measure investments in associates and joint ventures. In GFS, equity is measured at current market prices if there are no observable market prices. If there are no observable market prices, it is use information from the stock market on a similar listed share or recent transaction price, net asset value, present value/price to earnings ratios, book values reported by enterprises with macro-level adjustments by the statistics compilers, own funds at book value, and apportioning global value. In IPSAS 36, under the equity method, on initial recognition the investment in an associate or a joint venture is recognized at cost and the carrying amount is increased or decreased to recognize the investor's share of the surplus or deficit of the investee after the date of acquisition. The investor's share of the investee's surplus or deficit is recognized in the investor's surplus or deficit. Distributions received from an investee reduce the carrying amount of the investment. Adjustments to the carrying amount may also be necessary for changes in the investor's proportionate interest in the investee arising from changes in the investee's equity that have not been recognized in the investee's surplus or deficit. Such changes include those arising from the revaluation of property, plant and equipment and from foreign exchange translation differences. The investor's share of those changes is recognized in net assets/equity of the investor. In GFS, changes in market value of traded shares and changes in the investor's share of the corporation's net worth are recorded as other economic flows. 	<ul style="list-style-type: none"> IPSAS 36 uses different terminology. 	<p>ISS</p> <ul style="list-style-type: none"> E. <u>Employee Benefits</u>					
IPSAS 39 (July 2016)	A2.1-A2.66 7.189-7.202; 7.261	C	<ul style="list-style-type: none"> IPSAS 39 apply the net interest approach. GFS reporting guidelines do not apply the net interest approach, but rather recognize the proceeds of fund assets and interest on fund liabilities according to the economic nature of these revenues and expenses. GFS then attributes the property income and the increase in the liability for benefit entitlements due to the passage of time through an entry in “property expense for investment income disbursements”. In IPSAS 39, equivalent entries are presented in surplus or deficit. For autonomous funds recognized outside the employer’s accounts, GFS recognizes a claim of the pension fund on the pension manager for deficits of the pension fund in specific circumstances. In these cases, GFS does not require the recognition of an interest expense in the employers’ accounts due to the passage of time in recognizing that claim. In GFS, the pension fund only records actual revenue from transactions such as interest, dividends and rents in the Statement of Operations. IPSAS 39 disaggregates employee benefits into short-term and long-term employee. GFS does not make such disaggregate and does not require specific disclosures on employee benefits, except for the supplementary table on pension schemes in social insurance specified in the System of National Accounts 2008. In GFS, the plan assets are generally measured on the same basis as other assets, which is normally market value. Therefore, unlike IPSAS 39, no additional calculation to include the discount rate in the plan assets as a whole is necessary to estimate present value. However, in GFS some assets are not measured at market value. This may give rise to different valuations between IPSAS 39 and GFS (for example: loans are measured at nominal value in GFS and usually at amortized cost in IPSAS). 	<ul style="list-style-type: none"> IPSAS 39 provides a list of disclosures. GFS does not provide a list of disclosures. In IPSAS 39 any changes in the value of the defined benefit obligation is presented as remeasurements and recognize in net assets/equity. In GFS, any changes in the volume or value of assets that do not result from transactions are recorded in the Statement of Other Economic Flows, which includes the effect of the passage of time. IPSAS 39 uses different terminology. 	<p>ISS</p> <ul style="list-style-type: none"> C. Alignment opportunity in Presentation, Recognition of defined benefit cost, Measurement of net defined benefit obligation, Recognition and measurement of net interest approach, Actuarial techniques, Components of defined benefit cost, and Terminology

<u>Public Sector Combinations</u>					
IPSAS 40 (January 2017)	7.113-7.117	E	<ul style="list-style-type: none"> A transaction will occur where a “market unit” is nationalized or privatized (that is, entering government control or leaving it), and the amounts are recorded in GFS as transactions in equity that correspond to the observed transaction price. Any changes in valuation—for example, between the opening balance of a government equity stake and the eventual transaction price—are recorded as revaluation effects, with no impact on government net lending/net borrowing. For amalgamations, the main impact is on the sectorization of the “institutional units”. Where the units before amalgamation belonged to the same sector or subsector of general government, the amalgamation will have no impact on the data for that sector or subsector. For example, an amalgamation of two local governments, where both are already classified to the local government sector, would not change results for the local government sector. However, in cases where a unit in one subsector is being amalgamated with a unit in another subsector, the amalgamated units will be removed from the sector they belonged to and be added to the sector of the new amalgamated unit, through a reclassification of the unit (recorded in GFS as an “other volume change in assets and liabilities”). For example, if a local government unit is amalgamated with a state government, the unit will be reclassified from the local government subsector to the state government subsector. IPSAS 40 does not make sectorization of reporting entities. 	<ul style="list-style-type: none"> IPSAS 40 provides a list of disclosures. GFS does not provide a list of disclosures. GFS guidelines make a distinction between an acquisition and an amalgamation based on the principle that with an acquisition a transaction occurs, while with an amalgamation just a reclassification of units may occur. IPSAS 40 does not have such distinction. In GFS, public sector combinations within the same sector or subsector of general government have no impact on the data in GFS. IPSAS 40 requires the changes to individual entities to be accounted for. IPSAS 40 uses different terminology. 	<ul style="list-style-type: none"> E. Alignment not achieved in amalgamations.
