Appendix 6: Example of Another Auditor’s Confirmations (Paragraph A31)

International Standard on Auditing (ISA) 600 (Revised and Redrafted), “The Audit of Group Financial Statements” should be read in the context of the “Preface to the International Standards on Quality Control, Auditing, Assurance and Related Services,” which sets out the application and authority of ISAs.
Introduction

Scope of this ISA

1. This International Standard on Auditing (ISA) establishes standards and provides guidance on deals with additional matters relating to the audit of group financial statements (“group audits”) and, in particular, the involvement of other auditors, as defined in paragraph 7(g), in the group audits. The group auditor also applies the standards and considers the guidance in the other ISAs.

2. The standards and guidance in this ISA requirements, adapted as necessary in the circumstances, also apply where other auditors are involved in the audit of the financial statements of a single entity. For example, an auditor may plan to use the work of another auditors who observed the inventory count or inspected physical fixed assets at a remote locations.

The Effect on Audit Risk of Using the Work of Other Auditors

2. ISA 200, “Objective and General Principles Governing an Audit of Financial Statements” explains that audit risk is a function of the risk of material misstatement of the financial statements and the risk that the auditor will not detect such misstatements. In a group audit, this includes the risk that the other auditors may not detect a misstatement in the financial information of the component that could cause a material misstatement of the group financial statements, and the risk that this misstatement is not detected by the group auditor. This risk can be reduced by the group auditor being involved in the work performed by the other auditors. Involvement in the work performed by the other auditors may include the group auditor undertaking some or all of the following actions:

- Meeting with component management or the other auditors to obtain an understanding of the component and its environment.
- Reviewing the other auditors’ overall audit strategy and audit plan.
- Performing risk assessment procedures and participating in the assessment of risks of material misstatement. These may be performed with the other auditors, or by the group auditor.
- Determining and performing further audit procedures. These may be performed with the other auditors, or by the group auditor.
- Participating in the closing and other key meetings between the other auditors and component management.
- Reviewing relevant parts of the other auditors’ audit documentation.

3. The nature, timing and extent of involvement in the work performed by the other auditors necessary to reduce audit risk for the group financial statements to an acceptably low level are affected by factors such as the significance of the components, identified risks of material misstatement of the group financial statements, and the group auditor’s understanding of the other auditors.
4. Although other auditors may perform work on the financial information of components for the group audit, the group auditor is solely responsible for the audit opinion on the group financial statements (“group audit opinion”).

Effective Date

This ISA is effective for audits of group financial statements for periods beginning on or after December 15, 2006.

Objective to be Achieved

6. In relation to this ISA, the objective of the auditor is to determine whether the auditor is able to act as the group auditor and, if so, to:
   (a) determine the audit procedures to be performed on the consolidation and the work to be performed by the group auditor or the other auditors on the financial information of the components;
   (b) determine the group auditor’s involvement in the work performed by the other auditors;
   (c) establish appropriate communication with the other auditors; and
   (d) evaluate the audit evidence obtained in relation to the financial information of the components where the other auditors performed the work in order to obtain sufficient appropriate audit evidence to reduce audit risk in relation to the auditor’s report on the group financial statements to an acceptably low level.

4. The group auditor should obtain sufficient appropriate audit evidence on which to base the group audit opinion. To obtain such audit evidence, the group auditor should determine (a) the audit procedures to be performed on the consolidation, and (b) the type of work to be performed by the group auditor or other auditors on the financial information of the components.

Definitions

57. The following terms have the meanings attributed below are introduced in this ISA:
   (a) “Applicable financial reporting framework” means the financial reporting framework applicable to the group financial statements.
   (b) “Audit methodology” means the policies and procedures adopted by a firm and applied by the engagement team to perform audits of financial statements that are of a consistent quality.
   (c) “Component” means a head office, parent, division, branch, subsidiary, joint venture, associated company, or other entity whose financial information is or should be included in the group financial statements.
   (d) “Component management” means management responsible for preparing the financial information of a component.
(ee) “Group auditor” - means the auditor engagement partner who signs the auditor’s report on the group financial statements. The obligations or responsibilities of the group auditor may be fulfilled by either the engagement partner or another member of the engagement team under the direct supervision of the engagement partner. Where it is expressly intended that the obligation or responsibility be fulfilled by the engagement partner, the term “group engagement partner” rather than “group auditor” is used.

(fd) “Group financial statements” - means financial statements that include or should include financial information of more than one component. The term “group financial statements” also refers to combined financial information aggregating the financial information of components in circumstances where there is no parent.

(ge) “Group management” - means Management responsible for preparing and presenting the group financial statements.

(hf) “Group-wide controls” - means Internal controls established by group management over financial reporting.

(ig) “Other auditor” or “another auditor” - includes a related auditor and an unrelated auditor. An auditor other than the group auditor who performs work on the financial information of one or more components for the group audit.

(j) “Parent” means the entity whose management prepares or should prepare group financial statements.

(k) “Related auditor” means an auditor from the group auditor’s firm or from a network firm who (i) operates under, and complies with, common monitoring policies and procedures as provided for in paragraph 87 of International Standard on Quality Control (ISQC) 1, “Quality Control for Firms that Perform Audits and Reviews of Historical Financial Information, and Other Assurance and Related Services Engagements,” and (ii) performs work on one or more components for purposes of the audit of the group financial statements.

---

1 Where the audit of the group financial statements is conducted by joint auditors, the joint auditors collectively constitute the group auditor. This ISA, however, does not establish standards or provide guidance on the relationship between joint auditors and the work that one joint auditor performs in relation to the work performed by the other joint auditor.

2 The proposed revised “Glossary of Terms” (December 2004) defines auditor as follows: “… the term ‘auditor’ is used to describe either the engagement partner or the audit firm. Where it applies to the engagement partner, it describes the obligations or responsibilities of the engagement partner. Such obligations or responsibilities may be fulfilled by either the engagement partner or a member of the audit team. Where it is expressly intended that the obligation or responsibility be fulfilled by the engagement partner, the term ‘engagement partner’ rather than ‘auditor’ is used.”

3 Where the group audit of the group financial statements is conducted by joint auditors, the joint auditors collectively constitute the group auditor. This ISA, however, does not establish standards or provide guidance on deal with the relationship between joint auditors and the work that one joint auditor performs in relation to the work performed by the other joint auditor.

4 ISQC 1, paragraph 87 reads as follows:
(l) “Reporting package” ordinarily consists of standard formats for providing financial information for incorporation in the group financial statements. Reporting packages generally do not take the form of complete financial statements prepared and presented in accordance with the applicable financial reporting framework.

(mh) “Significant component” means a component that has been identified at the group level as likely to include significant risks of material misstatement of the group financial statements (i.e., significant risks that require special audit consideration – see ISA 315, “Understanding the Entity and Its Environment and Assessing the Risks of Material Misstatement”). This could be due to (i) the nature of, and circumstances specific to, the component (risk), or (ii) the individual financial significance of the component to the group (size). (See paragraphs 15–16.)

(n) “Type of work” means the type of work that the group auditor or another auditor, at the request of the group auditor, performs on the financial information of a component for purposes of the audit of the group financial statements. Such procedures may, depending on the circumstances, be an audit performed in accordance with ISAs, using either a materiality level determined by the group auditor or a lower materiality level determined by the other auditor where the circumstances in paragraph 57 apply; an audit of specified account balances; specified audit procedures; or a review of the financial information of the component.

(o) “Uniform accounting policies” means the specific principles, bases, conventions, rules, and practices adopted by the group, based on the applicable financial reporting framework, that the components use to report similar transactions consistently. These policies are ordinarily described in the financial reporting procedures manual and reporting package issued by group management.

(p) “Unrelated auditor” means an auditor other than the group auditor or a related auditor who performs work on one or more component for purposes of the audit of the group financial statements.

8. Reference to “the applicable financial reporting framework” means the financial reporting framework applicable to the group financial statements. In this ISA, reference to “consolidation” also includes the application of the equity method of accounting, and the

“Some firms operate as part of a network and, for consistency, may implement some or all of their monitoring procedures on a network basis. Where firms within a network operate under common monitoring policies and procedures designed to comply with this ISQC, and these firms place reliance on such a monitoring system:

(a) At least annually, the network communicates the overall scope, extent and results of the monitoring process to appropriate individuals within the network firms;

(b) The network communicates promptly any identified deficiencies in the quality control system to appropriate individuals within the relevant network firm or firms so that the necessary action can be taken; and

(c) Engagement partners in the network firms are entitled to rely on the results of the monitoring process implemented within the network, unless the firms or the network advises otherwise.”
aggregation of the financial information of components in circumstances where there is no parent.

Requirements

Acceptance and Continuance as Group Auditor

Expectation to Obtain Sufficient Appropriate Audit Evidence

6. ISQC 1 and ISA 220, “Quality Control for Audits of Historical Financial Information” establish standards and provide guidance on accepting and continuing client relationships and specific audit engagements.

7. In deciding whether to accept or continue an engagement to audit group financial statements, the group auditor should also determine whether the group auditor will be able to obtain sufficient appropriate audit evidence on which to base the audit opinion on the group financial statements. Other auditors may perform work on the financial information of one or more components for purposes of the audit of the group financial statements. The group auditor, however, takes responsibility for the audit opinion on the group financial statements (for purposes of this ISA referred to as “group audit opinion”). In order to obtain sufficient appropriate audit evidence, the group auditor performs the work on the consolidation and, as described in this ISA, either performs the work, or is involved in the work to be performed by other auditors, on the financial information of the components.

9. The group engagement partner shall accept or continue an engagement to audit group financial statements only if the group engagement partner has reasonable expectation of obtaining sufficient appropriate audit evidence in relation to the financial information of components and the consolidation to reduce audit risk for the group financial statements to an acceptably low level by:

(a) Performing the work on the consolidation, and

(b) Either performing the work on the financial information of significant components, or being involved in the work that the other auditors perform on the financial information of significant components to the extent necessary to obtain sufficient appropriate audit evidence. (Ref: Para A4-A6)

10. For purposes of determining whether to accept or continue an engagement to audit group financial statements, the group engagement partner can reasonably expect to obtain such audit evidence, the group auditor should shall obtain an understanding of the group, its components, and their environments, sufficient to:

(a) Identify components where other auditors will perform the work on the financial information and

(b) Determine which of those components are likely to be significant. (Ref: Para A1-A5)

Access to Information

18. The group auditor should not accept an engagement to audit group financial statements if the group auditor’s access to component information, those charged
with governance of components, component management, or other auditors (including relevant parts of their audit documentation) will be restricted; and The possible effect of the group auditor’s inability to obtain sufficient appropriate audit evidence is material and pervasive to the group financial statements, such that the group auditor is likely to disclaim an opinion on the group financial statements.

2411. The group auditor’s access to component information, those charged with governance of components, component management, or the other auditors (including relevant audit documentation sought by the group auditor) may be restricted. Where restrictions on access cannot be overcome by group management, or it is impractical for the group auditor to be involved in the work performed by the other auditors, the group auditor shall consider whether sufficient appropriate audit evidence to reduce audit risk for the group financial statements to an acceptably low level can be obtained by other means. In the case of a significant component, however, it is unlikely that the group auditor will be able to obtain such audit evidence by other means. (Ref: Para. A7-A9) If the group auditor concludes that it does not constitute sufficient appropriate audit evidence, the group auditor considers the possible effect on the group financial statements and the group audit opinion.

2212. If the group auditor concludes that, because of restrictions on access or impracticalities, the group auditor will not be able to obtain sufficient appropriate such audit evidence on which to base an unmodified group audit opinion, the group auditor shall consider the possible effect of this inability on the group financial statements. If, in the group auditor’s judgment, the possible effect is material and pervasive to the group financial statements, thus requiring a disclaimer of opinion, the group auditor shall inform group management, or those charged with governance of the group, that it is not possible to accept the engagement.

23. In some circumstances, the possible effect of the inability to obtain sufficient appropriate audit evidence is in the group auditor’s judgment material and pervasive to the group financial statements, thus requiring a disclaimer of opinion (see [proposed] ISA 705, “Modifications to the Opinion in the Independent Auditor’s Report”). In these circumstances, the group auditor informs group management that it is not possible for the group auditor to accept the engagement.

2413. If the restrictions on access occurred after accepting the engagement and these restrictions cannot be overcome by group management, or by the group auditor obtaining sufficient appropriate audit evidence by other means, the group auditor shall consider the possible effect of this inability to obtain sufficient appropriate audit evidence on the group financial statements. When the possible effect of this inability is material and pervasive to the group financial statements, the group auditor considers resigning from the engagement. Where law or regulation does not permit an auditor not to accept or resignation from an engagement, the group auditor shall express a disclaimer of opinion on the group financial statements. (Ref: Para. A10)

Consideration Obtaining an Understanding of the Other Auditors

14. To determine the extent to which the group auditor will be able to use the work performed by the other auditors, the group auditor shall obtain an understanding of the following:
(a) The professional qualifications of the other auditors;
(b) The other auditors’ compliance with applicable ethical requirements and, in particular, their independence and professional competence;
(c) The quality control systems of the other auditors’ firms; and
(d) Other factors that may affect the ability of the group auditor to use the work of the other auditors. (Ref: Para. A12-A15)

This requirement does not apply to members of the engagement team under direct supervision of the group engagement partner. Such individuals are subject to the requirements of ISA 220, “Quality Control for Audits of Historical Financial Information.”

3215. In the case of other auditors that operate under and comply with common monitoring policies and procedures as provided for in International Standard on Quality Control (ISQC) 1, “Quality Control for Firms that Perform Audits and Reviews of Historical Financial Information, and Other Assurance and Related Services Engagements,” the group auditor shall evaluate any deficiencies communicated in accordance with ISQC 1 that could affect the group audit. The group auditor considers any communications received in accordance with ISQC 1, paragraph 87, regarding the result of the related auditor’s quality control process that are relevant to the audit of the group financial statements. The group auditor considers whether any noted deficiencies (a) could affect the audit of the group financial statements, and (b) if so, whether measures taken by the related auditor’s firm to rectify such deficiencies appear to be sufficient in the audit of the group financial statements.

3616. In all other cases, the group auditor should confirm that the other auditors whether:
(a) Their unrelated auditor’s firm’s quality control systems comply with ISQC 1; and
(b) Remedial action is taken promptly in relation to issues identified from their firms’ monitoring process; and
(b) There are any issues noted in recent monitoring reports outstanding issues resulting from their firms’ monitoring processes that are likely to affect significantly the work that the unrelated other auditors will perform on the financial information of the components. This confirmation is obtained either directly by the group auditor.

---

5 Paragraph 87 of ISQC 1 reads as follows: Some firms operate as part of a network and, for consistency, may implement some or all of their monitoring procedures on a network basis. Where firms within a network operate under common monitoring policies and procedures designed to comply with this ISQC, and these firms place reliance on such a monitoring system:
(a) At least annually, the network communicates the overall scope, extent and results of the monitoring process to appropriate individuals within the network firms;
(b) The network communicates promptly any identified deficiencies in the quality control system to appropriate individuals within the relevant network firm or firms so that the necessary action can be taken; and
(c) Engagement partners in the network firms are entitled to rely on the results of the monitoring process implemented within the network, unless the firms or the network advises otherwise.
or by the person assigned operational responsibility for the group auditor’s firm’s quality control system, from the engagement partner, who will be responsible for the work to be performed on the financial information of the component, or the person assigned operational responsibility for the unrelated auditor’s firm’s quality control system.

3717. When bodies external to the other auditors’ firms have conducted quality control reviews of the other auditors’ firms, the group auditor shall obtain a copy of any report of the unrelated auditor’s latest review that is published by the body responsible for conducting external quality control reviews, and is publicly available confirmations from the other auditors whether there are any outstanding issues resulting from the reviews that are likely to affect significantly the work that the other auditors will perform on the financial information of the components.

3818. When the unrelated another auditor is not independent of the client, or based on the group auditor’s understanding of another auditor, the group auditor has serious concerns about that auditor’s:

(a) the professional qualifications;

(b) compliance with applicable ethical requirements, including the other auditor’s—or professional competence of the unrelated auditor; or

(c) the firm’s quality control system of the unrelated auditor’s firm,

the group auditor shall obtain audit evidence relating to the financial information of the component without using the work of the unrelated that auditor. Where the group auditor is unable to obtain sufficient appropriate audit evidence relating to the financial information of the component, the group auditor considers the effect of this scope limitation on the group audit opinion.

### Enhancing the Obtaining an Understanding of the Group, Its Components, and Their Environments, and Obtaining an Understanding of the Consolidation Process Assessing the Risks of Material Misstatement of the Group Financial Statements

3919. The group auditor shall:

(a) enhance the understanding of the group, its components, and their environments, obtained in accordance with paragraph 11 during the acceptance or continuance stage, and

(b) obtain an understanding of the consolidation process, including the group financial reporting procedures manual, proposed reporting package, and related instructions issued by group management to components. (Ref: Para. A15a-A25)

20. The group auditor’s understanding shall be sufficient to:

(a) Identify, at group level, significant risks of material misstatement of the group financial statements, and;
(b) Confirm the group auditor’s initial identification of significant components (see paragraph 11); and (b) Determine the audit procedures to be performed on the consolidation; and (c) Determine the type of work to be performed on the financial information of the components.

(c) Assess the risks of material misstatement of the group financial statements. (Ref: Para. A26-A27)

As part of the risk assessment, the group auditor shall determine which of the risks identified are significant risks.

Materiality

4721 In addition to materiality determined for the group financial statements as a whole when establishing the overall audit strategy for the group audit, the group auditor shall determine the materiality level(s) to be used by the other auditors in planning and performing the work on the financial information of the components for purposes of the group audit of the group financial statements. To allow for aggregation of identified uncorrected misstatements and possible undetected misstatements, the component materiality level(s) are lower than the group materiality level(s). The structure of the group may affect the group auditor’s determination of materiality level(s) for individual components. For example, it is likely that the greater the number of components that are of similar financial significance, the lower the materiality level(s) for components will be.

4922 When planning the work to be performed on the financial information of a component for purposes of the group audit of the group financial statements, the auditor responsible for performing that work shall determine an amount lower than the component materiality level(s) referred to in paragraph 47 for purposes of assessing the risks of material misstatement and designing further audit procedures to respond to assessed risks. This will allow for the possibility that some misstatements of lesser amounts than the materiality level(s) for the component could be material in the aggregate.

Responding to Assessed Risks

5023 The group auditor shall determine the type of work to be performed by the group auditor or the other auditors on the financial information of the components, and the group auditor’s involvement in the work performed by the other auditors, to respond to the assessed risks of material misstatement of the group financial statements. Factors that affect this determination include:

- The significance of the component;
- The identified significant risks;
- The group auditor’s evaluation of the design of group-wide controls and determination whether they have been implemented; and
- The group auditor’s understanding of the other auditors.
24. If the nature, timing and extent of the work to be performed on the financial information of the components, or the group auditor’s involvement in the work to be performed by the other auditors, are based on an expectation that group-wide controls are operating effectively, the group auditor shall test the operating effectiveness of those controls.

Determining the Work to be Performed on the Financial Information of Components

Significant Components

5225. For a component that, is significant due to its nature of and circumstances specific to that component, has been identified at the group level as likely to include significant risks of material misstatement of the group financial statements (see paragraph 15), the group auditor ordinarily performs or requests, or another auditors at the request of the group auditor, shall perform one of the following:

(a) An audit in accordance with ISAs performed using either a materiality level determined by the group auditor, or a lower materiality level determined by the other auditor where the circumstances in paragraph 57.32 apply.

(b) An audit of specified account balances relating to the identified significant risks.

(c) Specified audit procedures relating to the identified significant risks. (Ref: Para. A28)

5326. For a component that, is significant due to its individual financial significance to the group, is likely to include significant risks of material misstatement of the group financial statements (see paragraph 16), the group auditor ordinarily performs or requests, or another auditors at the request of the group auditor, shall perform an audit in accordance with ISAs, using either a materiality level determined by the group auditor; or a lower materiality level determined by the other auditor where the circumstances in paragraph 57.32 apply.

Components that are Not Individually Significant in the Aggregate

5527. The remaining components are referred to as components that are not individually significant. To obtain sufficient appropriate audit evidence to reduce audit risk for the group financial statements to an acceptably low level, the group auditor shall select components that are not individually significant for which the group auditor, or another auditor at the request of the group auditor, shall perform one of the following on the financial information of the remaining individual components selected could include one of the following:

(a) An audit performed in accordance with ISAs, using either a materiality level determined by the group auditor; or a lower materiality level determined by the other auditor where the circumstances in paragraph 57.32 apply.

(b) An audit of specified account balances.

(c) Specified audit procedures.

(d) A review of the financial information of the component performed in accordance with standards determined by the group auditor. (Ref: Para. A28-A30)
28. For components not selected, the group auditor shall perform analytical procedures at the group level.

Involvement in the Work Performed by the Other Auditors

5929 The group auditor’s involvement in the work performed by another auditor—ordinarily may includes the group auditor undertaking some or all of the following actions:

- Meeting with component management or the other auditor to obtain an understanding of the component and its environment.
- Reviewing the other auditor’s overall audit strategy and audit plan.
- Performing risk assessment procedures and participating in the assessment of risks of material misstatement. These may be performed with the other auditor, or by the group auditor.
- Determining and performing further audit procedures. These may be performed with the other auditor, or by the group auditor.
- Participating in the closing and other key meetings between the other auditor and component management.
- Reviewing relevant parts of the other auditor’s audit documentation. In the case of an unrelated auditor, the group auditor may request a related auditor to undertake the actions on behalf of the group auditor.

60. The extent of the group auditor’s involvement in the work performed by another auditor is affected by matters such as the group auditor’s evaluation of (a) the significance of the component, (b) the professional qualifications and professional competence of the other auditor, and (c) of the quality control system of the other auditor’s firm. For example, the more significant the component, or the lower the level of the group auditor’s satisfaction with the professional qualifications and professional competence of the other auditor, or with the quality control system of the other auditor’s firm, the greater is the involvement of the group auditor, or related auditor on behalf of the group auditor, in the other auditor’s work.

Significant Components—Risk Assessment

6130 When another auditor is requested to perform the work on the financial information of a significant component, the group auditor should be involved in the other auditor’s risk assessment to identify significant risks of material misstatement of the group financial statements. The group auditor shall:

62. When an unrelated auditor performs the work on the financial information of a significant component, the group auditor, or a related auditor on behalf of the group auditor, is involved in the unrelated auditor’s risk assessment procedures. As part of this involvement, the group auditor or the related auditor:

(a) Discusses with the other auditor or component management the component’s business activities that are significant to the group, including the regulatory, economic and political environments in which those activities take place;
(b) Discusses with the unrelated other auditor the susceptibility of the component to material misstatement of the financial information due to fraud or error; and

(c) Reviews the unrelated other auditor’s documentation of the identified and assessed risks of material misstatement. Such documentation may be in the form of a memorandum, reflecting the unrelated other auditor’s conclusion with regard to the identified and assessed risks of material misstatement.

63. When a related auditor performs the work on the financial information of a significant component, the group auditor reviews the related auditor’s documentation of the identified and assessed risks of material misstatement. Such documentation may be in the form of a memorandum, reflecting the related auditor’s conclusion with regard to the identified and assessed risks of material misstatement.

64. When a related auditor, on behalf of the group auditor, has been involved in the risk assessment procedures of an unrelated auditor, the group auditor reviews the related auditor’s documentation of that involvement. Such documentation may be in the form of a memorandum.

Identified Significant Risks of Material Misstatement—Further Audit Procedures

65. When significant risks of material misstatement of the group financial statements have been identified in a component on which another auditor performs the work, the group auditor and together with the other auditor should shall determine the further audit procedures to be performed to respond to the identified significant risks. The group auditor shall consider whether, based on the circumstances, it is necessary to be involved in performing further audit procedures.

66. In certain circumstances, the group auditor may want to be involved, or to involve a related auditor, in performing further audit procedures. The nature, timing and extent of this involvement will be affected by the group auditor’s assessment of the significant risks to which the component is subject, its individual financial significance, and the group auditor’s evaluation of the professional qualifications and professional competence of the other auditor, and the quality control system of that auditor’s firm.

67. When a related auditor, on behalf of the group auditor, has been involved in the further audit procedures of an unrelated auditor, the group auditor reviews the related auditor’s documentation of that involvement. Such documentation may be in the form of a memorandum.

Components that are Significant in the Aggregate

68. To obtain sufficient appropriate audit evidence on which to base the group audit opinion, it may be necessary for the group auditor, or a related auditor on behalf of the group auditor, to be involved in the work to be performed by an unrelated auditor on the financial information of a component that is significant in the aggregate. This involvement may include some or all of the procedures described in paragraph 59, a review of the financial information of the component, or analytical procedures performed at the group level.
Components Subject to Audit by Statute, Regulation or Other Reason

Statute, regulation or other authority may require the audit of the financial statements of a component. The other auditor may be required by statute, regulation or for another reason to express an audit opinion on the financial statements of a component. The group auditor may decide to use this audit to provide audit evidence for the purposes of the group audit of the group financial statements. In these circumstances, the group auditor shall:

(a) Evaluate the effect of the financial reporting framework applied in preparing the financial statements of the component, and the auditing standards applied by the other auditors; and

(b) The group auditor also considers whether the audit of the financial statements of the component will be performed in time to communicate the other auditor’s memorandum or report of work performed to the group auditor (see paragraph 103) completed in time to meet the group reporting timetable.

If the component has been recently acquired by the group and the risk assessment procedures and further audit procedures therefore have already been performed by the other auditor at the component, the group auditor shall determine whether additional audit procedures are necessary to meet the requirements of this ISA.

Consolidation

The group auditor should determine the work to be performed on the consolidation to respond to the assessed risks of material misstatement of the group financial statements arising from the consolidation process.

The consolidation process may require adjustments to amounts reported in the group financial statements that do not pass through the usual transaction processing systems, and that may not be subject to the same internal controls to which other financial information is subject. These adjustments typically consist of consolidation adjustments and reclassifications. The group auditor shall:

(a) Considers the appropriateness and completeness of the consolidation adjustments, as well as the accuracy of calculations;

(b) Considers whether the consolidation significant adjustments appropriately reflect the events and transactions underlying them adjustments;

(c) Determines whether significant adjustments have been correctly processed, and authorized by group management and, where applicable, by component management, and are supported by sufficient appropriate documentation; and

(d) Determine whether significant adjustments are properly supported and sufficiently documented;

(e) Checks the reconciliation and elimination of intra-group transactions and unrealized profits, and intra-group account balances; and

(f) Consider whether indicators of possible management bias exist.
Components that operate in diverse industry segments, or are located in jurisdictions that require different financial reporting frameworks, may use inconsistent accounting policies. If required by the applicable financial reporting framework, group management will ordinarily eliminate such inconsistencies by requiring:

(a) requiring component to prepare financial information consistent with the accounting policies applied to the group financial statements;
(b) requiring component management to disclose the differences between the accounting policies applied to the component’s financial information and those applied to the group financial statements, and making the adjustment on consolidation.

In these circumstances, the group auditor considers whether group or component management has appropriately adjusted the component’s financial information for purposes of preparing and presenting the group financial statements. Where another auditor performs the work on the financial information of a component, the group auditor requests the other auditor to confirm to the group auditor that such adjustments have been made.

The group auditor should determine whether the financial information identified in the communication of the other auditor’s memorandum or report of work performed is the financial information that is incorporated in the group financial statements. (See paragraph 103(e).)

If the group financial statements include the financial statements of any components with year-ends that differ from that of the group, the group auditor shall:

(a) determines whether this is acceptable under the applicable financial reporting framework;
(b) The group auditor also considers the component’s results between its financial year-end and the date of the group financial statements, and identifies significant transactions, including intra-group transactions and unrealized profits, or other events and disclosures that need to be reflected in or eliminated from the group financial statements. Where another auditor performs the work on the financial information of a component, the group auditor requests the other auditor to perform the procedures the group auditor considers necessary for that consideration and identification.

Sometimes adjustments that are processed on consolidation relate to misstatements. Where these adjustments have not been processed in the relevant component’s accounting records, the group auditor requests group management to have them processed appropriately and, if applicable and not prohibited by confidentiality requirements, informs the other auditor.

Subsequent Events

For significant components, the group auditor should perform, or request the other auditors to perform, procedures designed to identify events at those components between the dates of the financial information of the components and the date of the auditor’s report.
on the group financial statements. The group auditor determines the date up to which subsequent events reviews at components are performed, i.e., the date of the auditor’s report on the group financial statements.

For components that are not individually significant in the aggregate, the group auditor ordinarily inquires from shall require the other auditors to communicate to the group auditor whether they are aware of subsequent events that may require an adjustment to or a disclosure in the group financial statements.

Communication with the Another Other Auditors

When another auditor performs the work on the financial information of a component, the group auditor—should shall communicate, as early as possible, the group auditor’s requirements to the other auditor. The group auditor issues This communication as early as possible, ordinarily in the form of a letter of instruction, that sets out: (a) the work to be performed, (b) the nature of the other auditor’s memorandum or report of work performed, and (c) the confirmations required by the group auditor.

(a) The confirmations required by the group auditor;

(b) The work to be performed; and

(c) The form and content of the other auditor’s memorandum or report of work performed.

The group auditor requests the other auditor to confirm (a) receipt of the group auditor’s letter of instruction, (b) that the other auditor will undertake the requested work, and (c) that the other auditor understands that the group auditor will consider and may use the other auditor’s work for purposes of the audit of the group financial statements.

In the case of an unrelated auditor, the group auditor requests confirmation whether (a) the unrelated auditor’s firm’s quality control system complies with ISQC 1, and (b) there are any issues noted in recent monitoring reports that are likely to significantly affect the work that the unrelated auditor will perform on the financial information of the component (see paragraph 36).

The group auditor’s required confirmations, which are obtained as early as possible in the audit process to enable the group auditor to consider their possible effect on the group audit, should shall include the following:

(a) Confirmation of receipt of the group auditor’s letter of instruction.

(b) Confirmation whether the other auditor will be able to comply with the instructions.

(c) Confirmation whether the instructions are clear and understood by the other auditor.

(d) Acknowledgement that the group auditor may consider it necessary to be involved in the other auditor’s work.

(e) Acknowledgement that the group auditor will evaluate and may use the other auditor’s work for the group audit.
confirmation whether the other auditor sufficiently understands, and will comply with, the relevant ethical requirements, including independence and professional competence, to fulfill the other auditor’s responsibilities in the group audit of the group financial statements.6

(g) Confirmation whether the other auditor sufficiently understands the applicable financial reporting framework to fulfill the other auditor’s responsibilities in the group audit of the group financial statements. (The group financial reporting procedures manual often describes the characteristics of the applicable financial reporting framework.)

(h) Confirmation whether the other auditor sufficiently understands the auditing or other standards applicable to the group audit of the group financial statements to fulfill the other auditor’s responsibilities in the group audit of the group financial statements. (Ref: Para. A31) It is important to obtain these confirmations as early as possible in the audit process to enable the group auditor to consider their possible effect on the audit of the group financial statements. Appendix 6 contains an example of confirmations by another auditor.

9942. The group auditor’s communication about the work to be performed—shall communicate—include the following to the other auditor:

(a) The type of work to be performed on the financial information of the component.

(b) Identified significant risks, including fraud risks, identified at the group level, that are relevant to the work of the other auditor. This communication occurs when the group auditor or a related auditor on behalf of the group auditor, is not involved in the other auditor’s risk assessment procedures (see paragraphs 59-68). The group auditor should request the other auditor to inform the group auditor of any other identified significant risks that may affect the group financial statements.

(c) The group auditor communicates to the other auditor—shall—laws and regulations applicable to the parent that are relevant to the other auditor’s work. The group auditor shall request the other auditor to communicate any non-compliance with laws and regulations applicable to the component that could materially affect the group financial statements.

(d) The group auditor should provide the other auditor with a list of related parties prepared by group management, and any other related parties the group auditor is aware of. The group auditor shall request the other auditor to be alert for transactions that appear unusual in the circumstances and that may indicate the existence of previously unidentified related parties. The group auditor—should—shall

---

6 When there are several components in the group and their names may not be known to the other auditor, it is advisable for the group auditor to list them in the letter of instruction to facilitate the other auditor’s assessment of compliance with the relevant independence requirements.
request the other auditor to communicate the names of any additional related parties, and the types of transactions with such related parties. The group auditor shall communicate such additional related parties to the other auditors.

(e) 102. The group auditor should request timely communication of The fact that material weaknesses in controls that have come to the attention of the other auditor during the performance of the work on the financial information of the component, and information that indicates that a fraud may exist, have to be communicated to the group auditor without undue delay. (Ref: Para. A32)

10343. The group auditor should obtain from the other auditor a memorandum or report of the work performed on the financial information of the component. This work performed is obtained at the conclusion of such work, and shall contains matters relevant to the group auditor’s conclusion with regard to the group audit of the group financial statements. In particular, this memorandum or report it shall:

(a) States whether the other auditor has complied with the quality control policies and procedures of that auditor’s firm;

(b) States whether the other auditor has complied with the relevant ethical requirements, including independence and professional competence;

(c) States whether the other auditor has complied with auditing or other standards applicable to the audit of the group financial statements;

(d) Identifies the financial information of the component on which the other auditor is reporting;

(e) Sets out the work performed by the other auditor. Describe the work performed by the other auditor, including, where applicable, materiality used to plan and perform the work, a list of identified significant risks, the other auditor’s response to such risks, and the results of further audit procedures;

(f) Lists corrected and uncorrected misstatements of the financial information of the component (the list does not include misstatements that were below the threshold communicated by the group auditor for clearly trivial misstatements), and note identified indicators of possible management bias;

(g) Explains any identified material weaknesses in internal control over financial reporting at the component level;

(h) Sets out other significant matters that the other auditor communicated or expects to communicate to those charged with governance of the component;

(i) Sets out any other matters that the other auditor wishes to draw to the attention of the group auditor; and

(j) Sets out the other auditor’s overall findings, conclusions or opinion.

Evaluating the Sufficiency and Appropriateness of Audit Evidence Obtained
Evaluating the Adequacy of Another Auditor’s Work

44. The group auditor shall obtain and read the other auditors’ memorandums or reports of work performed on the financial information of the components.

Where the group auditor is unable to obtain the other auditor’s memorandum or report of work performed, the group auditor shall consider the effect of this scope limitation on the group audit opinion.

46. The group auditor shall consider whether it is necessary to discuss significant matters arising from another auditor’s memorandum or report of work performed with the other auditor, component management or group management.

47. Based on the group auditor’s reading of the other auditors’ memorandums or reports of work performed, the group auditor shall consider whether it is necessary to review other relevant parts of another auditor’s audit documentation. (Ref: Para. A33)

If the group auditor concludes that the work of another auditor is inadequate for the group auditor’s purposes, the group auditor shall determine:

(a) additional procedures to be performed; and
(b) depending on the circumstances, whether such additional procedures are to be performed by the other auditor or by the group auditor.

Sufficiency and Appropriateness of Audit Evidence

If the group auditor concludes that sufficient appropriate audit evidence has not been obtained, the group auditor shall obtain further audit evidence, if possible. In the case of components on which other auditors performed the work, the group auditor may request the other auditors to perform additional procedures. If this is not feasible, the group auditor performs the group auditor’s own procedures on the financial information of the components. When the group auditor has not been able to perform sufficient additional audit procedures, the group auditor shall consider the effect of this scope limitation on the group audit opinion. (Appendix 1 contains an example of a qualified opinion.)

Considering the Effect of the Other Auditor’s Memorandums or Reports of Work Performed on the Auditor’s Report on the Group Financial Statements

The group auditor shall consider the effect of any disagreement with component management or inability to obtain sufficient appropriate audit evidence communicated by the other auditor’s memorandum or report of work performed (see paragraph 103) on the auditor’s report on the group financial statements.
88. The group auditor considers whether matters communicated by another auditor are of such a nature and significance in relation to the group financial statements that a modification of the auditor’s opinion on the group financial statements is required.

8952. Uncorrected misstatements that are material to the financial information of the component may be immaterial when aggregated at the group level. As a result, they may not affect the group auditor’s opinion on the group financial statements. Conversely, uncorrected misstatements that are immaterial to the financial information of the component may be material when aggregated with uncorrected immaterial misstatements of the financial information of other components. The group auditor shall consider the aggregated effect of the uncorrected immaterial misstatements of the financial information of the components on the group audit opinion.

53. The group auditor shall not refer to the involvement of the other auditors in the auditor’s report on the group financial statements.

Communication with Group Management and Those Charged with Governance

Communication with Group Management

9054. The group auditor shall make group management aware, as soon as practicable without undue delay and at an appropriate level of responsibility, of:

(a) Material weaknesses in the design or operation of group-wide controls, including controls over the preparation and presentation of the group financial statements;

(b) The group auditor also makes group management aware of material weaknesses in internal controls at components that have been identified by the group auditor, or that have been brought to the attention of the group auditor by the other auditors, that the group auditor judges are of significance to the group.

9155. If fraud has been identified in components, or information indicates that a fraud may exist, the group auditor shall communicates this as soon as practicable to group management. If the group auditor believes or suspects that group or component management may be involved in the fraud, the group auditor shall communicates this to those charged with governance of the group.

56. Where another auditor is required by statute, regulation or for another reason to express an audit opinion on the financial statements of a component, and the group auditor becomes aware of matters that may be significant to the financial statements of the component of which component management may be unaware, the group auditor shall request group management to inform component management of such matters for the purpose of the component audit. When group management refuses to communicate the matter to component management, the group auditor shall discuss the matter with those charged with governance of the group. (Ref: Para. A35)

Communication with Those Charged with Governance

92. Proposed ISA 260 (Revised), “Communication with Those Charged with Governance” establishes standards and provides guidance on communication with those charged with governance.
57. In an group audit of group financial statements, the group auditor should also shall communicate with those charged with governance of the group the following to those charged with governance of the group matters in addition to those required by [proposed] ISA 260, “Communications with Those Charged with Governance:”

(a) The planned type of work to be performed on the financial information of the components.

(b) The group auditor’s planned involvement in the work to be performed by the other auditors on the financial information of significant components.

(c) Instances where the group auditor’s evaluation of the work of another auditor gave rise to a concern about the quality of the work performed by that other auditor.

(d) Any limitations on the group audit of the group financial statements. For example, the group auditor’s access to component information, those charged with governance of components, component management, or the other auditors (including relevant parts of their audit documentation sought by the group auditor) may have been restricted. (Ref: Para. A36)

Documentation

10758. Proposed ISA 230 (Revised), “Audit Documentation” and other ISAs establish standards and provide guidance on audit documentation. In an group audit of group financial statements, the group auditor should also shall document the following matters in addition to those required by ISA 230 (Revised), “Audit Documentation” and the other ISAs: The basis for the group auditor’s conclusion to accept or continue the engagement as regards the group auditor’s ability to obtain sufficient appropriate audit evidence on which to base the group audit opinion where other auditors will perform the work on the financial information of some components.

(a) The results of the consideration of the professional qualifications, independence, and professional competence of the other auditors, and the quality control systems of their firms. The group auditor’s understanding of the other auditors, and the nature, timing and extent of the group auditor’s or related auditors’ involvement in the work performed by the other auditors. The results of the risk assessment performed at the group level, and a description of the audit procedures to be performed on the consolidation and the work to be performed on the financial information of the components. Identified and assessed significant risks of material misstatement of the group financial statements, the further audit procedures performed to respond to such risks, and the related results.

(b) The group auditor’s communications with the other auditors about the group auditor’s requirements.

(c) The group auditor’s conclusion as to evaluation whether the group auditor has obtained sufficient appropriate audit evidence of the adequacy of the work of the group auditor and other auditors for the group auditor’s purposes has been obtained from the audit procedures performed on the consolidation and the work performed by the group auditor and the other auditors on the financial information of the
components, on which to base the group audit opinion. The group auditor’s conclusion on uncorrected misstatements, and the effect of the other auditors’ reports or memorandums of work performed on the group audit opinion.

(d) Discussions of significant accounting, auditing and financial reporting matters with those charged with governance of the group, group management, component management, or the other auditors.

***

Application Material

Acceptance and Continuance as Group Auditor

Obtaining an Understanding at the Acceptance or Continuance Stage (Ref: Para. 10)

12A1. In the case of a new engagement, the group auditor’s understanding of the group, its components, and their environments is may be obtained from:

- Information provided by group management;
- Discussions with group management; and,
- Where applicable, discussions with the previous group auditor, component management and other auditors. In the case of a continuing engagement, the group auditor considers significant changes that may affect previous experience with the group.

13A2. The group auditor’s understanding may includes matters such as the following:

- The group structure.
- Components’ business activities that are significant to the group, including the regulatory, economic and political environments in which those activities take place.
- The use of service organizations, including shared service centers.
- A description of group-wide controls.
- The complexity of the group financial statements.
- Whether other auditors will perform work on the financial information of any of the components.
- Whether the group auditor:
  - Will have unrestricted access to those charged with governance of the group, group management, those charged with governance of the component, component management, component information, and the other auditors (including relevant parts of their audit documentation sought by the group auditor); and
  - Will be able to perform necessary work on the financial information of the components.
14A3. In the case of a continuing engagement, the group auditor considers whether there have been significant changes that may affect the group auditor’s ability to obtain sufficient appropriate audit evidence on which to base the group audit opinion to reduce audit risk for the group financial statements to an acceptably low level may be affected by significant changes, for example:

- Changes in the group structure (e.g., acquisitions, disposals, or reorganizations).
- Changes in components’ business activities that are significant to the group.
- Changes in the composition of those charged with governance of the group, group management, or key management of significant components.
- Difficulties experienced by the group auditor with regard to the integrity and competence of group or component management.
- Changes in group-wide controls.

**Identifying Significant Components** (Ref: Para. 9(b)-10(b))

15A4. The group auditor may identify at the group level a component as likely to include one or more significant risks of material misstatement of the group financial statements due to the nature of, and circumstances specific to, that component. For example, a component could be responsible for foreign exchange trading and thus expose the group to a significant risk of material misstatement even though the component is not otherwise of individual financial significance to the group.

46A5. A component may also be likely to include significant risks of material misstatement of the group financial statements due to its individual financial significance to the group. As the individual financial significance of a component increases, the risks of material misstatement of the group financial statements ordinarily increase. Generally, a relatively small number of components will constitute a large portion of the group’s operations and financial position, making them financially significant. The group auditor may apply a percentage to a chosen benchmark as an aid to identify components that are of individual financial significance. Depending on the nature and circumstances of the group, appropriate benchmarks might include group assets, liabilities, cash flows, profit or turnover. Although in practice there are ranges of possible percentages, a component representing 20% or more of group assets, liabilities, cash flows, profit, or turnover is regarded as financially significant. For example, after identifying components that are likely to include significant risks of material misstatement of the group financial statements, the group auditor may decide that other components, which exceed 10% of the chosen benchmark, are also significant. The nature and circumstances of the group, however, may make a lower percentage appropriate. A higher or lower percentage, however, may be appropriate in the circumstances.

**Expectation to Obtain Sufficient Appropriate Audit Evidence** (Ref: Para. 9)

17A6. A group may consist only of components that are not of individual financial significance to the group likely to be significant. In these circumstances, the group auditor and related auditors, engagement partner can reasonably expect to obtain sufficient appropriate audit
evidence to reduce audit risk for the group financial statements to an acceptably low level if
the group auditor will be able to:

(a) perform the work on the financial information of some of these components; and
(b) be involved in the work performed by unrelated other auditors on the financial
information of other components to the extent the group auditor considers necessary
to obtain sufficient appropriate audit evidence on which to base the group audit
opinion.

Access to Information (Ref: Para. 11-13)

A7. The group auditor may not have access to component information, those charged with
governance of components, component management, or the other auditors (including relevant parts of their audit documentation sought by the group auditor) to the extent necessary to obtain sufficient appropriate audit evidence on which to base the group audit opinion. For example, the group auditor may not have access to a component accounted for by the equity method. The group auditor’s access may be restricted by circumstances or group management.

20. It may also not be practical for the group auditor to be involved in the work of another auditor. For example, the group auditor, or a related auditor on behalf of the group auditor, may not be able to be involved in the work of an unrelated auditor in the case of (a) a significant component operating in a foreign jurisdiction, or (b) a tight timetable for completing the audit of the group financial statements.

A8. Where access is restricted by circumstances, the group auditor nevertheless may be able to obtain sufficient appropriate audit evidence by other means. For example, the group auditor may not have access to those charged with governance, the management, or auditor (including relevant parts of the auditor’s audit documentation sought by the group auditor) of a component that is accounted for by the equity method. The group auditor, however, may have a complete set of financial statements of the component, including the auditor’s report thereon, and information retained by group management in relation to that component. The group auditor may conclude that, based on the relative insignificance of the component, this limited information constitutes sufficient appropriate audit evidence. As the significance of the component increases, however, this is less likely to constitute sufficient appropriate audit evidence.

A9. Where access is restricted by group management, it is unlikely that the group auditor will be able to obtain sufficient appropriate audit evidence by other means. Where this is the case, the requirements in paragraphs 12-13 apply.

A10. Appendix 1 contains an example of an auditor’s report containing a qualified opinion based on the group auditor’s inability to obtain sufficient appropriate audit evidence in relation to a component accounted for by the equity method where, in the group auditor’s judgment, the effect is material but not pervasive.
Terms of Engagement

ISA 210, “Terms of Audit Engagements” establishes standards and provides guidance on agreeing with a client on the terms of engagement. In an group audit of group financial statements, the group auditor may wish to include matters such as the following may be included in the terms of engagement in additional matters in the terms of engagement to those required by ISA 210, “Terms of Audit Engagements:”

- The applicable financial reporting framework;
- The fact that the communication between the group auditor and the other auditors should be unrestricted;
- The fact that important communications between the other auditors, those charged with governance of the component, and component management, including communications on material weaknesses in internal control, should be made available to the group auditor;
- The fact that important communications between regulatory authorities and components related to financial reporting matters should be made available to the group auditor;
- The fact that, to the extent the group auditor considers necessary, the group auditor should be permitted:
  - (i) access to component information, those charged with governance of components, component management, and the other auditors (including relevant parts of their audit documentation sought by the group auditor); and
  - (ii) to perform work on the financial information of the components.
- The group auditor should state, in the terms of engagement, The fact that restrictions on:
  - (a) the group auditor’s access to component information, those charged with governance of components, component management, or the other auditors (including relevant parts of their audit documentation sought by the group auditor) or
  - (b) the work to be performed on the financial information of the components, imposed after the group auditor’s acceptance of the engagement, constitute a scope limitation that may affect the group audit opinion. In exceptional circumstances, it may even give rise to resignation from the engagement, i.e., where permitted by law or regulation.

Obtaining an Understanding of the Other Auditors (Ref: Para. 14)

The group auditor’s understanding of the other auditors’ professional competence may include:

- Possesses an understanding of the applicable financial reporting framework sufficient to fulfill their responsibilities in the group audit of the group financial statements.
statements (the group financial reporting procedures manual often describes the characteristics of the applicable financial reporting framework);

- Possesses an understanding of auditing and other standards applicable to the group audit of the group financial statements, sufficient to fulfill the other auditor’s responsibilities in the audit of the group financial statements; and

- Possesses the special skills necessary to perform the work on the financial information of the particular components; and.

A.13 The group auditor’s understanding also may include whether the other auditors operates in a regulatory environment that actively monitors, oversees and enforces the professional qualifications, independence, and professional competence of auditors, and the quality control systems of their firms.

A14. The group auditor’s ability to use the work of the other auditors may also be affected by the following:

- Previous experience with or knowledge of the other auditors.

- The degree to which the group auditor and the other auditors perform, or are subject to, common policies and procedures. For example, whether the group auditor and another auditor share:
  - Common policies and procedures for performing the work (e.g., audit methodologies);
  - Common quality control policies and procedures; or
  - Common monitoring policies.

- Commonality of:
  - Laws and regulations or legal system;
  - Professional oversight and discipline;
  - Education and training;
  - Professional organizations and standards;
  - Language and culture.

A15. The group auditor uses a number of sources to obtain information about the professional qualifications, independence, and professional competence of an unrelated auditor, and the quality control system of that auditor’s firm may provide information about the other auditors. For example, the group auditor may:

- Visit the unrelated other auditors;

- Request the unrelated other auditors to complete a questionnaire or written representations;

- Discuss the unrelated other auditors with colleagues in the group auditor’s firm, or with a network firm who has dealt with the unrelated auditor;
Obtain confirmations from the professional bodies to which the unrelated auditor belongs, the authorities by which the unrelated auditor is licensed, or other third parties; or

Consider the results of previous contacts with the unrelated auditor.

**Obtaining an Understanding of the Group, Its Components, and Their Environments, and Assessing the Risks of Material Misstatement of the Group Financial Statements**

**Matters About Which the Group Auditor Obtains an Understanding (Ref: Para. 19)**

A15a. ISA 315 contains guidance on matters the auditor may consider when obtaining an understanding of the industry, regulatory, and other external factors that affect the entity, including the applicable financial reporting framework; the nature of the entity; objectives and strategies and related business risks; and measurement and review of the entity’s financial performance. Paragraphs A16-A18 contains guidance on matters specific to a group, including the consolidation process.

**Group Control Environment**

1. The group auditor obtains an understanding of the group control environment. The group control environment includes the attitude, awareness, and actions of those charged with governance and management that relate to the group-wide controls and their importance.

**Group-wide Controls**

2A16. The group auditor obtains an understanding of the group-wide controls. Group-wide controls may include a combination of the following:

- Regular meetings between group and component management to discuss business developments and to review performance.
- Monitoring of components’ operations and their results, including regular reporting routines, which enables group management to monitor components’ performance against budgets, and to take appropriate action.
- Group management’s risk assessment process, i.e., the process for identifying, analyzing and managing business risks, including the risk of fraud, that may result in material misstatement of the group financial statements.
- Monitoring, controlling, reconciling, and eliminating intra-group transactions and unrealized profits, and intra-group account balances at the group level.
- A process for monitoring the timeliness and assessing the accuracy and completeness of financial information received from components.
- A central IT system controlled by the same general IT controls for all or part of the group.
- Control activities within an IT system that is common for all or some components.
- Monitoring of controls, including activities of internal audit and self-assessment programs.
• Consistent policies and procedures, including a group financial reporting procedures manual.
• Group-wide programs, such as codes of conduct and fraud prevention programs.
• Arrangements for assigning authority and responsibility to component management.

3A17. Where internal audit is may be regarded as part of group-wide controls, for example, when the internal audit function is centralized. ISA 620, “Using the Work of Internal Audit” deals with and the group auditor plans to use the work of internal audit, the group auditor’s evaluates evaluation of the competence and objectivity of the internal auditors where the group auditor plans to use their work.

Consolidation Process

4A18. The group auditor obtains an understanding of the consolidation process, including relevant controls. The group auditor’s understanding of the consolidation process may includes matters such as the following:

Matters relating to the applicable financial reporting framework, including the following:
• The extent to which component management has an understanding of the applicable financial reporting framework.
• The process for identifying and accounting for components in accordance with the applicable financial reporting framework.
• The process for identifying reportable segments for segment reporting in accordance with the applicable financial reporting framework.
• The process for identifying related party relationships and related party transactions for reporting in accordance with the applicable financial reporting framework.
• The accounting policies applied to the group financial statements, changes from those of the previous financial year, and changes resulting from new or revised standards under the applicable financial reporting framework.
• The procedures for dealing with components with financial year-ends different from the group’s.

Matters relating to the consolidation process, including the following:
• Group management’s process for obtaining an understanding of the accounting policies used by components, and where applicable, ensuring that uniform accounting policies are used to prepare the financial information of the components for purposes of the group financial statements, and that differences in accounting policies are identified, and adjusted (where required in terms of the applicable financial reporting framework). Uniform accounting policies are the specific principles, bases, conventions, rules, and practices adopted by the group, based on the applicable financial reporting framework, that the components use to report similar transactions consistently. These policies are ordinarily described in the financial reporting procedures manual and reporting package issued by group management.
• Group management’s process for ensuring complete, accurate and timely financial reporting by the components for purposes of the consolidation.

• The process for translating the financial information of foreign components into the currency of the group financial statements.

• How IT is organized for purposes of the consolidation, including the manual and automated stages of the process, and the manual and programmed controls in place at the various stages of the consolidation process.

• Group management’s process for obtaining information on subsequent events.

Matters relating to consolidation adjustments, including the following:

• The process for recording consolidation adjustments, including the preparation, authorization and processing of related journal entries, and the experience of personnel responsible for the consolidation.

• The consolidation adjustments required by the applicable financial reporting framework.

• Business rationale for the events and transactions that gave rise to the consolidation adjustments.

• Frequency, nature and size of transactions between components.

• Procedures for monitoring, controlling, reconciling, and eliminating intra-group transactions and unrealized profits, and intra-group account balances.

• Steps taken to arrive at the fair value of acquired assets and liabilities, procedures for amortizing goodwill (where applicable), and impairment testing of goodwill, in accordance with the applicable financial reporting framework.

• Arrangements with a majority owner or minority interests regarding losses incurred by a component (for example, an obligation of the minority interest to make good such losses).

*Financial Reporting Procedures Manual (Ref: Para. 19)*

5A19. To achieve uniformity and comparability of financial information, group management may ordinarily issue financial reporting procedures manuals, a reporting packages, and related instructions to components, specifying the requirements for financial information of the components to be included in the group financial statements.

A20. The reporting package ordinarily consists of standard formats for providing financial information for incorporation in the group financial statements. Reporting packages generally do not take the form of complete financial statements prepared and presented in accordance with the applicable financial reporting framework.

A21. The instructions ordinarily cover:

• (a) The accounting policies to be applied;
• (b) Statutory and other disclosure requirements applicable to the group financial statements, including:
  o (i) The identification and reporting of segments;
  o (ii) Related party relationships and transactions;
  o (iii) Intra-group transactions and unrealized profits; and
  o (iv) Intra-group account balances; and
• (c) A reporting timetable.

6A22. The group auditor’s ordinarily considers the proposed evaluation of the financial reporting procedures manual, reporting package, and related instructions for components at an early stage of the audit of the group financial statements, to determine whether it will provide sufficient appropriate information to prepare and present the group financial statements. The group auditor’s consideration may include the following:

• The clarity and practicality of the instructions for completing the reporting package.
• Whether the reporting package:
  o Adequately describes the characteristics of the applicable financial reporting framework;
  o Provides for disclosures sufficient to comply with the requirements of the applicable financial reporting framework, for example disclosure of related party relationships and transactions, and segment information;
  o Provides for the identification of consolidation adjustments, for example intra-group transactions and unrealized profits, and intra-group account balances; and
  o Provides for the approval of the completed package by component management.

Fraud (Ref: Para. 19)

7A23. ISA 240 (Revised), “The Auditor’s Responsibility to Consider Fraud in the Audit of Financial Statements” establishes standards and provides guidance on the auditor’s responsibility with regard to fraud. In an audit of group financial statements, the group auditor obtains an understanding of the following Information used to identify the risks of material misstatement due to fraud may include the following:

• Group management’s assessment of the risks that the group financial statements may be materially misstated as a result of fraud.
• Group management’s process for identifying and responding to the risks of fraud in the group, including any specific fraud risks identified by group management, or account balances, classes of transactions, or disclosures for which a risk of fraud is likely.
• Whether there are particular components for which a risk of fraud is likely.
• How those charged with governance of the group monitor group management’s processes for identifying and responding to the risks of fraud in the group, and the controls that group management has established to mitigate these risks.

8. The group auditor inquires of those charged with governance of the group, group management, internal audit (and if considered appropriate, component management, the other auditors, and others), to the group auditor’s inquiry whether they have knowledge of any actual, suspected, or alleged fraud affecting a component or the group.

Discussion Among Engagement Team Members Regarding the Risks of Material Misstatement of the Group Financial Statements, Including Risks of Fraud (Ref: Para. 19)

9A24. ISA 315 and ISA 240 (Revised), “The Auditor’s Responsibility to Consider Fraud in the Audit of Financial Statements” require the key members of the engagement team to discuss the susceptibility of an entity to material misstatement of the financial statements due to fraud or error, with a specific emphasis on the risks due to fraud. In a group audit, these discussions may also include the other auditors. The group auditor determines, engagement partner’s determination of who to include in the discussions, how and when they occur, and their extent is affected by factors such as based on prior experience with the group and knowledge of current developments, who to include in the discussions, how and when they occur, and their extent. In an audit of group financial statements, the group auditor and other auditors may also discuss these matters. 10. The group auditor, or a related auditor on behalf of the group auditor, holds discussions with. The discussions, however, ordinarily include the other auditors who perform work on the financial information of significant components.

11A25. These discussions provide an opportunity to:

• Share knowledge of the components and their environments, including group-wide controls.
• Exchange information about the business risks of the components or the group.
• Exchange ideas about how and where the group financial statements may be susceptible to material misstatement due to fraud or error, how group management and component management could perpetrate and conceal fraudulent financial reporting, and how assets of the components could be misappropriated.
• Identify practices followed by group or component management that may be biased or designed to manage earnings that could lead to fraudulent financial reporting, for example revenue recognition practices that do not comply with the applicable financial reporting framework.
• Consider known external and internal factors affecting the group that may create an incentive or pressure for group management, component management, or others to commit fraud, provide the opportunity for fraud to be perpetrated, and indicate a culture or environment that enables group management, component management, or others to rationalize committing fraud.
• Consider the risk that group or component management may override controls.
• Consider whether uniform accounting policies are used to prepare the financial information of the components for purposes of the group financial statements, and whether differences in accounting policies are identified, and adjusted (where required in terms of by the applicable financial reporting framework).
• Discuss fraud that has been identified in components, or information that indicates existence of a fraud in a component.
• Share information that may indicate non-compliance with national laws or regulations, for example payments of bribes and improper transfer pricing practices.

Risk Factors (Ref: Para. 20)
A26. Examples of conditions or events that may indicate risks of material misstatement of the group financial statements, including risks due to fraud, include the following:
• A complex group structure, especially where there are frequent acquisitions, disposals, or reorganizations.
• Poor corporate governance structures, including decision-making processes, that are not transparent.
• Non-existent or ineffective group-wide controls, including inadequate group management information on monitoring of components’ operations and their results.
• Components operating in foreign jurisdictions that may be exposed to factors such as unusual government intervention in areas such as trade and fiscal policy, and restrictions on currency and dividend movements; and fluctuations in exchange rates.
• Business activities of components that involve high risk, such as long-term contracts or trading in innovative or complex financial instruments.
• Uncertainties regarding which components require incorporation in the group financial statements in accordance with the applicable financial reporting framework, for example whether any special purpose entities or non-trading entities exist and require incorporation.
• Related party relationships and transactions.
• Prior occurrences of intra-group account balances that did not balance or reconcile on consolidation.
• The existence of complex transactions that are accounted for in more than one component.
• Components’ application of accounting policies that differ from those applied in the group financial statements.
• Components with different financial year-ends, which may be utilized to manipulate the timing of transactions.
• Prior occurrences of unauthorized or incomplete consolidation adjustments.
- Aggressive tax planning within the group or large cash transactions with entities in tax havens.
- More than one other auditor engaged to audit the financial statements of the components, and frequent changes of these auditors within the group.

Risk Assessment (Ref: Para. 20)
43A27. The group auditor’s assessment of the risks at the group level of material misstatement of the group financial statements is based on information such as the following:
- (a) Information obtained from the understanding of the group, its components, and their environments, and of the consolidation process, including audit evidence obtained in evaluating the design and implementation of group-wide controls and controls relevant to the consolidation.
- (b) Information obtained through discussions with the other auditors. Appendix 3 contains examples of conditions or events that may indicate risks of material misstatement of the group financial statements, including risks due to fraud.

Responding to Assessed Risks
Determining the Work to be Performed on the Financial Information of Components (Ref: Para. 25-28)
51A28. The type of work to be performed on the financial information of a component will be affected by matters such as the significance of the component, and the group auditor’s evaluation of the design and implementation of group-wide controls. The diagram in Appendix 4 illustrates how the group auditor may decide on the type of work to be performed on the financial information of the components.

Components that are not Individually Significant (Ref: Para. 27)
A29. The group auditor’s selection of components that are not individually significant and the type of work to be performed on the financial information of these individual components selected may be affected by matters such as the following:
- The extent of audit evidence expected to be obtained on the financial information of the significant components (see paragraphs 25-26).
- Whether the component has been newly formed or acquired.
- Whether significant changes have taken place in the component.
- Whether internal audit has performed work at the component and the effect, if any, it has on the group audit.
- The commonality of systems and processes applied by the components.
- The operating effectiveness of group-wide controls.
- Abnormal fluctuations identified by analytical procedures performed at the group level.
The risks posed by, or the individual financial significance of, the component in comparison with other components within this category.

Whether the component is subject to audit required by statute, regulation or for another reason.

The group auditor may vary the selection of components and work to be performed on their financial information over a period of time.

For example, analytical procedures performed at the group level might have indicated a significant increase in revenue and accounts receivable. Discussions with group management may have revealed that the increase is due to the establishment of a new market for one of the group’s products. The new market may have been established in a country with severe economic problems, which might affect the collection of the accounts receivable. In this example, the group auditor determined that the product is manufactured and sold by three subsidiaries in the group. Although these subsidiaries are not individually significant, they might be significant in the aggregate. Based on the risk assessment performed at the group level, the group auditor may decide to include the subsidiaries in the selection of components on which to perform, or require the other auditors to perform, work and the group auditor may decide that an audit of the accounts receivable at these three components may be the appropriate work.

Communication with the Other Auditors

Confirmations (Ref: Para. 41)

A31. Appendix 3 contains an example of confirmations by another auditor, which are, whenever possible, submitted to the group auditor before the work on the financial information of the component commences.

Letter of Instruction (Ref: Para. 42)

A32. Appendix 5 contains examples of matters to be included in the group auditor’s letter of instruction. In addition to the matters listed in paragraph 42, the group auditor’s letter of instruction may include matter such as the following:

Matters relevant to the planning of the other auditor’s work

- The timetable for completing the audit.
- Dates of planned visits by group management and the group auditor, and dates of planned meetings with component management and the other auditor.
- A list of key contacts.
- The use to be made of the other auditor’s work, the type of work to be performed, and arrangements for the coordination of efforts at the initial stage of and during the audit, including the group auditor’s or related auditor’s planned involvement in the work of the other auditor. Laws and regulations applicable to the parent that are relevant to the work to be performed by the other auditor.
• Work to be performed on intra-group transactions and unrealized profits and intra-group account balances. Results of the group auditor’s risks assessment performed at the group level that are relevant to the other auditor’s work. The materiality level that the group auditor expects the other auditor to use. The threshold for clearly trivial misstatements.

• Guidance on other statutory reporting responsibilities, for example reporting on group management’s assertion on the effectiveness of internal control.

• Where there is likely to be a time lag between completion of the work on the financial information of the components and the group auditor’s conclusion on the group financial statements, specific instructions for a subsequent events review.

Matters Relevant to the Conduct of the Other Auditor’s Work

• The findings of the group auditor’s tests of control activities of a processing system that is common for all or some components, and tests of controls to be performed by the other auditor.

• The findings of internal audit, based on work performed on controls at or relevant to components.

• A request for timely communication of audit evidence obtained from performing work on the financial information of the components that contradicts the audit evidence on which the group auditor originally based the risk assessment performed at the group level.

• A request for written representation on component management’s compliance with the applicable financial reporting framework, or a statement that differences between the accounting policies applied to the financial information of the component and those applied to the group financial statements have been disclosed.

• Matters to be documented by the other auditor. Matters Relevant to the Other Auditor’s Communication – The form and content of the memorandum or report of work performed to be provided to the group auditor.

Other Information

• A request for a list of corrected and uncorrected misstatements of the financial information of the component, and identified indicators of possible management bias. The list does not include uncorrected misstatements that are below the threshold set by the group auditor for clearly trivial misstatements.

• A request that the following are reported to the group auditor in a timely manner:
  
  o Significant accounting, financial reporting and auditing matters, including accounting estimates and related judgments. Material weaknesses in internal control. Actual fraud, or information obtained that indicates that a fraud may exist, including any suspected or alleged fraud affecting the component. Instances of non-compliance with laws and regulations applicable to the component that could have a material effect on the group financial statements.
Matters relating to the going concern status of the component.
Matters relating to litigation and claims. Matters relating to compliance with laws and regulations.

- A request that the group auditor be notified of any significant or unusual events as early as possible. A request for the names of related parties that were not listed by group management, and the types of related party transactions.

**Evaluating the Sufficiency and Appropriateness of Audit Evidence Obtained**

**Reviewing Another Auditor’s Audit Documentation (Ref: Para. 47)**

81A33. The parts of another auditor’s audit documentation that will be relevant to the group audit may vary depending on the circumstances. Ordinarily, the group auditor, or a related auditor on behalf of the group auditor, focuses on audit documentation that is relevant to the significant risks of material misstatement of the group financial statements. The extent of the review ordinarily is affected by the fact that the other auditor’s documentation has been subjected to the other auditor’s firm’s review procedures.

**Performing Analytical Procedures in the Overall Review at the End of the Group Audit**

A34. In accordance with ISA 520, “Analytical Procedures,” analytical procedures are performed at group level at or near the end of the group audit when forming an overall conclusion as to whether the group financial statements as a whole are consistent with the group auditor’s understanding of the entity. The conclusions drawn from the results of such audit procedures are intended to corroborate conclusions formed during the work performed on the financial information of the components or elements of the group financial statements. For example, the group auditor may consider whether information obtained from the components about complex transactions between them, reflect the group auditor’s understanding of such transactions when consolidated.

**Communication with Another Auditor Who is Required to Audit the Financial Statements of a Component Group Management and Those Charged with Governance**

**Communication with Group Management (Ref: Para. 56)**

405A35. Where another auditor is required by statute, regulation or for another reason to express an audit opinion on the financial statements of a component, and the group auditor becomes aware of matters that may be significant to the financial statements of the component of which component management may be unaware, the group auditor should request group management to inform component management of such matters for the purpose of the component audit. Group management may need to keep certain material sensitive information confidential. Examples of such matters that may be significant to the financial statements of the component of which component management may be unaware include the following:

- Potential litigation.
- Plans for abandonment of material operating assets.
• Subsequent events.
• Significant legal agreements.

106. Group management may need to keep certain material sensitive information confidential. In these circumstances, the group auditor ordinarily discusses with group management the risk of component management issuing misleading financial statements, and requests group management to require component management not to issue the financial statements of the component. In addition, the group auditor may consider it necessary to direct the other auditor not to issue the auditor’s report on the financial statements of the component until group management has resolved the outstanding matter. When group management remains of the opinion that the matter should not be communicated to component management, the group auditor considers resigning from the engagement.

Communication with Those Charged with Governance (Ref: Para. 57)

94A36. The matters that the group auditor communicates to those charged with governance of the group may include those matters brought to the attention of the group auditor by other auditors that the group auditor judges to be significant to the responsibilities of those charged with governance of the group. Communication with those charged with governance of the group takes place at various times during the group audit of the group financial statements. For example, the matters referred to in paragraph 9357(a)-(eb) may be communicated after the group auditor has determined the work to be performed on the financial information of the components. On the other hand, the matter referred to in paragraph 9357(fc) may be communicated at the end of the audit, and the matter referred to in paragraph 9357(gd) may be communicated when it occurs.

Public Sector Perspective [To be revised and incorporated in body of ISA.]

1. Some terms in this ISA, such as “engagement partner” and “firm,” are to be read as referring to their public sector equivalents.

2. In some jurisdictions, legislation provides for the appointment of different auditors for different tiers of government or classes of public sector entity. In addition, in auditing a combination of public sector entities, the group management may not be structured in the manner envisaged by the ISA. Such factors may result in additional complexity that affect, for example, the group auditor’s approach to audit planning and risk assessment.

3. Where, in accordance with the mandate, the scope of the group audit of the group financial statements is wider than that envisaged by this ISA, and the group auditor intends to use the work of another auditor, the group auditor will need to ensure that the other auditor has a proper understanding of the affect of this wider scope on the other auditor’s work and report.
Example of a Qualified Opinion where the Group Auditor is Not Able to Obtain Sufficient Appropriate Audit Evidence on which to Base the Group Audit Opinion (Paragraph A10)

In this example, the group auditor is unable to obtain sufficient appropriate audit evidence in relation to a significant component accounted for by the equity method because the group auditor did not have access to the accounting records, management, or auditor of the component.

The group auditor has read the audited financial statements of the component as of June 30, 20X5, including the auditor’s report thereon, and considered related financial information retained by group management in relation to the component. The group auditor, however, was not able to obtain more recent audited financial statements of that component. The consolidated financial statements are for the year ended December 31, 20X5.

In the auditor’s judgment, the effect on the group financial statements of this inability to obtain sufficient appropriate audit evidence is material but not pervasive.

INDEPENDENT AUDITOR’S REPORT

[Appropriate Addressee]

Report on the Consolidated Financial Statements

We have audited … (remaining words are as illustrated in the introductory paragraph of the example auditor’s report in paragraph 60 of ISA 700 (Revised) (adapted as necessary for consolidated financial statements) We have audited the accompanying consolidated financial statements of ABC Company and its subsidiaries, which comprise the consolidated balance sheet as at December 31, 20X5, and the consolidated income statement, statement of changes in equity and cash flow statement for the year then ended, and a summary of significant accounting policies and other explanatory notes.

Management’s Responsibility for the Consolidated Financial Statements

Management is responsible for … (remaining words are as illustrated in the management’s responsibility paragraph of the example auditor’s report in paragraph 60 of ISA 700 (Revised) (adapted as necessary for consolidated financial statements) Management is responsible for the preparation and the fair presentation of these consolidated financial statements in accordance with International Financial Reporting Standards. This responsibility includes: designing, implementing and maintaining internal control relevant to the preparation and fair presentation of consolidated financial statements that are free from material misstatement, whether due to fraud or error; selecting and applying appropriate accounting policies; and making accounting estimates that are reasonable in the circumstances.

Auditor’s Responsibility
Our responsibility is to express an opinion on these financial statements based on our audit. Except for the matter described in the Basis for Qualified Opinion paragraph, we conducted our audit ... (remaining words of the first two paragraphs are as illustrated in the first two paragraphs of the auditor’s responsibility in the example auditor’s report in paragraph 60 of ISA 700 (Revised) (adapted as necessary for consolidated financial statements))

Our responsibility is to express an opinion on these consolidated financial statements based on our audit. Except for the matter described in the Basis for Qualified Opinion paragraph, we conducted our audit in accordance with International Standards on Auditing. Those standards require that we comply with ethical requirements and plan and perform the audit to obtain reasonable assurance whether the consolidated financial statements are free from material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the consolidated financial statements. The procedures selected depend on the auditor’s judgment, including the assessment of the risks of material misstatement of the consolidated financial statements, whether due to fraud or error. In making those risk assessments, the auditor considers internal control relevant to the entity’s preparation and fair presentation of the consolidated financial statements in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the entity’s internal control. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of accounting estimates made by management, as well as evaluating the overall presentation of the consolidated financial statements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

Basis for Qualified Opinion

ABC Company’s investment in XYZ Company, a foreign associate accounted for by the equity method, is recognized at $15 million in the balance sheet as at December 31, 20X1, and ABC Company’s share of profit of XYZ Company is recognized at $1 million in the income statement for the year ended December 31, 20X1. We were unable to obtain sufficient appropriate audit evidence in relation to the financial information of XYZ Company because part of the available financial information was unaudited and we were unable to obtain access to the accounting records, management, or auditor of XYZ Company.

---

7 In circumstances when the auditor also has responsibility to express an opinion on the effectiveness of internal control in conjunction with the audit of the consolidated financial statements, this sentence would be worded as follows: “In making those risk assessments, the auditor considers internal control relevant to the entity’s preparation and fair presentation of the consolidated financial statements in order to design audit procedures that are appropriate in the circumstances.”
Qualified Opinion

In our opinion, except for the possible effect of the matter described in the Basis for Qualified Opinion paragraph, the consolidated financial statements give a true and fair view of (or “present fairly, in all material respects”) the financial position of ABC Company and its subsidiaries as of December 31, 20X1, and of their financial performance and cash flows for the year then ended in accordance with International Financial Reporting Standards.

Report on Other Legal and Regulatory Requirements

[Form and content of this section of the auditor’s report will vary depending on the nature of the auditor’s other reporting responsibilities.]

Appendix 5

Examples of Matters to be Included in the Group Auditor’s Letter of Instruction

Required Confirmations

A request that the following confirmations are, whenever possible, submitted to the group auditor before the work on the financial information of the component is commenced:

- In the case of an unrelated auditor, confirmation whether the unrelated auditor’s firm’s quality control system complies with ISQC 1, and there are any issues noted in recent monitoring reports that are likely to significantly affect the work that the unrelated auditor will perform on the financial information of the component.

- Confirmation of receipt of the group auditor’s letter of instruction and confirmation whether the other auditor will undertake the requested work.

- Confirmation whether the other auditor understands and will comply with the relevant ethical requirements, including independence, sufficient to fulfill the other auditor’s responsibilities in the audit of the group financial statements.

- Confirmation whether the other auditor understands the applicable financial reporting framework, sufficient to fulfill the other auditor’s responsibilities in the audit of the group financial statements.

- Confirmation whether the other auditor understands the auditing or other standards applicable to the audit of the group financial statements, sufficient to fulfill the other auditor’s responsibilities in the audit of the group financial statements.

- Confirmation whether the other auditor understands that the group auditor will consider and may use the other auditor’s work for purposes of the audit of the group financial statements.

When there are several components in the group and their names may not be known to the other auditor, it is advisable for the group auditor to list them in the letter of instruction to facilitate the other auditor’s assessment of compliance with the relevant independence requirements.
Appendix 6.3

Example of Another Auditor’s Confirmations (See Paragraphs 98 A31)

The following letter is not intended to be a standard letter. Confirmations may vary from one auditor to another (for example, whether the other auditor is a related auditor or an unrelated auditor) and from one period to the next.

The group auditor ordinarily requests the other auditor, whenever possible, to submit the confirmations before the work on the financial information of the component is commenced.

[Other Auditor Letterhead]

[To Group Auditor] [Date]

This letter is provided in connection with your audit of the group financial statements of [name of parent] for the year ended [date] for the purpose of expressing an opinion on whether the group financial statements give a true and fair view of (present fairly, in all material respects) the financial position of the group as of [date] and of its financial performance and cash flows for the year then ended in accordance with [indicate applicable financial reporting framework].

We acknowledge receipt of your instructions dated [date], requesting us to perform the specified work on the financial information of [name of component] for the year ended [date].

We confirm that:

1. We will be able to comply with the instructions. / We advise you that we will not be able to comply with the following instructions [specify instructions] for the following reasons [specify reasons].

2. The instructions are clear and that we understand them. / We would appreciate it if you could clarify the following instructions [specify instructions].

We also acknowledge that:

1. The financial information of [name of component] for the year ended [date] will be included in the group financial statements of [name of parent] for the year ended [date].

2. You intend to review and, if considered appropriate, use our work performed you have requested us to perform on the financial information of [name of component] for the year ended [date] for purposes of the audit of the group financial statements of [name of parent] for the year ended [date].

3. You intend to evaluate and, if considered appropriate, use our work for the audit of the group financial statements of [name of parent].

In connection with the work that we will perform on the financial information for the year ended [date] of [name of component], a [describe component, e.g. wholly-owned subsidiary, subsidiary, joint venture, associate company] of [name of parent], we confirm the following:

1. Our firm’s quality control system complies with ISQC 1, and there are no issues noted in recent remedial action is taken promptly in relation to issues identified from the firm’s monitoring reports process, and there are not outstanding issues noted resulting from the
firm’s monitoring process that are likely to affect significantly the work that we will perform in connection with this engagement.

2. A quality control review of our firm has been conducted by [name of body external to the firm]. There are no outstanding issues resulting from the review that are likely to affect significantly the work that we will perform in connection with this engagement.

2.3 We have an understanding of, and will comply with [indicate relevant ethical requirements], sufficient to fulfill our responsibilities in the audit of the group financial statements. In particular, and with respect to [name of parent] and the other components in the group, we are independent within the meaning of [indicate relevant ethical requirements] and are in compliance with the applicable requirements of [refer to rules] promulgated by [name of regulatory agency].

3.4 We have an understanding of International Standards on Auditing and [indicate other national standards applicable to the audit of the group financial statements], sufficient to fulfill our responsibilities in the audit of the group financial statements and will conduct our work on the financial information of [name of component] for the year ended [date] in accordance therewith.

4.5 We have an understanding of [indicate applicable financial reporting framework or group financial reporting procedures manual], sufficient to fulfill our responsibilities in the audit of the group financial statements.

We will inform you of any changes in the above representations during the course of our work on the financial information of [name of component] for the year ended [date].
