

Auditing Disclosures – Issues and Task Force Views on Further Supplemental Guidance**Introduction**

1. Both Consultative Advisory Group (CAG) Representatives (at the September 2013 CAG meeting) and IAASB members (at the December 2013 IAASB meeting) noted that the development of supplemental guidance outside of the ISAs would be beneficial. A few IAASB members also had the view that the guidance would be most useful if it was published at the same time as the changes to the International Standards on Auditing (ISAs).
2. At the December 2013 IAASB meeting, it was agreed that the Task Force would explore the opportunity to develop a document that would provide a helpful overview of the proposed changes to the ISAs (as set out in the exposure draft (ED)—**Agenda Item H.1**), together with relevant perspectives of existing ISA requirements and application material relating to auditing disclosures as part of a financial statement audit.
3. At this point, the Task Force has not expended extensive effort to pursue the development of new guidance, such as an International Auditing Practice Note (IAPN). Rather, in line with the IAASB discussion in December 2013, the Task Force has focused its efforts on the development of a document (the “supplemental guidance”—set out in the Appendix to this Agenda Item) that:
 - Describes the evolving nature of disclosures, including some of the complexities and challenges. It is intended to serve as a reminder to some auditors not to overlook the importance of their audit work in this area.
 - Provides an overview of the audit process, including relevant revised ISAs, pertinent to auditing disclosures. This may prompt some auditors to focus more on disclosures during their audit, or serve as a helpful reminder to others.
 - Highlights the areas that have been enhanced by the proposed changes in the ED.
 - Provides more practical guidance through the use of examples in some areas.

The supplemental guidance is intended as a Staff publication, and consequently there is no need for Board approval. However, it would be noted that any conforming changes to the supplemental guidance would be made in line with any further amendments made to the ISAs as the proposed changes in the ED are finalized.

Role of the Supplemental Guidance

4. The supplemental guidance has been developed as a non-authoritative Staff publication, the content of which provides context for the proposed changes to the ISAs and other relevant matters when auditing disclosures. Like other Staff documents, it highlights features of the existing standards (as revised) and other relevant matters as appropriate.
5. The supplemental guidance has been prepared as a tool for auditors to use during their audit. By combining the various requirements and application material (including those proposed in the ED) relating to auditing disclosures, supplemented by some practical examples, auditors may be more stimulated to focus on audit procedures relating to disclosures at various stages during the audit.

The document therefore provides a more holistic view for auditors of the types of considerations that may be relevant when auditing disclosures than the ISAs alone can provide. The document also provides more practical examples, which are better placed in some form of guidance rather than in the ISAs themselves.

Possible Actions

6. Possible actions relating to the guidance relevant to auditing disclosures could include:
 - (i) Publishing the supplemental guidance as a document accompanying the explanatory memorandum (EM), with a view to putting the proposed changes to the ISAs in context and providing other helpful guidance to auditors when auditing disclosures. If the supplemental guidance were to be released in this manner, it would be labelled a “preliminary” Staff publication (such as a “Staff Alert”), with the final Staff document published at the same time as the final changes to the ISAs; or
 - (ii) Developing more comprehensive guidance. The most appropriate form of such guidance (for example, an IAPN or other Staff document) would need to be deliberated. The time needed to develop such guidance largely depends on the form the guidance may take.

Task Force Proposals

7. Once the ED is finalized, there will be changes in several ISAs to help focus auditors on disclosures. Throughout the process of developing these changes, the IAASB has learned about the complexity of disclosures, together with the related challenges of auditing disclosures. The extant ISAs already included considerable requirements and application material for auditors when auditing disclosures. The IAASB’s intention to enhance the audit procedures relating to disclosures through the changes proposed in the ED seeks to improve the quality of disclosures through a more consistent and effective approach to auditing them.
8. To complement the proposed changes to the ISAs, the Task Force is of the view that the actions as set out in paragraph 6(i) would appropriately address some of the most immediate concerns about the need for more guidance, and would be helpful for auditors and others to understand the effect of the proposed changes. The Task Force also is of the view that, by publishing the supplemental guidance, a more complete picture for auditing disclosures is provided, something that the proposed changes, being dispersed throughout the ISAs, cannot readily demonstrate in isolation.
9. In relation to guidance for auditing disclosures, if more comprehensive guidance were to be developed, areas such as risk assessment procedures and gathering sufficient appropriate audit evidence, in particular in relation to those types of disclosures that pose the most significant challenges in practice, could be further explored. However, the Task Force has not yet assessed the possible nature, scope or extent of any potential further guidance, or the need for it or practicality of doing so. The Task Force therefore recommends that such guidance, if any, would be issued after the ED, in particular because the Task Force believes such guidance would likely take some time to develop (for the reasons discussed below) and this needs to be balanced with the aim

of issuing an ED as soon as practicable. The responses to the Discussion Paper (DP)¹ emphasized the need for the IAASB, among others, to move forward to improve the focus on disclosures, and a delay in publishing the ED may frustrate those with an expectation of imminent change.

10. In terms of the likely timetable for developing supplemental guidance, the Task Force recognizes two factors in particular that suggest this is likely to be more extended than would be desirable to coordinate its urgent issuance with the proposed changes to the ISAs. Firstly, developing the guidance is likely to require further research to identify and address the practical challenges in auditing particular types of disclosures – including seeking input from experienced practitioners and other experts. The experience of doing so in developing IAPN 1000² suggests this is not likely to be trivial. Secondly, such guidance is likely to be more effective and have greater longevity if it were to be developed in parallel with the work of the International Accounting Standards Board (IASB) and other national standard setters who are reviewing their approaches to disclosures in their standards. The Task Force is, therefore, not convinced at this stage that Board resources should be dedicated to it until after the exposure comments have been heard, and also taking into account the Board's other priorities for 2014–2015.

Matters for CAG Consideration

1. The Representatives are asked whether the supplemental guidance (as presented in the Appendix) should accompany the EM, as a preliminary Staff publication, to help auditors and other stakeholders understand the effect of the proposed changes to the ISAs.
2. If so, are there areas that should be given greater emphasis or expanded upon in the preliminary Staff publication or in another form of non-authoritative guidance?

¹ The DP, [The Evolving Nature of Financial Reporting: Disclosure and Its Audit Implications](#), was published in January 2011, and a summary of the responses in the [Feedback Statement—The Evolving Nature of Financial Reporting: Disclosure and Its Audit Implications](#), published in January 2012

² IAPN 1000, *Special Considerations in Auditing Financial Instruments*

Appendix

[Preliminary Staff Publication] – Auditing Disclosures as Part of the Financial Statement Audit³

1. This document highlights matters of relevance for auditors when addressing disclosures as part of an audit of financial statements. In particular, it describes financial reporting disclosure trends and their implications from an audit perspective, highlights how the International Standards on Auditing (ISAs) guide the auditor in addressing disclosures and areas of attention for the auditor, and summarizes guidance intended to help the consistent, effective and proper application of the ISAs.
2. The document refers to requirements and application material of the ISAs, including those amendments made by the IAASB that come into effect for audits of financial statements for periods on or ending [xx]. This material has been written in the context of an audit of general purpose financial statements prepared in accordance with a fair presentation framework, but may also be useful for other financial reporting frameworks. Disclosures are ordinarily found in the notes to the financial statements, but may also be found on the face of the financial statements (i.e., the primary financial statements) or outside the financial statements but incorporated by cross-reference (where permitted by the applicable financial reporting framework).⁴

Today's financial statements are becoming progressively more complex, and therefore appropriate, relevant and high-quality disclosures have become increasingly important. Financial statements are now more likely to include a variety of disclosures, ranging from the traditional disclosure items to more subjective or explanatory non-quantitative disclosures. Different financial reporting frameworks may establish diverse disclosure requirements, and preparers may find it necessary to supplement these requirements with additional disclosures in order for the financial statements to achieve fair presentation.

The Importance of the Role of the Auditor in Financial Statement Disclosures

3. The recent financial crisis highlighted that immediate action was needed to address the quality of financial statement disclosures. Users rely on information in financial statements to make economic decisions. Although they are not in a position to demand financial statements tailored to meet their specific needs, they rely on the audit to enhance the degree of confidence they may place on the financial information contained therein. The auditor's role in enhancing the credibility of the financial statements, and the audit process itself, can contribute to an improvement in the quality of financial statement disclosures.

³ This publication does not constitute an authoritative pronouncement of the IAASB nor does it amend or override the ISAs. The document does not introduce new requirements in addition to those contained in the ISAs. Rather, it is meant to provide auditors with relevant guidance in relation to auditing financial statement disclosures. Further, this publication is not meant to be exhaustive and reading this is not a substitute for reading the ISAs.

⁴ For example, International Financial Reporting Standard (IFRS) 7, *Financial Instruments: Disclosures*, states that "the disclosures required... shall either be given in the financial statements or incorporated by cross-reference from the financial statements to some other statement..."

4. Auditing disclosures is an integral part of the audit. It is therefore important that audit procedures during all stages of the audit include appropriate consideration of, and work effort on, disclosures. The ISAs already recognize the role of disclosures in performing risk assessments and developing responses to assessed risks, gathering and evaluating audit evidence, and in forming an opinion on the financial statements, including evaluating the fair presentation of the financial statements. In addition, the ISAs often refer to “classes of transactions, account balances and disclosures” when describing the auditor’s responsibilities in many areas, indicating that disclosures are treated in the same way as classes of transactions and account balances in the application of many auditing requirements.
5. Auditing disclosures has become more complex as the disclosures themselves have evolved. As the focus has shifted to providing more non-quantitative information in the disclosures (for example, disclosures about risks affecting the entity, disclosure of estimation uncertainty, or other narrative disclosures), applying the requirements in the ISAs to disclosures when planning the audit, obtaining sufficient appropriate audit evidence, and forming an opinion has become more challenging. Notwithstanding that there may be challenges in auditing certain disclosures, the proper application of the ISAs, including a focus on disclosures throughout the audit process, enhances the quality of the audit.
6. The following table illustrates some of the relevant ISAs when auditing disclosures:

Planning the Audit and Responding to Risks	Obtaining Sufficient Appropriate Audit Evidence	Completing the Audit
ISA 200 <i>Overall Objectives of the Independent Auditor and the Conduct of an Audit in Accordance with International Standards on Auditing</i>	ISA 500 <i>Audit Evidence</i>	ISA 450 <i>Evaluation of Misstatements Identified during the Audit</i>
ISA 210 <i>Agreeing the Terms of Audit Engagements</i>	ISA 501 <i>Audit Evidence—Specific Considerations for Selected Items</i>	ISA 700 <i>Forming an Opinion and Reporting on Financial Statements</i>
ISA 240 <i>The Auditor’s Responsibilities Relating to Fraud in an Audit of Financial Statements</i>	ISA 540 <i>Auditing Accounting Estimates, Including Fair Value Accounting Estimates, and Related Disclosures</i>	
ISA 260 <i>Communication with Those Charged with Governance</i>	ISA 550 <i>Related Parties</i>	
ISA 300 <i>Planning an Audit of Financial Statements</i>	ISA 560 <i>Subsequent Events</i>	
ISA 315 (Revised) <i>Identifying and Assessing the Risks of Material Misstatement through Understanding the Entity and Its Environment</i>	ISA 570 <i>Going Concern</i>	
ISA 320 <i>Materiality in Planning and Performing an Audit</i>		

Planning the Audit and Responding to Risks	Obtaining Sufficient Appropriate Audit Evidence	Completing the Audit
ISA 330 <i>The Auditor's Responses to Assessed Risks</i>		

7. In light of the complexity and importance of disclosures, the quality of the audit would be enhanced by the auditor's continued focus on the requirements and application material relevant to disclosures in the ISAs, supplemented by the auditor:
- Giving appropriate attention to disclosures early in the audit process;
 - Taking into account how management prepares the disclosures, including understanding the systems or processes for doing so, including those that are not part of the general ledger system, and the related controls;
 - Recognizing the unique challenges in doing so, applying the concept of materiality with equivalent emphasis to disclosures as to classes of transactions and account balances and in evaluating misstatements identified in disclosures (including those identified in non-quantitative disclosures); and
 - When evaluating the overall presentation of the financial statements, considering disclosures in light of the facts and circumstance of the entity based on the auditor's knowledge of the entity and the audit evidence obtained during the audit.
8. Disclosures are likely to be more challenging to prepare and audit when the business model and transactions of the entity are complex. As such, the significant challenges relating to auditing disclosures are more relevant to these types of entities. Notwithstanding that some financial reporting frameworks for small- and medium-sized entities (SMEs) may have less complex disclosure requirements, auditors of SMEs may also encounter auditing challenges, and the guidance that follows may also assist auditors of SMEs.

Financial Reporting Disclosure Trends

9. Financial reporting has evolved to provide greater transparency about an entity's financial and operational risks. Business and capital markets have also become more challenging, and there is now greater complexity in business models, and more diversity in sources of risk and uncertainty, as well as greater sophistication in how risk is managed.
10. This evolution has led to a need for entities to provide new types of information that may be more relevant to users, even if it may be both more subjective and more variable. Financial reporting standards, and in particular their disclosure requirements, and practices have responded to these changes by shifting from simply providing breakdowns of line items on the face of the financial statements to providing a broad variety of disclosures, some of which are more explanatory or narrative in nature. Today, disclosures in the financial statements may include:
- **Significant accounting policies**—Descriptions of the accounting policies adopted by the entity, relevant to understanding the line items on the face of the financial statements and the basis of the accounting policies of the entity.
 - **Components of line items**—Such as breakdowns of line items into smaller categories or reconciliations.

- **Judgments and reasons**—Nature of judgments made in the process of applying accounting policies, and management decisions and the rationale supporting them. Examples include how an entity distinguishes investment properties from owner-occupied properties and from property held for sale in the ordinary course of business. This category also includes disclosures around why an entity’s ownership interest constitutes control in respect of an investee where less than half of its voting rights or potential voting rights are owned directly or indirectly.
- **Models, including assumptions and inputs**—Includes disclosures of information relevant to the calculation of items in the financial statements, such as possible ranges of values. This may also include forward-looking information, to the extent that it is used to support amounts recognized in the balance sheet, such as discount rates, effective interest rates and growth rates used in impairment testing.
- **Financial exposure to risks and uncertainties arising from recognized and unrecognized resources and obligations**—Disclosures to enable users to understand the underlying measurement variability or estimation uncertainty of an item in the financial statements, such as a sensitivity analysis. An example of a disclosure about exposure to risks is value-at-risk disclosures.
- **Material uncertainties in relation to the entity’s ability to continue as a going concern**—Disclosures about material uncertainties related to events or conditions that may cast significant doubt on the entity’s ability to continue as a going concern.
- **Related party disclosures**—Descriptions of related party relationships and amounts of transactions, including key management compensation.
- **Unrecognized assets and unrecognized liabilities**—Disclosures about assets or liabilities that do not meet the criteria for recognition in the financial statements, but that are useful for the users of the financial statements.
- **Pro forma financial information**—Disclosures may be required relating to business combinations that have occurred after the balance sheet date but before the financial statements are issued.
- **Descriptions of internal processes**—Disclosures such as risk management policies and practices of an entity. An example is the disclosure of the policies and procedures for managing financial instrument risks.
- **Disclosure of the fair value of an amount recorded using a different measurement basis**—Such as a requirement to disclose fair values for items measured using another measurement basis than that which is presented on the face of the financial statements, for example, historical cost or amortized cost.
- **“Objective-based disclosure requirements”⁵**—Overarching requirements in financial reporting frameworks that set out the objectives of the disclosures to be provided rather than require specific disclosures. Under this regime, preparers are expected to provide additional

⁵ That is, disclosure requirements that establish the objectives to be accomplished, while not expressly requiring specific disclosure items

disclosures when compliance with the specific disclosure requirements in a standard would be insufficient for users to be able to understand the impact of particular transactions, other events and conditions on the entity's financial position and performance.

- **Factual information about the entity**—Such as addresses, names of group entities, composition of share capital and dividend payments.

Other Financial Reporting Considerations

11. The requirements of the applicable financial reporting framework, including those relating to disclosures, determine the form and content of the financial statements. Although financial reporting frameworks do not specify how to disclose every transaction, event or account balance, broad principles underlying the preparation and presentation of financial statements may be embodied in an applicable conceptual framework,⁶ and may be used by auditors to help assess whether the financial statements comply with the financial reporting requirements. Whether information communicated in the financial statements is useful to users of the financial statements in making economic decisions is highly dependent on how an entity presents and discloses such information.
12. In representing that the financial statements have been prepared in accordance with the applicable financial reporting framework, management implicitly, or explicitly, is expected to make assertions regarding the recognition, measurement, presentation and disclosure of the various elements of financial statements and related disclosures. Some conceptual frameworks call this the fundamental characteristics of useful information,⁷ and in contemporary accounting standards often includes “relevance” and “faithful representation”,⁸ or similar characteristics.
13. As accounting standards have continued to evolve, some accounting standard setters have found it necessary to make changes to their conceptual frameworks. For example, in some accounting frameworks, “reliability” was once a principal qualitative characteristic of financial information but has been superseded by other concepts, such as “faithful representation”, in response to a perceived lack of a common understanding of the term “reliability”.
14. Given this new emphasis on faithful representation, it has been argued that, in some circumstances, the disclosures that provide further context to a financial statement line item may become at least as important, if not more useful and relevant, to users as the amount disclosed on the face of the financial statements. The supporting disclosures are necessary to inform users about judgments and assumptions made in the measurement of the line item, the reasons for these judgments, facts, and circumstances and the measurement uncertainty related to that line item. In effect, the disclosures in these cases are being used to achieve the principles of relevance or faithful representation, or both.

⁶ For example, the International Accounting Standards Board's (IASB) *Conceptual Framework for Financial Reporting* (Framework 2010). The IASB is currently in the process of revising parts of its Framework 2010.

⁷ The IASB's Framework 2010 notes that the fundamental qualitative characteristics include the types of information that is most useful to users for making economic decisions.

⁸ Relevance and faithful representation are the fundamental qualitative characteristics of the IASB's Framework 2010, and are used as examples to represent the characteristics of accounting information included in disclosures. Other accounting frameworks may use similar terms, which are to be considered in a similar way when assessing the accounting requirements of information to be included in disclosures. Notwithstanding that the IASB is currently revising its Conceptual Framework, it is not expected that further changes will be made to their fundamental qualitative characteristics.

Audit Considerations Relating to Disclosures

15. Audit effort is incurred in relation to disclosures in the context of the auditor’s overall objectives in conducting an audit in accordance with the ISAs. These objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to express an opinion on whether the financial statements are prepared, in all material respects, in accordance with an applicable financial reporting framework.⁹
16. Throughout the ISAs, the use of the term “financial statements,” by definition, includes disclosures.¹⁰ Accordingly, where the requirements and guidance in the ISAs refer to “financial statements”, this is intended to include considerations about disclosures as well as classes of transactions, events and account balances. However, although gathering sufficient appropriate audit evidence for disclosures is an integral part of the audit, it is not the auditor’s objective to form a separate opinion on each individual disclosure in the financial statements.
17. The auditor considers the intended users of the financial statements, including when making decisions related to materiality. The ISAs are premised on the basis that it is reasonable to assume that users have a reasonable knowledge of business and economic activities and accounting. It is also presumed that they have a willingness to study the information in the financial statements with reasonable diligence; understand that the financial statements are prepared, presented and audited to levels of materiality; recognize the uncertainties inherent in the measurement of amounts based on estimates, judgment and the consideration of future events; and make reasonable economic decisions on the basis of the information in the financial statements.¹¹
18. The concepts of professional judgment¹² and professional skepticism¹³ are fundamental in auditing disclosures. The need for professional skepticism increases with the complexity and relevance to users of the disclosures, for example with regard to:
 - Evaluating whether sufficient appropriate evidence has been obtained, which can be particularly challenging for some disclosures, such as non-quantitative disclosures.
 - Evaluating management’s judgment, and the potential for management bias, in applying the requirements of the applicable financial reporting framework, for example in disclosing related party relationships and transactions.
 - Drawing conclusions based on the audit evidence obtained, for example, assessing whether the presentation and disclosures achieve fair presentation.

A Focus on Disclosures throughout the Audit Process

19. Disclosures are an integral part of the financial statements. Accordingly, it is important for the auditor to give attention to disclosures throughout the audit. Various aspects of the ISAs are intended to help auditors focus on disclosures earlier in the audit process and throughout their audit

⁹ ISA 200, paragraph 11

¹⁰ ED: Revisions to ISA 200, paragraph 13(f) (The definition has been revised to clarify what is meant by disclosures.)

¹¹ ISA 320, paragraph 4

¹² ISA 200, paragraph 16

¹³ ISA 200, paragraph 15

procedures on classes of transactions, events, account balances, and disclosures, in particular in relation to:

- **Terms of the engagement**—Additional matters may be included in the audit engagement letter, for example:¹⁴
 - A description of the responsibilities of management relating to disclosures, particularly relating to making information available for the audit, as well as the draft financial statements, including the notes, to allow sufficient time to complete the audit; and
 - The expectation that management will provide written representations.
- **Communication with those charged with governance**—When communicating about the planned time and scope of the audit, the auditor may also consider discussing the impact on the audit of significant changes to the applicable financial reporting framework or changes in the activities of the entity, which may affect the required disclosures in the financial statements, to obtain the views of those charged with governance.¹⁵
- **Planning**—Auditor consideration earlier in the audit process about some of the challenges related to disclosures will also help meet the objectives for effective planning, in particular when disclosures may contain information from systems or processes that are not part of the general ledger system, as this may also lead to additional challenges.¹⁶ Consideration about disclosures early in the audit process may also help the auditor to identify the impact on the audit from:
 - Significant new or revised disclosures arising from changes in the activities of the entity (for example, that result in a change in the segments that should be identified or if a significant new subsidiary has been acquired).
 - Significant new or revised disclosures arising from changes to the applicable financial reporting framework.
 - The need for the auditor to engage an auditor's expert to assist with particular disclosures (for example, disclosures related to pension or other retirement benefit funds).
 - Matters relating to disclosures that the auditor may wish to discuss with those charged with governance.¹⁷

¹⁴ ED: Revisions to ISA 210, paragraph A23 (new example on management making information available for purposes of the audit included) and Example Audit Engagement Letter in Appendix 1 (footnote added to highlight examples of additional items that may be added to the audit engagement letter).

¹⁵ ED: Revisions to ISA 260, paragraph A12 (Additional example added of disclosure related matters that may be discussed with those charged with governance)

¹⁶ ED: Revisions to ISA 300, Para A12a (new guidance for auditors to consider the effect of disclosures on the nature, timing and extent of planned audit procedures)

¹⁷ ED: Revisions to ISA 300, paragraph A12b (new guidance to provide examples of matters that may be dealt with on a more timely basis in the audit if disclosures considered earlier in the audit process)

Understanding the Entity and Its Environment, and the Auditor’s Risk Assessment and Response in Relation to Disclosures

ISA 300 requires the auditor to develop an audit plan that includes, among other things, a description of the nature, timing and extent of planned further audit procedures at the assertion level, as determined under ISA 330.¹⁸ As part of planning the audit and developing the audit plan, the auditor is required to understand the entity and its environment, including internal control.¹⁹

20. Consideration of the nature, timing and extent of work to be performed on disclosures is integral to this process of developing an appropriate audit plan. The following areas may be notably important in the context of disclosures in understanding the entity and its environment:²⁰

- Regulatory factors, such as the required disclosures in a regulated industry or disclosure of environmental requirements affecting the industry and the entity’s business;
- Disclosures about investments and investment activities, such as investments in non-consolidated entities, including partnerships, joint ventures and special-purpose entities;
- Disclosures about financing and financing activities such as debt structure and related terms, including off-balance-sheet financing arrangements and leasing arrangements; and
- Financial reporting practices, such as industry-specific disclosures;²¹

as well as understanding whether an entity’s complex business structures have been adequately disclosed, or whether related party disclosures properly describe, as required, the relationship and transactions between the owners of the entity and other people or entities.²²

21. Some of the required understanding may also come from the auditor’s previous experience with the entity and audit procedures performed in previous audits. For example, areas where the auditor previously experienced difficulty in performing the necessary audit procedures may inform the auditor for the current year’s audit.²³

22. Understanding the information system, including related business processes, is also important for auditors in order to understand the information flow for disclosures. Disclosures may contain some information from systems or processes that are not part of the general ledger system – this information may come from sources such as an entity’s risk management system, a valuation report by an expert, models or other calculations used to develop estimates recognized or disclosed in the

¹⁸ ISA 300, paragraph 9(b)

¹⁹ ISA 315 (Revised), paragraphs 11–12

²⁰ See ISA 315 (Revised), paragraph 11(a).

²¹ ED: Revisions to ISA 315 (Revised), paragraph A31 (revised to emphasize disclosure considerations in specific areas already included in this paragraph)

²² ED: Revisions to ISA 315 (Revised), paragraph A30 (revised guidance to emphasize disclosures)

²³ ED: Revisions to ISA 315 (Revised), paragraph A19 (example added about matters arising from disclosures in previous period audits for the auditor to consider in obtaining an understanding of the entity)

financial statements, or sensitivity analyses derived from financial models to demonstrate that management has considered alternative assumptions.²⁴

ISA 315 (Revised) requires discussion by the engagement partner and other key engagement team members about the susceptibility of the entity's financial statements to material misstatement, and the application of the applicable financial reporting framework to the entity's facts and circumstances.²⁵

23. Matters the audit engagement team may discuss, relating to disclosures, include:

- New financial reporting requirements that may result in significant new or revised disclosures.
- Changes in the activities of the entity that may result in significant new or revised disclosures, for example a significant business combination in the period under audit.
- Disclosures for which obtaining sufficient appropriate audit evidence may have been difficult in the past.²⁶

24. The discussion required by ISA 315 (Revised) places particular emphasis on how and where the entity's financial statements may be susceptible to material misstatement due to fraud, including how fraud might occur. Examples of areas where there may be an increased risk of misstatement resulting from fraudulent financial reporting may include disclosure of related party relationships and transactions; and areas of subjectivity or judgment (for example, maturity analysis tables; sensitivity disclosures; and disclosures required to achieve fair presentation).²⁷

The auditor is required by ISA 315 (Revised) to identify and assess the risk of material misstatement at the financial statement level; and at the assertion level for classes of transactions, account balances, and disclosures.²⁸

25. This risk assessment provides a basis for designing and performing further audit procedures. Deficiencies such as management's lack of competence or inadequate controls over the preparation of the information (including disclosures) in the financial statements may have a more pervasive effect on the financial statements, and require an overall response by the auditor,²⁹ such as considering the knowledge and experience of the engagement team members responsible for reviewing the financial statements.

26. As many disclosures are directly related to line items in the primary financial statements, consideration of the risk of material misstatement at the assertion level for disclosures may be done at the same time as, and in conjunction with, the related line item. For example, when assessing the risk of material misstatement for impairment amounts recognized (for example, relating to the

²⁴ ISA 315 (Revised), paragraph A68 and ED: Revisions to ISA 315 (Revised), paragraph A89a (new guidance with examples of where this information may come from)

²⁵ ISA 315 (Revised), paragraph 10

²⁶ ED: Revisions to ISA 315 (Revised), paragraph A21a (new guidance of possible related matters that could be discussed)

²⁷ ED: Revisions to ISA 240, paragraph A11 (guidance on the discussion enhanced to include consideration of disclosures where the risks of material misstatement arising from fraud may be increased.)

²⁸ ISA 315 (Revised), paragraph 25

²⁹ ISA 315 (Revised), paragraph A118 and ED: Revisions to ISA 315 (Revised), paragraph A119 (new example added to explain when a matter relating to disclosures is pervasive to the financial statements)

valuation of goodwill), the auditor may also assess the risk of material misstatement about the related disclosures, such as the information about the impairment model (model used, growth rates, interest rates, etc.). For disclosures, the level at which the risk assessment is carried out is a matter of the auditor's professional judgment, and is performed using the knowledge that the auditor has gained about the entity and its activities such that the assessment is made at the appropriate level.³⁰

27. Financial reporting frameworks may require disclosures that are not directly related to a recorded transaction, event or account balance (for example, disclosure of a contingent liability), or may require disclosures to provide further explanation about amounts recorded in the balance sheet, income statement, statement of changes in equity or cash flow statement. The auditor's assessment of the risks of material misstatement also extends to these disclosures.³¹
28. The auditor's risk assessment determines the nature, timing and extent of further audit procedures.³² Appendix 2 of ISA 315 (Revised) provides examples of conditions and events that may indicate the existence of risks of material misstatement. Among other things, events or transactions that involve significant measurement uncertainty, and the possibility of omission of, or obscuring, useful and relevant information, may be particularly relevant in the context of the auditor's work on disclosures.³³
29. The timing of the preparation of the financial statements, particularly for those disclosures that do not relate to a line item on the balance sheet, income statement, cash flow statement or statement of changes in equity is a relevant consideration in the auditor's determination of when to perform audit procedures in accordance with ISA 330.³⁴ There may be various reasons why disclosures may be prepared late in the financial reporting process, including that: management's focus may initially be on the primary financial statements (i.e., the amounts recognized) as these may often be used for preliminary announcements; or the financial statements may be prepared in a separate process which is done after the information generated by the general ledger is completed. Nonetheless, as indicated in paragraph 19 above, emphasizing management's responsibilities relating to the preparation of the draft financial statements, including disclosures, when agreeing the terms of engagement is an important consideration for the auditor.
30. When designing audit tests for disclosures, the auditor may also consider:
 - The controls over the preparation of the financial statements,³⁵ such as the adequate review of the preparation of the financial statements, including information for those disclosures from

³⁰ ED: Revisions to ISA 315 (Revised), paragraphs A124 (a)–(b) (assertions for classes of transactions and events, and account balances, revised to include assertions for related disclosures and presentation)

³¹ ED: Revisions to ISA 315 (Revised), paragraph A125a (new guidance for those disclosures that are not covered by paragraphs A124(a)–(b))

³² ISA 315 (Revised), paragraph 25

³³ ED: Revisions to ISA 315 (Revised), paragraphs A127–A128 and Appendix 2 (new examples added to emphasize disclosures)

³⁴ ED: Revisions to ISA 330, paragraph A14 (new example added relating to disclosures when considering the planned timing of audit procedures on disclosures)

³⁵ ED: Revisions to ISA 315 (Revised), paragraph A98 (example of a control activity added relating to the preparation of the financial statements)

systems or processes that are not part of the general ledger system. For example, those charged with governance have responsibility for overseeing the preparation of the financial statements and there may be other controls involving review of the disclosures that are directly related to the underlying amounts recognized, with any discrepancies being followed up.

- Procedures performed on the related line items on the primary financial statements. For example, some parts of the required disclosures may already have been audited when the underlying numbers have been audited.
 - The assessed risks for the disclosures, which may affect the disclosures selected for testing.
31. The work effort required on disclosures is based on the auditor's assessment of risk and materiality for the financial statements as a whole. For example, the disclosure of the objectives, policies and processes for managing credit risk may not be considered a risk of material misstatement for some entities and therefore the auditor may consider it appropriate to refer to relevant risk manuals, minutes of meetings etc. in order to assess the accuracy with which the disclosure describes the entity's process. However, for entities with banking and insurance activities, the objectives, policies and processes for managing credit risk are more fundamental to the entity, and the work effort required would likely be more comprehensive. In this case, the auditor's focus may be more on whether the disclosure properly describes the process the entity has followed, and audit procedures could include testing the process to derive the information or testing the operating effectiveness of controls over the information used in the preparation of these disclosures. The auditor's work effort may also involve using those with specialized skills and knowledge in this area.

ISA 330 also requires the auditor to agree or reconcile the financial statements, including disclosures, with the underlying accounting records, including information contained in systems or processes that are not part of the general ledger system.³⁶

32. The auditor uses professional judgment, taking into account the risks of material misstatement, in determining the nature and extent to which the disclosures are agreed or reconciled.³⁷

In responding to the risks of material misstatement, the auditor is also required to perform audit procedures to evaluate whether the overall presentation of the financial statements, including the related disclosures, is in accordance with the applicable financial reporting framework.³⁸

33. This evaluation relates to whether the financial statements, including related disclosures, are presented in a manner that reflects:
- The appropriate classification and description of financial information and the underlying transactions and events; and

³⁶ ED: Revisions to ISA 330, paragraph 20 (requirement revised to make clear that the reconciliation applies to the financial statements, regardless of where the information comes from)

³⁷ ED: Revisions to ISA 330, paragraph A52 (revised guidance to make clear that the auditor uses professional judgment when deciding the work effort in agreeing or reconciling the financial statements)

³⁸ See ISA 330, paragraph 24.

- The appropriate form, arrangement, and content of the financial statements. This includes, for example, the terminology used as required by the applicable financial reporting framework, the amount of detail provided, the aggregation and disaggregation of amounts, and the classification of items in the statements and the bases of amounts set forth.³⁹

Obtaining Sufficient Appropriate Audit Evidence for Disclosures

The auditor is required to design and perform audit procedures that are appropriate in the circumstances for the purpose of obtaining sufficient appropriate audit evidence.⁴⁰

34. Audit evidence is necessary to support the auditor's opinion and report. Whether sufficient appropriate audit evidence has been obtained to enable the auditor to form an opinion is a matter of professional judgment. The requirement for the auditor to obtain sufficient appropriate audit evidence for disclosures is the same as for obtaining audit evidence for classes of transactions, events and account balances, which in some cases will be done concurrently.
35. For example, procedures for obtaining audit evidence for amounts recognized in the financial statements may also satisfy the auditor's consideration of whether the disclosure is an accurate portrayal of the basis for the calculation, recognizing that the disclosure is often an integral part of the presentation of the related financial statement amount (for example, the model used, the assumptions such as growth rates, discount rates, etc.).
36. Various ISAs, in particular ISA 500, ISA 501, ISA 540 and ISA 550, establish requirements and provide guidance about obtaining audit evidence for the wide variety of disclosures in financial statements, for example:
 - Requirements and guidance for obtaining sufficient appropriate audit evidence, including types of procedures, the relevance and reliability of audit evidence, and considerations where audit evidence is prepared by management's expert.⁴¹
 - Obtaining audit evidence for selected items, such as litigation and claims,⁴² and segment information.⁴³
 - Requirements and guidance for disclosures related to accounting estimates.⁴⁴
 - Requirements and guidance for auditing related party disclosures.⁴⁵
 - Requirements and guidance for obtaining evidence for events between reporting date and

the date of the financial statements, including adequate disclosures in the financial statements.⁴⁶

- The auditor's responsibilities relating to disclosures about going concern required by a financial reporting framework.⁴⁷

The Application of the Concept of Materiality to Disclosures, and How Misstatements Are Evaluated

The auditor determines materiality and performance materiality when planning the audit. The auditor is also required to make a preliminary determination of those non-quantitative disclosures, the misstatement of which could reasonably be expected to influence the economic decisions of users taken on the basis of the financial statements as a whole.⁴⁸

37. Disclosures form an integral part of the audited financial statements and therefore the application of the concept of materiality,⁴⁹ including in relation to both quantitative and non-quantitative disclosures, is a key aspect of the auditor's work in accordance with ISA 320.⁵⁰ The concept of materiality is applied by the auditor throughout the audit and, whether relating to quantitative or non-quantitative disclosures, is a matter of professional judgment.
38. A misstatement in non-quantitative disclosures may be significant enough to affect the economic decision of users of financial statements. For example, non-disclosure about a possible liability that does not meet the recognition criteria may be important enough to affect such decisions. When planning the audit, the auditor not only makes judgments about the size of amounts disclosed, but also considers the nature of quantitative and non-quantitative disclosures that reasonably could be expected to influence the economic decisions of users.
39. Understanding the information needs of the users of financial statements (in the context of the circumstances of the entity) may assist the auditor in making the preliminary determination of those non-quantitative misstatements that may be material. The auditor may also consider previous experience with the entity and other relevant information obtained when performing audit procedures to understand the entity (for example, changes in the activities of the entity).⁵¹ Depending on the circumstances of the entity, examples of material non-quantitative disclosures may include:
 - Disclosures about liquidity and debt covenants of an entity in financial distress.

⁴⁶ See ISA 560.

⁴⁷ See ISA 570.

⁴⁸ ISA 320, paragraphs 10–11 and ED: Revisions to ISA 320, paragraph 11a (new requirement to encourage auditors to start thinking about non-quantitative disclosures early in the planning process)

⁴⁹ As part of its short-term plans, the IASB plans to commence a project on materiality. This project will look at how materiality is applied in practice in financial statements prepared in accordance with IFRSs and consider whether further guidance is needed.

⁵⁰ ISA 320, paragraphs 6(a)-(c) and ED: Revisions to ISA 320, paragraph 11a (new requirement for considering non-quantitative disclosures)

⁵¹ ED: Revisions to ISA 320, paragraph A12a (new guidance to assist auditors with the types of considerations when making the preliminary assessment)

- Disclosure of the events or circumstances that have led to the recognition of an impairment loss.
 - Disclosures about key sources of estimation uncertainty, including assumptions about the future.
 - The disclosure of the nature of a change in accounting policy, and other similar disclosures required by the applicable financial reporting framework, for example, where new financial reporting requirements are expected to have a significant impact on the financial position and financial performance of the entity.
 - Disclosure about share-based payment arrangements, including information about how any amounts recognized were determined, and other relevant disclosures.
 - Disclosure of information about related parties, and related party transactions.⁵²
40. In addition to determining the materiality level for the financial statements as a whole, the auditor may also determine a lower materiality for a particular class(es) of transactions, account balance(s) or disclosures.⁵³ Examples of specific disclosures that may warrant a specific materiality may include:
- Circumstances where the entity may have acquired a significant new subsidiary during the period and relevant disclosures about the acquisition would enhance users' understanding of changes in the financial position and financial performance of the entity.
 - The significance of the information in relation to the financial statement amounts (for example, information for a segment that has been identified as having a significant role in the operations or profitability of the entity).
 - The extent of subjectivity involved in the calculation of a recorded amount or related disclosures (for example, disclosure of a sensitivity analysis to enable users to understand the underlying measurement uncertainty of a recorded amount).
 - Related party transactions.
 - Remuneration of management and those charged with governance.⁵⁴

ISA 450 requires the accumulation of misstatements identified during the audit ...⁵⁵

41. Misstatements in disclosures can be as important to users as misstatements of items in the primary financial statements. For example, in the recent financial crisis, users placed heavy emphasis on the maturity analysis of liabilities to ascertain the difficulty the entity may have in rolling over debt facilities. A misstatement in this disclosure could affect users' decisions to buy, hold, or sell investments in that entity, extend finance or take another economic action.

⁵² ED: Revisions to ISA 320, paragraph A12a (new guidance providing examples of material non-quantitative disclosures)

⁵³ ISA 320, paragraph 10

⁵⁴ ED: Revisions to ISA 320, paragraph A10 (new examples added to emphasize disclosures)

⁵⁵ ISA 450, paragraph 5

42. ISA 450 applies equally to classes of transactions, account balances and disclosures. Misstatements in disclosures may result from:

- An omission of a disclosure, including non-quantitative disclosures and objective-based disclosures⁵⁶ required by certain financial reporting frameworks.
- Inappropriately classified or aggregated information.
- For financial statements prepared in accordance with a fair presentation framework, the omission of additional information beyond that specifically required by the applicable financial reporting framework necessary for fair presentation.⁵⁷

Misstatements in disclosures (other than those that are clearly trivial) are also accumulated, and aggregated where appropriate, to assist the auditor in evaluating their effect on the disclosures and the financial statements as a whole.⁵⁸

43. In addition to assessing misstatements individually, professional judgment is used in aggregating misstatements to determine whether they are material. Although misstatements in non-quantitative disclosures cannot be aggregated in the same manner as misstatements of amounts, they are still individually and collectively assessed.⁵⁹

44. As part of the auditor's considerations about misstatements in disclosures, the auditor may also consider whether individual misstatements could be indicative of management bias, such that it leads to misleading information, or a trend towards duplicative or uninformative disclosures that may obscure important financial information.⁶⁰

Forming an Opinion on the Financial Statements

In forming an opinion on the financial statements, the auditor is required to evaluate whether, in view of the requirements of the applicable financial reporting framework, the financial statements adequately disclose the significant accounting policies selected and applied; ...the information presented in the financial statements is relevant, reliable, comparable and understandable; and the financial statements provide adequate disclosures to enable the intended users to understand the effect of material transactions and events on the information conveyed in the financial statements...⁶¹

45. As part of the auditor's responsibilities in evaluating the financial statements, professional skepticism is exercised to challenge management where the disclosures are, in the auditor's view, insufficient or inappropriate. Therefore, in addition to considerations about the individual and

⁵⁶ For example, IFRS 7, paragraph 42H, states that "an entity shall disclose any additional information that it considers necessary to meet the disclosure objectives..."

⁵⁷ ED: Revisions to ISA 450, paragraph A1 (additional examples added to illustrate possible misstatements in disclosures)

⁵⁸ ED: Revisions to ISA 450, paragraph A2a (new paragraph to emphasize that misstatements in disclosures are also accumulated, and aggregated where appropriate, and assessed for material misstatements)

⁵⁹ ED: Revisions to ISA 450, paragraph A2a (new paragraph to emphasize that misstatements in non-quantitative disclosures are also accumulated and assessed notwithstanding that they cannot be aggregated in the same way as misstatements in amounts)

⁶⁰ ED: Revisions to ISA 450, paragraph A17a (new guidance added for pervasive issues that may be found in disclosures)

⁶¹ ISA 700, paragraphs 13 (a), (d) and (e)

aggregated effect of misstatements in disclosures, in accordance with ISA 700 the auditor also considers whether.⁶²

- The financial statements adequately disclose the significant accounting policies selected and applied. This may include the relevance of the accounting policies to the entity, and the clarity with which they have been presented.
- The information in the financial statements is relevant, reliable, comparable and understandable. This may include whether:
 - The financial statements, including disclosures are classified, characterized and presented in a clear and concise manner but do not omit relevant information; and
 - The disclosures do not undermine the overall presentation of the financial statements by including information that is not relevant or in a manner that may obscure a proper understanding of the matters disclosed.

In addition, the auditor may consider whether the financial statements are comparable to the entity's financial statements of previous periods.

- The financial statements provide adequate disclosures to enable the intended users to understand the effect of material transactions and events on the information conveyed in the financial statements. This may include the extent to which the information in the financial statements is useful and specific to the circumstances of the entity. For example, the auditor may consider whether the disclosures are adequate to assist the intended users to understand:
 - The nature and extent of the entity's potential assets and liabilities arising from those transactions or events that do not meet the criteria for recognition (or the criteria for derecognition) established by the applicable financial reporting framework.
 - The nature and extent of risks arising from those material transactions and events, for example, disclosure of the financial risks to which an entity may be exposed if it undertakes derivatives trading.
 - The methods used and the assumptions and judgments made, and changes to them, that affect amounts presented or otherwise disclosed, including relevant sensitivity analysis.

Evaluating Whether the Financial Statements Achieve Fair Presentation

If the auditor is required to evaluate whether the financial statements are prepared in accordance with a fair presentation framework, the auditor also considers the overall presentation, structure and content of the financial statements, and whether the financial statements, including the related notes, represent the underlying transactions and events in a manner that achieves fair presentation in accordance with ISA 700.⁶³

⁶² ISA 700, paragraphs A3a–A4 (new and revised guidance on considerations relating to disclosures for the auditor when carrying out this evaluation)

⁶³ See ISA 700, paragraph 14.

46. The auditor’s evaluation about whether the financial statements achieve fair presentation, both in respect of presentation and disclosure, is a matter of professional judgment based on the facts and circumstances of the entity.⁶⁴
47. In performing this evaluation, the auditor considers what is needed in order to achieve fair presentation of the financial statements. Some financial reporting frameworks explicitly address the concept of fair presentation. For example, IFRSs note that fair presentation requires the faithful representation of the effects of transactions, other events and conditions in accordance with the definitions and recognition criteria for assets, liabilities, income and expenses. As noted in paragraph 7(b) of ISA 700, fair presentation involves not only compliance with the requirements of the applicable financial reporting framework, but also the possibility that additional disclosures may be necessary, regardless of whether there is a specific requirement for that information in the framework.⁶⁵
48. Finally, those charged with governance have an important role to play in relation to the entity’s disclosures. The auditor may discuss with management and those charged with governance, as appropriate, their views on why a particular presentation was chosen, as well as alternatives that may have been considered, including:
- The degree to which the amounts in the financial statements are aggregated or disaggregated, and whether the presentation of amounts or disclosures obscures useful information, or results in misleading information.
 - Consistency with appropriate industry practice, or whether any departures are relevant to the entity’s circumstances and therefore warranted.⁶⁶

⁶⁴ ED: Revisions to ISA 700, paragraph A4b (new guidance added to emphasize that the evaluation of whether the financial statements achieve fair presentation is a matter of professional judgment.)

⁶⁵ ED: Revisions to ISA 700, paragraph A4a (new guidance to emphasize that, when evaluating whether the financial statements achieve fair presentation, consideration is given to whether additional disclosures are required in addition to those required by the applicable financial reporting framework.)

⁶⁶ ED: Revisions to ISA 700, paragraph A4c (new guidance about the types of matters that may be discussed with management or those charged with governance when evaluating whether fair presentation has been achieved)
