

## **BACKGROUND NOTE ON ACTION PLANS**

SMO Action Plans are developed by IFAC Members and Associates to demonstrate fulfillment of IFAC Statements of Membership Obligations (SMOs). SMOs require IFAC Members and Associates to support the adoption<sup>1</sup> and implementation<sup>2</sup> of international standards and other pronouncements issued by independent standard-setting boards under the auspices of IFAC as well as by the International Accounting Standards Board (IASB); and to establish a Quality Assurance (QA) review and Investigation and Disciplinary (I&D) systems.

IFAC Members and Associates conduct a self-assessment against the requirements of SMOs and identify areas where improvements are needed. Based on the results of the assessment, Members and Associates develop an SMO Action Plan to (a) demonstrate how they fulfill the requirements of the SMOs and (b) where some requirements are not yet addressed, to present plans towards their fulfillment.

SMO Action Plans are designed to be ever-green documents that provide a comprehensive description of the accountancy profession and its legislative and regulatory environment in the jurisdiction as well as the actions undertaken by IFAC Members or Associates to support adoption and implementation of international standards and best practices.

Regular updates of the SMO Action Plans are required as part of the IFAC Member Compliance Program.

<sup>1</sup> *Adoption* is concerned with the decision that international standards are appropriate for use in specific national financial reporting environments and with the actions necessary to effect those decisions, including incorporation into national requirements or requiring the use of international standards through law. Adoption may include a process to review draft international standards, translation, public exposure of proposed standards, approval, incorporation into national requirements as necessary, and promulgation of final standards, and, where applicable, a convergence process to eliminate or minimize differences between international and national standards.

<sup>2</sup> *Implementation* may include a process to build awareness of the adopted standards, provide relevant education and training, develop or disseminate implementation guidance and any other activities that promote proper understanding and use of the standards in practice.

**Action Plan Subject:** SMO 1–Quality Assurance  
**Action Plan Objective:** Reform the Quality Assurance Review System in Accordance with SMO 1

**Background:**

In accordance with the Law No. 88-108, the Control Committee has established a Quality Assurance (QA) review system and undertakes the QA reviews. The same Control Committee is in charge of QA review for the audits carried out by the members of Compagnie des Comptables de Tunisie (CCT). Although the Control Committee is formally independent from Ordre des Experts-Comptables de Tunisie (OECT), the body includes OECT members and is supported by OECT Secretariat. The QA review system of the Control Committee needed to be slightly modified to incorporate all the requirements of SMO 1 (the current system includes only legal audit services but not the other assurance services).

OECT and the Control Committee are currently working on the improvement of the QA review system and promote the development of a complete public oversight system. The OECT worked on a new project QA review based on a 2 level review, the first level to be monitored by an internal control committee. This internal control committee will cover all areas of professional activity of the chartered accountant and not only audit services. The project on OECT bylaws and constitution including this internal control committee was adopted in February 2013, AGM and is now pending approval by the Ministry of Finance and is therefore not yet implementable.

The second level is to be monitored by a totally independent institution - Institute of Assurance Services Control (IASC) and will be focused only on assurance services. This institution will have its own premises and full-time controllers among non-practicing chartered accountants. The project is under discussion with authorities. OECT has started a partnership with the World Bank to support the implementation of the IASC. One workshop of experience exchange was held in Morocco in January 2015 with Moroccan Institute and the representatives of the International Forum of Independent Audit Regulators (IFIAR). A second workshop was held in Tunis in June 2015 in order to adopt an action plan agreed with all stakeholders. A new round of discussions started in July 2015 with the Ministry of finance and a draft was issued at an ad-hoc committee level to be submitted to the minister in October 2015. The draft is still under discussion as it is part of a whole project of accounting profession reform.

There was a change of Tunisian Government in August 2016. Since then, OECT is continually discussing with the new Minister of Finance (MoF) and MoF staff about the planned reform of the OECT bylaws and the improvement of QA review system.

#### Main Requirements of SMO 1

Requirements	Y	N	Partially	Comments
<b>Scope of the System</b> 1. At a minimum, mandatory QA reviews are required for all audits of financial statements.			X	Presently, QA reviews are required only for legal audits services.
<b>Quality Control Standards and Other Quality Control Guidance</b> 2. Firms are required to implement a system of quality control in accordance with the quality control standards.	X			

Requirements	Y	N	Partially	Comments
3. Most up to date versions of ISQC 1 and other relevant ISAs are adopted as the quality control standards.	X			In January 2016, OECT adopted the 2015 ISA as issued by IAASB and translated into French by the Chartered Professional Accountants of Canada (CPA Canada). Additionally, OECT adopted in January 2016 the standards ISRE 2410, ISAE 3400, and ISRS 4400 as translated into French by the Instituut van de Bedrijfsrevisoren – Institut des Réviseurs d'Entreprises of Belgium. Lastly, the new auditor reporting standards were adopted by OECT in November 2016 as translated into French by the Chartered Professional Accountants of Canada (CPA Canada).
4. Member Body assists firms in understanding the objectives of quality control and in implementing and maintaining appropriate systems of quality control.	X			Training courses are scheduled in 2017 to enhance the understanding of the new quality control standard by OECT members.
<b>Review Cycle</b> 5. A cycle-based, risk-based, or a mixed approach for selecting firms for QA review is used.	X			A mixed approach for selecting firms for QC review is used. All audit firms conducting legal audits are subject to QA review, but priority is given to those conducting audits of public interest entities.
6. For cycle-based approach, quality control reviews are required to take place at least every six years (and every three years for audits of public interest entities).	X			
<b>QA Review Team</b> 7. Independence of the QA Team is assessed and documented.	X			The QA Review is conducted by OECT members who are totally independent of the audit firm being reviewed.
8. QA Team possesses appropriate levels of expertise.	X			The Control Committee has established a review procedure which has been made available to reviewers who are OECT members.

Requirements	Y	N	Partially	Comments
<b>Reporting</b>				
9. Documentation of evidence supporting the quality control review report is required.	X			
10. A written report is issued upon conclusion of the QA review and provided to the firm/partner reviewed.	X			
<b>Corrective and Disciplinary Actions</b>				
11. Reviewed firms/partners are required to make timely adjustments to meet recommendations from the review report.	X			
12. QA review system is linked to the Investigation and Discipline system.	X			
<b>Consideration of Public Oversight</b>				
13. The body responsible for QA reviews cooperates with its oversight body and shares information on the functioning of the QA review system, as needed.			X	The Control Committee is sharing information on the functioning of QA review system with OECT and the competent authority (Ministry of Finance). As mentioned above, it is intended to implement an independent audit oversight body with will orchestrate all QA review activities.
<b>Regular Review of Implementation and Effectiveness</b>				
14. Regular reviews of implementation and effectiveness of the system are performed.	X			Multiple meetings between OECT and the Control Committee were periodically held to assess the current system and overcome the faced difficulties.

**Action Plan Subject:** SMO 2–International Education Standards for Professional Accountants and Other Pronouncements issued by the IAESB

**Action Plan Objective:** Implementing Continuing Professional Development (CPD) Requirements

**Background:**

In Tunisia, the Ministry of Higher Education has responsibility for adopting the pre-qualification education requirements (decree 95-2604 modified by decrees 2013-3790). Universities are responsible for delivering the professional accountancy programs and OECT cooperates with them to update and continuously improve the syllabus. OECT is more generally responsible for training requirements (article 13 of the Law No. 88-108). OECT has adopted Continuing Professional Development (CPD) requirements on AGM dated February 23th, 2013, and it is in the course of delivering CPD courses and implementing monitoring mechanisms to ensure compliance with these requirements. The OECT has an affiliated internal training institute (Institut de Formation pour la Profession Comptable – IFPC) which is also providing training courses to members following an annual plan. IFPC has recently recruited permanent staff in order to reinforce its activity and improve its services.

Accountancy education starts at university level (after 13 years of elementary and high school). Accounting studies last 5 years divided into 3 years of undergraduate level (license) and 2 years of graduate level (Master). During these 5 years, it is required to accomplish two internships (3 months at the end of the “License” and 4 months at the end of the “Master”).

To qualify as certified accountants, candidates must succeed in a national exam called “Revision Comptable” which is organized by the Ministry of Higher Education. They are also required to accomplish three years of internship (2 years at least with an OECT member). OECT monitors the internship and has set up CPD courses to interns. Interns are required to produce 6 months progress reports and one final internship report.

During the internship, the interns are required to accomplish annually 40 training hours including 20 hours at the OECT internal training institute: (IFPC).

After the internship period, a dissertation must be prepared and defended in a university.

The IPD requirements are in process of being modified further the whole reform of the university education system in Tunisia. The reform will hopefully be finished by July 2017 and will come in force in the next academic year. OECT set up a task force that is working with the Ministry of Higher Education and academics on the reform of accounting curriculum. The working group of OECT is conceiving a complete accounting curriculum in accordance with IES, the model Accounting Curriculum of ISAR, the Common Content of Professional Accountancy Qualifications and the best practices worldwide. IES has not been translated into French and will be used in negotiations with the Ministry of Education in their English version.

The CPD program of OECT is compliant with IES 7 requirements. Indeed, OECT members shall accumulate a minimum of 120 hours over a three-year basis. Of the 120 hours required, a minimum of 60 hours must be verifiable learning and a member shall retain documentation to provide sufficient evidence to demonstrate their compliance with the CPD requirements.

**Action Plan Subject:** SMO 3–International Standards and other Pronouncements Issued by the IAASB  
**Action Plan Objective:** Continue to Use Best Endeavors to Maintain Ongoing Process to Adopt and Implement IAASB Pronouncements

**Background:**

The “commercial corporate law” in force in Tunisia provides that limited companies responding to some financial criteria (Based on Turnover, total Assets, number of employees) are required to nominate a statutory auditor (*Commissaire aux comptes*). Stock companies are all required to nominate a statutory auditor. There are also obligations to nominate a statutory auditor for all state-owned companies (that are not under commercial corporate law) and for NGOs having more than 100 KDT of income.

According to a Decree of the Ministry of Finance dated February 28, 2003, the auditing standards to be used in Tunisia are the International Standards on Auditing (ISAs). The same decree provides that the OECT has responsibility for drafting the auditing standards whereas the Ministry of Finance is responsible for approving them. In January 2016, OECT adopted the clarified ISAs published by the International Auditing and Assurance Standards Board (IAASB) and translated to French language by the Institut Canadien des Comptables Agréés (ICCA) for the exercises closed after December 15<sup>th</sup>, 2015. The following standards translated by the Belgian Institute IBE-IRE were also adopted by OECT board in January 2016 (ISRE 2410, ISAE3400, & ISRS4400).

Another deadline was defined for updating revised ISAs on audit opinion to be applicable in Tunisia starting from December 16, 2017 although early application is recommended. The training committee started the organization of training sessions on the new auditor report project. Indeed, a training session on new audit opinion was provided by IFPC for interns in December 2016. Similarly, a workshop on this subject was arranged by OECT for its members in early January 2017. Other training sessions on this topic are scheduled in 2017.

It's also worth to precise that the Standards Commission within OECT has prepared a "Guidance Note" on the new standard on the audit report and the other amended standards in French language. This guidance note was circulated to all OECT members and was the subject of a training program.

Please note that there is an ongoing study undertaken by the ministry of finance and related to the reform of audit and accounting profession: this study covers a wide range of topics and may lead to major changes in the quality control system, standard setting process, CPD and more. OECT is participating to this study and the results were released in October 2015 and discussions are still ongoing with the authorities on that base.

<i>Further Development of the Ongoing Convergence Process with IAASB Pronouncements</i>					
1.	June 2016	<p>The general principle is that OECT adopts the ISAs as published by the IAASB.</p> <p>When deemed necessary, OECT's Standards Committee creates a task force in charge of further developing the ongoing process of implementing IAASB pronouncements each time a consequent change is introduced to ISA and IAASB pronouncements (for instance, for the implementation of the ISA dealing with the audit report).</p>	As necessary	President of the OECT Standards Committee	OECT Standards Committee
2.	June 2016	<p>ISAs may be modified by the Task Force. The task force will develop guidelines for identifying the circumstances when OECT Standards Committee would consider modifying an ISA. It is anticipated that such modifications will be rare:</p> <ul style="list-style-type: none"> <li>a. Additions to a Clarified ISA will be limited to those required to comply with Tunisian legal and regulatory requirements;</li> <li>b. Amendments to a Clarified ISA will be limited to the following:</li> <li>c. The elimination of options (alternatives) provided by the Clarified ISAs;</li> <li>d. Requirements or guidance, where the ISA recognizes that different practices may apply in different jurisdictions and Tunisia is such a jurisdiction.</li> </ul> <p>The modified Clarified ISA will be called Tunisian Auditing Standard (TASs).</p> <p>This policy is set in compliance with the IAASB Policy Position on Modifications.</p>	As necessary	President of the OECT Standards Committee	OECT Standards Committee
3.	June 2016	<p>Incorporate new and amended Clarified ISAs that are translated by a Francophone professional body.</p> <p>Generally, OECT adopts IAASB standards and pronouncements as translated in French by CPA Canada. **Action Plan Subject:** SMO 4–IESBA Code of Ethics for Professional Accountants  
**Action Plan Objective:** Maintain conformity to IESBA Code of Ethics

**Background:**

OECT has responsibility for drafting the ethical requirements with regards to its members. As Ethic standards are part of professional standards, the adoption process is the same than ISA standards. OECT first adopted a French translation of the version of the International Ethics Standards Board for Accountants (IESBA) Code of Ethics (issued in June 2004), which was performed by the European Union. Additional ethical requirements for accountants are set in various Tunisian Laws, such as the Law 88-108 which established the OECT, the Financial Securities Law, and the Companies Law.

In January 2016, OECT adopted, the French translation of the revised Code of Ethics which was done by the French member bodies, Conseil Supérieur de l'Ordre des Experts-Comptables (CSOEC) and the Compagnie Nationale des Commissaires aux Comptes (CNCC). The professional body has adopted the revised IESBA Code of Ethics (July 2009). OECT will update the Code each time a new revision is issued by IESBA. The Companies Law contains some provisions which are more restrictive than the new NOCLAR standard, for example, the auditor face criminal charges if they do not disclose to the procurer any NOCLAR.

OECT monitors members' compliance with the Code of Ethics mainly by monitoring the compliance with legal provisions regarding the acceptance of audit engagements, independence, rotation, etc. In 2017, OECT set up an "observatory of Ethics" to monitor these issues.

Please note that there is an ongoing study undertaken by the ministry of finance and related to the reform of audit and accounting profession: this study covers a wide range of topics and may lead to major changes in the quality control system, standard setting process, CPD and more. OECT is participating to this study and the results were released in October 2015 and the discussions are still ongoing with the authorities on that base.

**Action Plan Subject:** SMO 5–International Public Sector Accounting Standards and Other Pronouncements Issued by the IPSASB  
**Action Plan Objective:** Continue to Use Best Endeavors to Promote the Use of IPSAS to the Relevant Government Ministry / Agency

**Background:**

The Ministry of Finance has responsibility for adopting public sector accounting standards (Public Accounting code law n°73-81) and has not adopted the International Public Sector Accounting Standards (IPSAS). In furtherance of SMO 5, OECT works to promote IPSAS to the appropriate Government authority and raises awareness of the importance of IPSAS through the organization of trainings, workshops and conferences.

Tunisia has set up, in 2016, an IPSAS council responsible of the implementation of IPSAS in Tunisia along with the budget reform (law 2013-1278). OECT nominated its representatives to the IPSAS Council and its technical Commissions who attends the meetings and promotes OECT’s position on the matter.

Accordingly, OECT has set up an “IPSAS committee” in order to participate to the IPSAS Council works. The committee is also participating in the project of implementation of IPSAS-based accounting rules for local authorities, on which a draft law was released. The President of IPSAS Committee within OECT is the one working with the government on a project of experimenting the implementation of IPSAS in some pilot local authorities.

OECT is promoting IPSAS by organizing or participating to workshops and congresses. OECT also offers CPD courses on IPSAS.

Moreover, OECT organized in 2012 the PAFA African Congress of Accountants. A conference entitled ‘Governance and Transparency in Governmental Sector’ where IPSAS implementation was discussed with government representatives.

In October 2013, the international congress of OECT celebrating its 30th anniversary will be focused on ‘Economic Reforms in Tunisia’. A workshop was dedicated on State budget reforms and IPSASs were presented as an important pillar of that reform as well as open budget.

The 2014, international congress was dedicated to regional development and several sessions were dedicated to accounting standards for public entities.

In October 2015, a session dedicated to IPSAS was done in the first congress of liberal professions union.

**Action Plan Subject:** SMO 6–Investigation and Discipline  
**Action Plan Objective:** Further Development of I&D Process

<b>Background:</b>					
<p>According to the law, the Control Committee is in charge of looking after compliance by all members with the rules, regulations and standards of the profession. In case of an infringement, it passes the matter / complaint to the Disciplinary Chamber of OECT, which procedures are defined by the professional body. In Tunisia, the representatives of the Justice Ministry and the Finance Ministry also have responsibility for investigating and disciplining accountants: the Disciplinary Chamber comprises one representative of the Justice Ministry and acting as president, three representatives of Ministry of Finance and Three elected professionals that are not board members. In general, the investigation and discipline mechanisms of the OECT Disciplinary Chamber incorporate the major elements set out in SMO 6.</p> <p>For 2017-2019, OECT needs to incorporate the remaining requirements of SMO 6 (including the requirements which were revised in 2012) into the I&amp;D mechanisms and raise its members' awareness of these procedures. The changes need the change of the law governing the accounting profession in Tunisia. A new law was adopted by an AGM and is now on the process of examination by relevant authorities (Ministry of Finance and then the parliament).</p>
